ENGLISH WAR ENVOYS HAVE ARRIVED

Hindenburg's Belgian Brutalities Disclosed by Whitlock's Report

COUNTY MEETING ENDORSES DRAFT PLANS SATURDAY

McLennan County Agriculturist Society Members Want Conscription.

FOOD CAMPAIGN URGED

Appeal of Washington Considered by Farmers' Meeting in City Yesterday.

Believing that selective conscription will take fewer young men from the farms than the present plan, and will cause the towns and cities to contribute their just quota, a resolution yesterday was adopted by the McLennan County Agricultural association favoring President Wilson's policy of selective conscription. Also the resolution indorsed the president's policy of food production and conservation. It was stated that under present plans of enlistment two men are going from the farm where one is going from the country, causing agriculture to suffer. The motion to adopt the resolution was made by Charles E. Moore.

It also was decided at the meeting yesterday, over which W. W. Woodson presided, that members of the association will meet in a body in Waco Monday and go before the county commissioners in an effort to secure the dipping vats needed for tick eradication plans.

It was decided, on request of Secretary Seth N. Mayfield of the Cotton Palace, that a committee will be appointed by Chairman W. W. Woodson to co-operate in the establishment of agricultural exhibits. Space will be given free.

REPORT ON W C T U MEET

Mrs. A. D. Adams Gives List of Officers Chosen.

Returned delegates and officers from the state W. C. T. U. convention at Ennis report one of the best conventions and most hospitable receptions ever recorded in the history of the organization. Mrs. A. D. Adams, president of the local W. C. T. U., yesterday furnished the following list of officers who were chosen: President, Mrs. Nannie Webb-Curtis of Waco, re-elected; vice president and editor of the White Ribbon, Mrs. J. V. Brewer, Fort Worth; corresponding secretary, Mrs. C. B. McGrail, Fort Worth; recording secretary, Mrs. Claudia Hightowe, Fort Worth; treasurer, Mrs. May M. Kirkham, Cleburne; Loyal Temperance Legion, Miss Viva DeJernett, Peniel; state press reporter, Mrs. Maud Gerhardt, Corpus Christi.

Villa Badly Wounded, Says Mexico Newspaper

By Associated Press.

El Paso, April 21.—The assertion that Villa was wounded in the recent battle between his band and government forces under General Murguia at San Miguel De Babicora is made in today's issue of El Heraldo de Norte, of Chihuahua City, copies of which arrived at the border today. Private reports have been received, the paper says, that Villa was shot through both legs and was only saved from capture "by a miracle" as a flanking column of Yaqui Indians under General Fabele had almost formed a circle about Villa's personal escort.

DISCOURAGE GAMBLING

Marginal Prices for Wheat Fixed in Chicago.

By Associated Press.

Chicago, April 21.—Marginal prices for wheat were fixed by the board of directors of the Chicago board of trade today, the effect being to discourage gambling in futures. The marginal price on July wheat was placed at $1.85, and on September wheat at $1.65 a bushel. The action relates only to transaction between members of the board and gives them the privilege of "calling" one another for margins in addition to the regular 10 per cent, so that if July wheat sells for $2 the buyer puts up the regular margin of 10 per cent, or 20c, and in addition the extra margin of 15c, the difference between the marginal price set of $1.85 and the selling price of $2.

RED CROSS SUM TOTALS $1319.64

Great Response Shown to Flag Day by Wacoans.

A great response to Red Cross flag day on the part of Wacoans yesterday is shown by the fact that $1,319.64 was realized from the sale of flags—tag day sales and new members.

Mrs. Howard Mann was general chairman, with lieutenants and coworkers. The flag sellers were everywhere met cheerfully and the Red Cross insignias were on hundreds of coat lapels before noon.

"It was the finest response I ever saw and the ones who were selling the flags were met with smiles and encouraging remarks everywhere," said Mrs. R. S. Lazenby last night.

The money secured will be used in pushing the work of the parent Red Cross organization. President W. W. Seley of the local Red Cross was delighted with the outcome.

NATION WIDE CAMPAIGN.

By Associated Press.

Washington, April 21.—A nation wide campaign for funds with which to support the war relief work of the American Red Cross was planned here today at a conference ofauthorities on organization and finance called by President Wilson who is president of the society.

The campaign will probably end with a special Red Cross day some time next month to be disgnated by presidential proclamation.

WAXAHACHIE ORGANIZES.

Special to the News

Waxahachie, April 21.—A Red Cross chapter has been organized here with an enlistment of fifty-five men and women. Dr. Gilcrest of Dallas addressed the association.

SECOND TRIP PLANNED

Accessory Men to Point Machines Toward Belton.

Another big one-day excursion and visit to towns in the Waco section will be staged next Thursday by the Waco Auto and Accessory Dealers' association. The trip will outclass the one recently made, successful as it was, from pledges already secured, it was stated yesterday afternoon by John B. Fisher of the committee having the trip in charge. This committee is composed of Harry Smith as chairman, with John B. Fisher and Moore Hays as members.

The trip will be made by auto, headed by the Baylor band. Dinner will be taken at Rosebud. Stops will be made at all places named on the itinerary. The Texas Company, through J. C. Killgore, has agreed to donate free of charge the gasoline used by cars making the trip, and the start will be made from that point. The itinerary follows:

Leave Waco 8 a. m., Killgore's garage, Seventh and Franklin; arrive Riesel 8:30, leave Riesel 8:45; arrive Perry 9, leave Perry 9:10; arrive Marlin 9:40, leave Marlin 10:10; arrive Lott 10:50, leave Lott 11:10; arrive Travis 11:30, leave Travis 11:35; arrive Rosebud 11:55 (dinner), leave Rosebud 1 p. m.; arrive Rogers 1:55, leave Rogers 2:10; arrive Heidenheimer 2:35, leave Heidenheimer 2:55; arrive Temple 3:20 (parade the city, business part), leave Temple 4; arrive Belton 4:25, leave Belton 4:50; arrive Troy (via Temple) 5:50; leave Troy 6; arrive Waco 7:30.

PROHIBITION AND SUFFRAGE

By Associated Press.

Lincoln, Neb., April 21.—Governor Neville tonight signed the bill giving effect to the prohibition amendment and the one allowing women partial suffrage.

Seize Private Radio Plans at Springfield

By Associated Press.

Springfield, Mo., April 21.—Two privately owned radio plants here were seized today by United States Marshal William Brown and their owners arrested, it was announced tonight. One station was said to have been equipped with high power and was located in the business district. Marshal Brown refused to make a statement regarding the owners.

State Oratorical Contest Goes to State University

Special to the News

Waxahachie, April 21.—In the state oratorical contest here, Gorman Day, representing the State University, won. T. C. U. came second and Daniel Baker college third. Tom Finley, W. M. Atwell and Dr. Groner were judges.

Governors Asked to Send Representative to Capital

By Associated Press.

Washington, April 21.—Governors of all states were asked by the council of national defense today to send representatives to Washington May 2 for a conference on matters of state co-operation in the conduct of the war. Military affairs and the food situation will be the most important questions taken up.

FIRST WAR BILL OVERSUBSCRIBED

Letters to Purchase Bonds Pour Into Washington.

By Associated Press.

Washington, April 21.—The first American offering of war securities in any form $200,000,000 in treasury certificates have been heavily oversubscribed.

How great the oversubscription is officials were unable to say tonight, as many of the banks before which the offer had been placed informally through the federal reserve board had not been heard from.

The certificates were offered only to financial institutions. The response, officials believe, presages a patriotic outpouring of funds to an extent unparalleled in the history of any nation when the five billion dollar issue is placed before the general public.

Offering of the certificates was made informally because the seven billion dollar finance measure is not yet a law. As soon as it is disposed of by congress, probably by Wednesday of next week, the formal offer will be made and proceeds of the subscription called for at once.

German Destroyers Tried to Intercept Lloyd-George

By Associated Press

London, April 21.—The Central News says:

"The suggestion has been made that the German destroyers which came to grief in the Straits of Dover last night hoped to bring off a spectacular coup by interrupting Premier Lloyd-George's channel crossing on his return from the continent. It was quite possible the premier would cross last night, though as a matter of fact he did not return until today."

GERMAN CORPS IN U. S.

Expelled from China, Given Safe Passage Here.

By Associated Press

San Francisco, April 21.—Paul von Hinze, former German minister to China, and twenty-seven other members of the diplomatic and consular corps of Germany expelled from China when China broke relations with Germany, arrived here today on their way to Germany. Department of justice agents, with customs inspectors, took charge of the party's baggage, which, it was stated, would be searched. Later the party will go east under safe conduct to take passage on an Atlantic steamer.

Delay Big Ships to Build New Destroyers

By Associated Press.

Washington, April 21.—Navy officials took up today the possibility of turning out quickly a large number of thirty-knot destroyers by delaying construction on the five huge battle cruisers for which contracts already have been let, a decision will be reached next week.

HEINOUS CRIMES MARK WAR LORDS PATH IN EUROPE

Hindenburg Surpasses All Others in Criminality in Belgium.

VON BISSING REBELLED

Quoted as Too Tender, Paid Visit to Berlin, but Was Rebuffed.

By Associated Press

Washington, April 21.—A bitter indictment of German brutality in the deportation of conquered Belgians for forced labor, written from behind the German lines by Brand Whitlock, the American minister to Belgium, was made public tonight by the state department. It came in a confidential report last January when the United States was vainly protesting to the Berlin government against the treatment of the helpless people, but the department did not dare publish it at that time or until Mr. Whitlock was safe on French soil.

The report begins with a story of what happened immediately after the German army overran Belgium, or arrangements by the Belgian government to continue the wages of civilians thrown out of work and of the conquerors' determination to put these men to work for them.

Hindenburg the Brute.

"In August, Von Hindenburg was appointed to the supreme command," says the report. "He is said to have criticised Von Bissing's policy as too mild; there was a quarrel; Von Bissing went to Berlin to protest, threatened to resign, but did not. He returned and a German official here said that Belgium would now be subject to a more terrible regime.

"The deportations began in October in the Etape, at Ghent and at Bruges. The policy spread; the rich industrial districts of Hainaut, the mines and steel works about Charleroi were next attacked. Now they are seizing men at Brabant, despite some indications and even predictions of the civil authorities that the policy was about to be abandoned. As by one of the ironies of life, the winter has been more excessively cold than Belgium has ever known, and while many of those who presented themselves were adequately protected against the cold, many of them were without overcoats.

Tells Appalling Story.

"Appalling stories have been related by the Belgians coming to the legation. It is impossible for us to verify them, first because it is necessary for us to exercise all possible tact in dealing with the subject at all, and secondly because there is no means of communication between the Gebiet and the Elappen Gebiet.

"The well known tendency of sensational reports to exaggerate themselves especially in time of war, and in a situation like that existing here, with no newspapers to serve as daily clearing houses for all the rumors that are as vividly believed as they are eagerly repeated, should of course, be considered, but even if a modicum of all that is told is true, there still remains enough to stamp this deed as one of the foulest that history records.

Nothing but Cruelty.

"I am constantly in receipt of reports from all Belgium that tend to bear out the stories one constantly hears of brutality and cruelty. A number of men sent back to Mons are said to be in a dying condition, many of them tubercular. At Malines and at Antwerp returned men have died, their friends asserting that they have been victims of neglect and cruelty, of cold, of exposure, of hunger.

"I have had requests from the burgomasters to ten communes from La Louviere asking that permission be obtained to send to the deported men in Germany packages of food similar to those that are being sent to prisoners of war. Thus far the German authorities have refused to permit this except in special instances, and returning Belgians claim that even when such packages are received, they are used by the camp authorities only as another means of coercing them to sign the agreements to work.

"It is said that in spite of the liberal salary promised those who would sign voluntarily, no money has as yet been received in Belgium from workmen in Germany.

More German Blundering.

"One interesting result of the deportations remains to be noted, a result that once more places in relief

Balfour on Arrival in America Lauds U. S. Nation for Purpose Upon Which Rests War Struggle

"Democracies, Wherever They Are to Be Found, and Not Least the Democracies of the British Empire, Will Hail the Pronouncement as a Happy Eulogy," Says English Minister as He Sets Foot on American Soil for Conference Surpassing Any Similar Event of Century's History for Importance.

By Associated Press.

Washington, April 21.—While unable to grant a regular interview before presenting himself to President Wilson, Mr. Balfour willingly consented to say a few words as to his general hopes for the conference and the fundamental purposes behind it. A verbatim copy follows:

"All will agree that my first duty as head of a diplomatic mission is to pay my respects to the head of the state to which I have been sent; and no public expression of opinion on points of policy would, I think, be useful or even tolerable until I have had the honor of conferring with your president and learning his views. I have not come here to make speeches or indulge in interviews, but to do what I can to make co-operation easy and effective between those who are striving with all their power to bring about a lasting peace by the only means that can secure it—namely a successful war.

"Without, however, violating the rule I have laid down, there are two things which I may permit myself to say: One on my own behalf, the other on behalf of my countrymen in general.

Praises Co-operation of American Nation.

"On my own behalf let me express the deep gratification I feel at being connected in any capacity whatever with events which associate our countries in a common effort for a great ideal.

"On behalf of my countrymen let me express our gratitude for all that the citizens of the United States of America have done to mitigate the lot of those who in the allied countries have suffered from the cruelties of the most deliberately cruel of wars. To name no others, the efforts of Mr. Gerard to alleviate the condition of British and other prisoners of war in Germany and the administrative genius which Mr. Hoover has ungrudgingly devoted to relief of the unhappy Belgians and French in the territories still in enemy occupation will never be forgotten; while an inexhaustible stream of charitable effort has supplied medical and nursing skill to the service of the wounded and the sick.

Days of Neutrality Are at an End.

"These are the memorable doings of a beneficent neutrality. But the days of neutrality are at an end; and the first page is being turned in a new chapter in the history of mankind. Your president in a most apt and vivid phrase has proclaimed that the world must be made safe for democracy. Democracies wherever they are to be found and not least the democracies of the British empire will hail the pronouncement as a happy eulogy. That self-governing communities are not to be treated as negligible simply because they are small, because the ruthless domination of one unscrupulous power imperils the future of civilization and the liberties of mankind, are truths of political ethics which the bitter experience of war is burning into the souls of all freedom-loving peoples. That this great people should have thrown themselves whole-heartedly into this mighty struggle, prepared for all the efforts and sacrifices that may be required to win success for this most righteous cause is an event at once so happy and so momentous that only the historian of the future will be able, as I believe, to measure its true proportions.

(Signed) "A. J. BALFOUR."

Berlin Papers Declare U. S. Volunteers Slow

By Associated Press.

Amsterdam, April 21.—The Frankfurter Zeitung in its edition Friday evening printed the following:

"Special telegram: New York, April 18.—Despite the most intense propaganda by the press and by other means, the number of registrations of volunteers for the war has been amazingly small and as a reason Washington has been much disappointed. Congressional opposition against the introduction of compulsory military service has knocked the bottom out of the plan.

"War conditions are beginning to be noticeable in the large cities. Places of amusement close early and night life has been suppressed."

TURKS BREAK WITH U. S.

Sever Diplomatic Relations With Us, Says Cable.

By Associated Press.

London, April 21.—The Turkish government on Friday officially informed the American embassy that diplomatic relations with the United States had been broken off, according to a Berlin dispatch forwarded by Reuter's correspondent at Amsterdam.

American Ambassador Elkus is suffering from typhus fever, the report adds, and will have to remain some time in Constantinople.

CHICAGO SALOONS REGULATED.

By Associated Press.

Chicago, April 21.—A possibility that Mayor Thompson may recommend to the city council that all Chicago saloons be closed as a war measure or that the sale of liquor be limited to certain hours in the day was intimated at a conference between the mayor and Samuel Ettelson, corporation counsel, today. Mr. Ettelson said such authority was given the council in an act of the state legislature in 1887.

GERMANS SCHEME FOR RUSSIAN AID

Secret Service Unearths Plot in Chicago Quarter.

By Associated Press.

Chicago, April 21.—The federal secret service has within the last few days brought to light a gigantic German intrigue intended to disrupt the anti-German entente through the agency of Russo-Americans.

It is charged by men who attended revolutionists' meetings recently held in various parts of the country and who read the Russian publications, that with the news of the revolutions the machinery of the German agents in the United States started full blast.

By meetings, pamphlets and newspapers a vigorous propaganda was instituted setting forth that with the czar and his government in the scrap heap the Russian people should end the war without delay. Russian publications criticized the entrance of the United States into the war and openly published peace appeals. These and other newspapers have been widely circulated among the Russian speaking people of America.

GERMAN SOCIETY LOYAL

40- Organizations in Arkansas Support Government.

By Associated Press

Little Rock, April 21.—Frederick Hotze, of Little Rock, president of the German-American federation of Arkansas, tonight announced that all forty of the affiliated organizations have ratified resolutions proclaiming the loyalty of the members to the United States in the war with Germany.

WAR CONFERENCE BEGINS AT ONCE ON ARMED TRAIN

Train Carrying Corps to Capital Heavily Guarded by Secret Service.

SECRECY IN ARRIVAL

American Committee Meets Englishmen "Somewhere" on the Coast."

By Associated Press.

With the Balfour Party, April 21.—Great Britain's high commissioners to the international war council to begin in Washington next week set foot on American soil today and are now on their way to the capital.

Arthur James Balfour, secretary of state for foreign affairs of the empire, formerly premier and often called the dean of the world's elder statesmen, was the central figure of a party that included some of Great Britain's most prominent men. With a genial smile playing over his features, he consented to a brief interview, warmly expressing his appreciation of all the United States has done as a neutral in charitable and relief work done in Belgium and in German prison camps, his gratification that England and the United States are now allied for a common purpose and his conviction that this country in its war efforts would astound the world, particularly Germany.

The object of the commission, Mr. Balfour said, was "to make co-operation easy and effective between those who are striving with all their power to bring about a lasting peace by the only means that can secure it—namely, a successful war."

Eulogizes Wilson.

"Your president, in a most apparent and vivid phrase," Mr. Balfour added, "has proclaimed that the world must be made safe for democracy; that self governing communities are not to be treated as negligible simply because they are small; that the ruthless domination of one unscrupulous power imperils the future of civilization and mankind are truths of political ethics and the bitter experience of war is burning into the souls of all freedom loving peoples."

England's leading statesmen, having safely evaded the German submarines and mines which sent Lord Kitchener to his death, were received with highest honors as guests of the American people when they arrived at a place in America which cannot be named. A delegation of state, war and navy department officials welcomed the commission.

The commission was received with the utmost simplicity and cordiality and with every recognition of the fact that Great Britain had given of her very best. It is said, indeed, that no foreign minister has left England for the length of time that Mr. Balfour will be away, since the congress of Vienna a century ago.

After Five Days' Wait.

The formal welcome was extended by Third Assistant Secretary of State Mr. Long, through the presentation to Mr. Balfour of a letter of greetings from Secretary Lansing, which the British statesman acknowledged with equal simplicity while British and American officials mingled.

A special train which had been waiting five days at once got under way for the capital, guarded as almost no other train has ever been guarded in this country. Protection had been afforded at all bridges and tunnels.

When the train started, the large party broke up into groups of army, navy and state department officials to begin at once the informal conversations which are expected to sketch out America's part in the world war. Mr. Balfour and Mr. Long, Lieut. Gen. T. L. Bridges, who drew the first blood for England in August, 1914, and Major General Wood, and Rear Admiral Sir Dudley de Chair and Rear Admiral Fletcher were soon in deep conversation.

Secretary Balfour, a tall, slim, white-haired man of 69 years, who has held the highest posts in the empire since he first entered parliament forty-three years ago, saw today the completion of one of his life hopes expressed under vastly different circumstances on January 15, 1896, when he was largely instrumental in averting war between England and America over the Venezuela dispute.

"It cannot but be," he said, "that those whose roots go down into the same past as ours, who share our lan-

guage, our literature, our laws, our religion, everything that makes a nation great; it cannot but be that a time will come when they will feel that they and we have a common duty to perform, a common office to fulfill among the nations of the world."

Those that will be entertained with the foreign minister at the residence are: Sir Erie Drummond, Ian Malcolm, M. P.; C. F. J. Dormer, Geoffrey Butler, Rear Admiral Sir Dudley R. S. de Chair, Fleet Paymaster Gen. Vincent A. Lawford, Maj. Gen. G. T. M. Bridges, Capt. H. H. Spender-Clay, member of parliament, and Lord Cunliffe, of Headley, governor of the Bank of England.

Others with the commission, who have been assigned to quarters at a downtown hotel, are: Maj. L. W. B. Brees, royal flying corps; Maj. C. E. Dansy, war office; Lord Eustace Percy and A. A. Patton, of the foreign office; F. P. Robinson, S. McKenna, M. D. Peterson, Col. Heron, Major Puckle, Colonel Goodwin, Colonel Langhorne, Captain Leeming and Mr. Amos.

Hugh Gibson, formerly first secretary of the American embassy in London, now of the state department staff, has been detailed to serve as aide to Mr. Balfour during his visit. Capt. George Quekemeyer, U. S. A., formerly assistant military attache, has been assigned as aide to General Bridges.

HEINOUS CRIMES MARK WAR LORDS PATH IN EUROPE

CONTINUED FROM PAGE ONE.

the German capacity for blundering almost as great as German capacity for cruelty.

"They have dealt a mortal blow to any prospect they may ever have had of being tolerated by the population of Flanders; in tearing away from nearly every humble home in the land a husband and a father or a son and brother, they have lighted a fire of hatred that will never go out; they have brought home to every heart in the land in a way that will impress its horror indelibly on the memory of three generations a realization of what German methods mean, not as with the early atrocities in the heat of passion and the first lust of war, but by one of their deeds that make one despair of the future of the human race, a deed coldly planned, studiously matured and deliberately and systematically executed—a deed so cruel that German soldiers are said to have wept in its execution and so monstrous that even German officers are now said to be ashamed."

State Fire Commission Gives Out Statistics

By Associated Press.

Austin, April 21.—The state fire insurance commission today announced the combined classification totals for Texas, for all fire insurance companies doing business in Texas for the calendar year ending December 31, 1916. This statement shows total liabilities assumed by these companies to be $1,015,415,313; premiums, $10,935,581; losses adjusted, $9,760,845; number of fires reported during the year, 17,499; average rate, 1.072; burning rate, .958; loss ratio, .893; average loss, $508.36. This classification consists of seventy-five various kinds of risks. There are about 122 fire insurance companies doing business in Texas.

Funeral of Archbishop to Be Held Thursday

By Associated Press.

New Orleans, April 21.—The funeral of Archbishop James H. Blenk, of New Orleans, who died here last night, will be held next Tuesday morning at 10 o'clock instead of Wednesday, as announced earlier in the day. The ceremonies will be held in St. Joseph's church.

Houston Woman Suicides by Leaping Into Lake

By Associated Press.

Chicago, April 21.—Mrs. Bertha Haft, 34 years old, killed herself today by leaping into Lake Michigan. She had been ill for some months. Prior to her marriage in 1904, Mrs. Haft lived in Houston, Texas.

Relief Ship Kingsli Not Sunk, Says Report

By Associated Press.

London, April 22.—A dispatch from Ymuiden says it has been ascertained that the relief ship Kingsli has not been sunk, but is being towed into port.

RUSSIA WEAK LINK IN CHAIN.

By Associated Press.

Boston, April 21.—Russia was called the weakling in the entente allied chain, in an address by ormer President Taft before the Insurance society of Massachusetts tonight.

"There is a weakness among the allies, which ought to give us grave concern," he said. "We were glad when we heard the czar had toppled and had become plain Mr. Romanoff, but you cannot have a grave political change like the Russian revolution without that change producing demoralization and it takes time to reorganize an effective government."

T. R. HITS LIQUOR TRADE

Would Limit Amount of Grain Used in Brew.

By Associated Press.

Mineola, N. Y., April 21.—In an address before the Long Island food reserve battalion and the Nassau county farm bureau here today, Col. Theodore Roosevelt advocated that steps be taken at once to limit the amount of grain being used throughout the country for the brewing and distillation of intoxicating liquors. He advised also that the use of automobiles for joy riding so that the nation's supply of gasoline can be conserved for war purposes and that the government in case of food shortage mobilize and conscript men for tilling the soil.

Officers of Reserve Corps Will Be Called to Duty

By Associated Press.

Washington, April 21.—Line officers of the reserve corps will be called for duty at the fourteen training camps which will be opened May 8 for instruction and will be put on the same status as regular army officers with respect to allowances. Every applicant who has been examined and recommended for appointment will be commissioned in due time unless some vital defect prevents and will receive pay and allowances, according to his grade.

The statement was authorized by the war department today for the purpose of clearing up an apparent misunderstanding with reference to the war department's plans for pay and treatment of the reserve corps officers.

Report of Twenty-nine State Savings Banks

By Associated Press.

Austin, Tex., April 21.—Resources of the savings departments of the twenty-nine state banks in Texas maintaining such departments, at the close of business March 31, 1917, amounted to $5,078,834, according to a statement of the financial conditions of these banks. Of the resources, $3,923,262 is first liens on real estate; $173,611 in various kinds of bonds, and $780,156 in currency. Of the liabilities, $5,032,271 is due to depositors which is also the total amount of savings deposits. The required cash reserve is $729,230, while the actual cash reserve is $925,131, this being $195,901 in excess of the legal requirements.

VACATION FOR LAW MAKERS.

By Associated Press.

Austin, April 21.—Neither branch of the legislature was in session today, adjournment having been taken until next Monday morning at 10 o'clock. Many of the members went to San Antonio for the fiesta.

GOVERNOR RETURNS TO AUSTIN.

By Associated Press.

Austin, April 21.—Governor Ferguson returned today from San Antonio where he has been participating in the fiesta celebration. The state departments were closed today on account of San Jacinto day, which is a legal holiday.

DANDRUFF GOES! HAIR GETS THICK, WAVY, BEAUTIFUL

SAVE YOUR HAIR! DOUBLE ITS BEAUTY IN A FEW MOMENTS. TRY THIS!

HAIR STOPS COMING OUT AND EVERY PARTICLE OF DANDRUFF DISAPPEARS.

Try as you will, after an application of Danderine, you cannot find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most, will be after a few week's use, when you see new hair, fine and downy at first—yes—but really new hair—growing all over the scalp.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is immediate and amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance, the beauty and shimmer of true hair health.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all.

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

"HIGH SCHOOL CAPS"

Boys, we have received a new shipment of High School Caps in colors.

We Loan Kodaks.

TO BREAK WITH GERMANY.

By Associated Press.

Buenos Aires, April 21.—El Diaro says that the government probably will break off relations with the German minister tomorrow, as there is no hope of obtaining satisfactory explanations or indemnification for the sinking of the Monte Protegido.

It adds that Argentina will then join with the nations fighting for liberty, civilization and democracy.

The newspapers say the note sent to Germany in protest against the sinking of the Monte Protegido contains terms which will cause a rupture between the two countries.

Flag Raising Program Was Well Attended

The flag raising program of the Y. M. C. A. boys' camp yesterday was attended by a large number of the boys and their parents. After the flag raising program, which consisted of talks by Mrs. W. L. Crosthwait, Harrison Carroll and the singing of several national songs, the supper was spread on the porch of the club house and as one of the boys well expressed it, "sure was some eats."

Illinois Strike Settled; Men Will Return Monday

Springfield, Ill., April 21.—Striking motor drivers in five mines at Nokomis, Witt and Kincaid, who threw two thousand miners out of work when they quit Friday, will return to their jobs Monday, it was announced tonight by Frank Farrington, president of the United Mine Workers of Illinois.

Meeting of Protestation Held in Buenos Aaires

By Associated Press.

Buenos Aires, April 21.—The police have taken precautionary measure in view of a great meeting which is to be held tomorrow against threats that have been made by adherents of Germany. The meeting, it is said, will protest against the violations of rights of nations by the Germans in sinking steamers; it will express sympathy and harmony with the attitude of the United States and Brazil, sympathy with the allies and rejoicing at the triumph of the Russian revolution.

NEW SEASON FASHIONS IN
Women's Pumps

As Pumps are to be greatly favored as the correct footwear for summer use, we are now ready to show more and prettier styles than ever before.

Many little touches of exclusiveness are to be seen in our new styles, such as smart stitching, dainty perforations, either in severely plain, beaded, or ornamented styles; the Mahogany Brown Kid, Dark Tan, Russia, Pearl Gray Kid, Black Glazed Kid are smart pump styles.

Priced at $5.00 And Upward.

DAVENPORT TAKES MILLS.

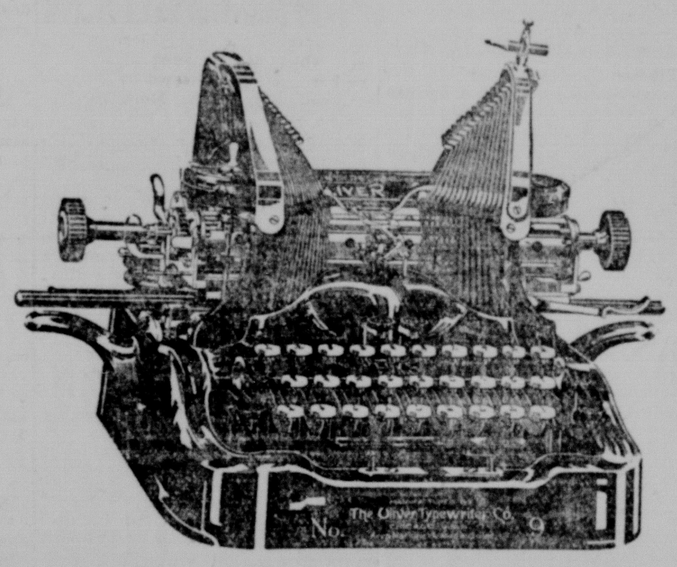

London, April 21.—Baron Davenport, the food controller, today issued an order to take over all flour mills in the united kingdom April 30 by his department.

Sign the Coupon Today Which Will Bring You Oliver 9 for Free Trial!

WAS FORMERLY $100.00
—IS NOW ONLY $49.00

We have eliminated waste from our selling plan—and our patrons are given the $51 saved.

Thousands of branches have been eliminated and thousands of salesmen dispensed with.

In the Present National Crisis Waste Elimination is Urged As a Patriotic Duty—

—Typewriters are necessities, not luxuries. But the ordinary methods of selling and distributing them IS a LUXURY AND WORSE. It is a downright waste of $51 in every $100 you pay.

The Oliver proposes to revolutionize the typewriter business.

This is the time when American industries must prepare for the end of the war. New economic adjustments are inevitable.

So we announce here what Oliver proposes to do.

Henceforth there will be no expensive sales force of 15,000 salesmen and agents. No high office rents in 50 cities. No idle stocks.

TEXAS DISTRIBUTION

The Oliver is represented in Texas, Arizona and in all of Latin America by Wm. A. Parker, whose organization and service offices distribute Olivers in a territorial area equal to about half the world.

The Oliver is absolutely guaranteed for life and the service of the Parker organization is free to Oliver users.

You get a new Oliver for $49 because you buy it yourself. We can't afford to SELL it to you at the new low price. You keep the machine for five days, with no slick agents to worry or influence you. You are your own salesman and the selling expense of $51 is what you save. After a five-day free trial if you are not convinced that the Oliver is the best typewriter in the world, for any class of work that can be done on a writing machine—if you don't consider it the best machine, even at $100, the price at which over 600,000 Olivers have already been sold, just return the machine at our expense. If the Oliver sells itself to you, the price is $49 f. o. b. the factory, the conditions of payment being about the same as second-hand machines formerly rented for.

We Let The Oliver Sell Itself to You —Instead of Paying a Salesman

THE USUAL SITUATION

On each typewriter for which the user pays $100, more than half has been spent for salaries, traveling expenses and commissions to an army of salesmen and agents.

Thousands of dollars have been spent in maintaining expensive branch houses and show rooms in many cities.

Our new plan now saves all this useless waste and brings the typewriter business down to a rock bottom basis.

This Price Reduction Is on the Latest Model Oliver

This Oliver Nine is a twenty-year development. It is the finest, the costliest, the most successful model we have ever built.

More than that, it is the best typewriter, in fifty ways, that anybody ever turned out. If any typewriter in the world is worth $100, it is this Oliver Nine.

It is the same commercial machine purchased by the United States Steel Corporation, the Standard Oil Company, the National City Bank of New York, Montgoery Ward & Co., the National Biscuit Company, the Pennsylvania Railroad and other leading businesses. Over 600,000 are in daily use.

Ours is a proposal to sell new Oliver Typewriters for one-half their former cost. We do it wholly through elimination of salesmen's and agents' excessive commissions.

REPORT BRAZIL STEAMER SUNK

Not Confirmed, However. Little Disorders Reported.

By Associated Press.

Rio Janeiro, April 21.—A report is current that the Brazilian steamer Belem has been torpedoed by a German submarine, but this is without confirmation.

With the exception of Porto Alegro, where there have been strikes and anti-German demonstrations, and Rio Claro, where some disorders of little importance occurred, the manifestations have been simply a protest against the torpedoing of the steamer Parana. At present order has been re-established everywhere. It is impossible to conceal the fact that the smallest event would cause an outburst.

The delay in the departure of the German minister, Herr Pauli, and the German consuls is attributed to various causes, particularly the refusal of Germany to guarantee the safety of the steamer Rio Janeiro, which was placed by the Brazilian government at the disposal of the German officials. It was rumored tonight that Herr Pauli would go to Chile.

The situation with regard to the German ships in Brazilian ports is unchanged, but it is hoped that the government will not delay in proceeding with their definite seizure.

CHANGE IN MARRIAGE LAW.

By Associated Press.

Paris, April 21.—A foreign women married to a French citizen will not hereafter automatically acquire French citizenship by that fact. A law just promulgated provides that the assent of the French government must be obtained before marriage if it is desired that the wife acquire French nationality.

COLONIAL SHIPS ACTIVE.

By Associated Press.

Melbourne, Australia, April 21.—The Australian battle cruiser Australia and the sister cruisers, Melbourne, Sydney and Brisbane are all in service with the British main war fleets, as are also the destroyers Warrego, Yarra, Parramatta, Swan, Torrens and Huon. Thanks to the destroyers Australian transports have been able to travel safely.

SKILLFUL SIEGE BY FRENCH ARMY NETS BIG GAIN

Thousands of Prisoners Captured When Hundreds of Thousands of Men Battle.

By Associated Press.

On the French Front in France, April 20.—Pressing steadily here, storming with great dash there, defeating terrific German attacks and taking thousands of prisoners, the French carried their victorious forward movement further today along the entire front from Soissons to Auberive. Hundreds of thousands of men face each other in this latest battle, wherein skillful attack is met by desperate defense.

As the Associated Press correspondent today observed a section of the battle from the ridge upon which runs Chemin Des Dames road, branching eastward from the great Maubeuge road, about four miles northward of Vailly and parallel with the Aisne river, batches each of a hundred prisoners marched toward the rear across the fields and along the roads to augment the 10,000 already officially counted since the engagement began Monday.

Ambulance Section.

The fact that an entire German ambulance section, together with its doctors, was taken in one haul of prisoners demonstrates the rapidity of the action of the French troops as these sections always operate behind the first fighting line. One French company got so far forward that it cut off and captured the entire German battery, which had limbered up with all the horse teams harnessed to the guns in readiness to retire. More than 100 cannon, some of them as heavy as any taken heretofore, have been captured and many have been destroyed or buried.

Today for the first time since the French moved from their lines to attack, the sun shone and the brilliance of the weather was reflected on the faces of the troops who were filled with delight over the change from trench warfare. The men sang in their bivouacs and marched with a confident swing when ordered forward. The French artillery fire constituted one continuous roll all along the front and the Germans replied heavily, but their guns were forced steadily back until the position of the Chemin Des Dames ridge gave the occupants excellent positions for observance. The Germans fought desperately to attain their ground, but could not stand such a pounding.

Everything as Clockwork.

The method and care shown by the French plans strikes the observer. Everything goes like clockwork. Every man and gun is in the proper place at the right moment. Even in the rear of the lines, the same systematic thoroughness has been developed. Should a supply column meet an obstruction on the road toward the front, a smart officer immediately appears on the scene and in a few moments all is in order. This means much when it is understood that the road must be made swiftly across fields where no road existed before and in territory torn during the previous fighting.

How heavy artillery is brought forward under such conditions is a puzzle, but all the difficulties are overcome and they reach their positions at the effective moment. The broken character of the country adds to the difficulty of the French attack of approaching and capturing the German positions which oftentimes are in natural caverns or quarries easily defensible and in addition to the heavy artillery are armed with perfect hornets' nests of machine guns, [illegible]

Deny Mexico Intends Taking Over Oil Wells

By Associated Press.

Mexico City, April 21.—Alberto Pani, secretary of commerce and industry, today denied that the Mexican government had any intention of taking over the oil wells belonging to the Cowdray interests or the oil properties of any other foreigners.

PEACE LEAGUE IS IMPOSSIBLE

So Says Speaker at American Academy Meeting.

By Associated Press.

Philadelphia, April 21.—James M. Beck, formerly assistant attorney general of the United States, addressing the closing session tonight of the American Academy of Political and Social Science, declared that any league to enforce peace is futile because any such alliance of nations sooner or later would tend to break up into groups and the result would be worse than a dispute solely between two nations.

The general topic of tonight's session presided over by United States Senator John Sharpe Williams of Mississippi, was "America's participation in a league for the maintenance of a just and durable peace."

Quoting statistics to show that only one out of every 20,000 men military effected in the United States had offered his service to the country since President Wilson's request to congress to declare the existence of a state of war, Mr. Beck termed as academic America's interest in the world's greatest war.

GETTING AROUND EMBARGO.

By Associated Press.

Madrid, April 21.—With the embargo on the shipment of arms and ammunition from the United States to Mexico, an ingenious plan recently has been brought to light for the shipment of such munitions of war from the United States to Europe, and their trans-shipment from Europe to Mexico. By this roundabout route the arms could get to Mexico without crossing the United States-Mexican border, where they would have been detained by American customs officers.

The plan has required a system of agents, acting in Mexico, the United States, England and Spain, the route designed for the shipments being from the United States to England, from England to Spain, and from Spain by one of the steamer lines operating to Central and South American ports, to one of the Atlantic ports of Mexico. Whether any shipments via England and Spain actually got through is not known, as the plan was disclosed and checked when the London link in the roundabout chain got into difficulties over the use of code messages dealing with the shipments.

In the course of the inquiry, the attention of the British military censors was attracted to several cablegrams from Mexican military officials. These did not appear on their face to deal with orders for arms, words being used to take the place of arms and ammunitions. While the exact words of the code were not known, the message from Mexico ran something like this:

"Send 200 cases apples and 5,000 rounds potatoes."

When the receiver of the dispatches was interrogated by the authorities, he stated the shipments referred to arms, intended to be brought from the United States to England, then shipped to Sjain, and thence to Mexico. The transaction was stopped as involving an irregular use of code messages. The question of the shipment of arms did not arise, as shipment to Mexico did not at the time appear to have any bearing on the European war. Incidentally, however, it disclosed the roundabout route from the United States to Mexico via England and Spain, but gave no indication as to how far the route had been put to use outside of the transaction stopped by suspicion of the code telegrams.

GERMANS WERE SLOW.

Peking, April 21.—Although China sent its note of protest against the German submarine campaign on February 9, the German legation in Peking did not submit a reply to the Chinese foreign office until after the lower house of parliament had voted to sever diplomatic relations and the senate was about to vote on the same question.

The German minister is supposed to have received a prompt reply from his home government, but is supposed to have held it from the Chinese in the hope of delaying action on the part of the Chinese government. Germany's reply was a courteous denial of China's request for a modification of the submarine campaign, and sought to establish negotiations between the two countries on the question.

Germans in China realized a break between their country and China was inevitable, and resorted to every possible means of forcing delay. The presentation of the note just before the senate voted on the severance of relations had but little effect on the senate. Official copies of the note were placed in the hands of each senator by German agents, but did not prevent the senate from following the house in its overwhelming indorsement of the cabinet's decision to sever diplomatic relations.

Few men care to be as good or as bad as they are said to be.

SMASHING GUN FIRE ON FRENCH FRONT SATURDAY

Germans Incessantly Harried Night and Day by Infantrymen.

By Associated Press.

Headquarters of the French Army, April 21 (Evening.)—Smashing artillery duels marked today's fighting all along the front from Craonne pleature to Auberive, interspersed here and there with a few drives by French infantry. Night and day the Germans were incessantly harried.

The positions carried by the French have been reorganized and in places further extensions have been made. Nowhere did the Germans succeed in retaking any point. Hurtebis, where the French are solidly astride the Chemin Des Dames, which gives to them the opportunity of reaching Laon plateau was the point where the Germans today directed their strongest effort to eject them but in vain.

The clearing up of the reconquered ground behind the advancing front waves is extremely perilous owing to the presence of small bodies of Germans in farms, valleys and woods who do not realize that they are entirely cut off and continue to fight in the hope of relief. Some of these were brought in today.

Atmospherical conditions have again turned in favor of the Germans, heavy mists hindering French observation. The French generals are sparing their men as much as possible; they never send them forward until the objective has been subjected to a terrific bombardment, calculated to paralyze the occupants. The advances have thus been carried out with comparatively small losses.

SWEDEN'S "WAR BABIES."

Stockholm, Sweden, April 21.—Of all the "war babies" in Sweden—and there are a good many of all kinds—the fattest continue to be the shipping companies. The earnings of some compare very favorably with the best that America has to show in the line of industries fostered by the war.

One shipping company, with a capital of 125,000 crowns, has declared two dividends of 100 per cent each, and still another hundred in the form of one free share of stock for every old one. Its earnings for 1916 were 757,000 crowns, against 194,500 in 1915. Other shipping companies have paid dividends of 20 to 200 per cent.

MOUNTAINS AS MAGAZINES.

By Associated Press.

Berne, Switzerland, April 21.—Switzerland has decided to use some of its mountains for other purposes than attracting the tourists who no longer come. The Bundesrat has decided to construct in one of the huge piles of stone near Altdorf a magazine for ammunition.

IT WORKS WELL

A Combination That Is Doing an Immense Amount of Good This Spring.

A superlative blood-purifying medicine like Hood's Sarsaparilla, taken before meals, combined with a superlative iron tonic like Peptiron Pills, taken after meals—makes the ideal course of Spring Medicine.

No other medicines possess such curative properties as these two great restoratives working together.

They reacn the impure, impoverished, poisoned, devitalized blood, and the worn, run-down, overworked, exhausted system. They awaken the appetite, aid digestion, purify and vitalize the blood, give renewed strength to the whole body, produce sound, natural sleep, and a complete restoration to good health—the greatest of all earthly blessings. It is said that $2 invested in these two medicines will bring better results than $4 spent in other treatment.

It will be wise to get Hood's Sarsaparilla and Peptiron Pills today.

JAPAN AND THE REVOLT.

By Associated Press.

Tokio, April 21.—What effect the Russian revolution will have on the people of Japan is a question which is seriously occupying the leaders of this country. The question is one of special significance at this time because the constitutional rights of parliament constitute the great issue of the new elections which will be held on April 20.

There are no indications here of the existence of a revolutionary movement nor does the representative men of the empire believe that one is in any way probable. The only question is how far the Russian overthrow will affect the political thought of the masses of the people and whether the ease with which the Russian revolution was brought about will not lead the Japanese to seek an extension of their political rights. Not a revolution but a more insistent evolution is believed to be within the range of possibility.

The general impression here is that the revolution in Russia will have a considerable effect on the forthcoming Japanese election. All the newspapers commented lengthily on the Russian situation and some of them referred to its influence on Japan.

The Osaka Mainichi declared that, though it was well nigh impossible to expect that a similar outbreak could in Japan, statesmen like the premier, Count Terauchi, "who was inclined to force his own will in state administration in the teeth of public opinion" should take to heart what had happened in Russia.

The Yorodzu also warned what it called "the powers that be" and declared guardedly that the wrath directed against the reactionaries behind the Russian throne should serve as a warning to "any political pontiff who might be tempted to disregard the will of the people."

What form a popular progressist movement would take in this country is hard to foresee, but its first manifestations would presumably be a demand for an extension of the franchise which is now extremely limited, considering the population of the empire. In a recent interview with the Associated Press, Yukio Ozaki, Japan's greatest progressive leader, claimed that the franchise had not been extended because there had been no pressing popular demand. Mr. Ozaki was particularly severe in his arraignment of the genro, or elder statesmen. He declared that they had no constitutional right of existence and that they constantly interfered in the government without any responsibility whatsoever.

Some people are entitled to nothing, and get it.

Summer Comfort for Everyone

Is Brought by the Breath of the

THE G. E. ELECTRIC FAN

Did you ever think how much time, thought and effort people spend in trying to keep cool in summer? Many "morning grouches" in summer are traceable to sleepless nights, in hot, "sticky" weather. Mental Efficiency is largely a matter of physical comfort. And you CAN be comfortable at little expense.

For Less Than 1c Per Hour G-E Electric Fans will Bring

—Pleasure to the Home In the bedroom, in the living room, the dining room and kitchen, the G-E Electric Fan will prove its worth every day in the year. The cool, comfort they bring makes the home more attractive, both to members of the family and guests.

—Trade to the Store All people, quite naturally, trade at the stores, eat at the restaurants and attend the theatres which cater to their comfort. In the summer no one thing is a greater trade getter than the cool breezes generated by G-E Electric Fans.

—Efficiency to the Office The efficiency of the office force is increased in large measure by making every one cool and comfortable. The "boss" is better tempered, the office boy makes fewer mistakes and everyone is more efficient.

ITALIAN ARMY IN MACEDONIA MODEL FOR U. S.

So Says Herbert Corey in Discussing Personnel of Big Battalions.

By Herbert Corey.

New York, April 21.—It would pay American army authorities—pay in dollars and cents and maybe in more important measures of value later on—to make a careful examination of the organization of the Italian army in Macedonia before completing the work of organizing our own new army.

It is only a small army, that Italian army in Macedonia. Only 42,000 men in all. It may be a picked army. I don't know. Perhaps General Cadorna thought he would show his allies just what the Italian can do when he really puts his mind to it, and picked out Macedonia as the show ground. Perhaps the Italian army as a whole is not on the same plane of efficiency with the army in Macedonia, although every observer speaks of it with admiration. But I am sure of one thing.

That little Italian army in Macedonia in the matter of organization and equipment is worth examining by the chief of any army in the world. It is a sort of working model of military perfection. By comparison the British equipment seems cumbersome and lavish and the French rather hit-or-miss. The Russian seems only good natured and pitiful. Even the German organization of 1915, before it had been tarnished by war, was not the equal of this little Italian army in these matters:

Transportation.
Man comfort.
Camp cookery and diet.
Sanitation.

Mosquitoes in Macedonia.

Those four items are about as important to an army as machine guns or trench mortars. It may be assumed that in the matter of sanitation the American army will be right at the top of the tree. In Macedonia last year the French and British forces lost approximately fifty per cent of their effectives because of malaria. It is hoped this year's losses will be nowhere near as great. During the last twelve months the allied army surgeons have discovered the American discoveries about mosquitoes and are beginning to guard against and treat malaria on the American plan. Meanwhile, nowhere in the press has yet appeared an indication that the American army chiefs are to take a leaf out of the Italian book.

"It might be worth while, though," said Colonel Bodrero, commandante del presidio at Salonica. "We are rather proud of our organization, even if lots of people do think that we are just a nation of opera singers."

It would be hard to find a more important department in an army than that of transportation. Some gross-minded general once said that an enemy traveled on its belly, referring thereby to the daily need of food. But before the army can be fed the bread must be hauled to it. The most superb experiments in transportation the world has ever seen have been made in Europe. It will be interesting to learn what our general staff knows about them. Our military attaches abroad have worked hard, but the staff has been short of officers to digest and collate the material furnished.

"We began to study the transportation problem five years ago," said the officer in command of the automobile division of the Italian army in Macedonia.

Italians Have Small Trucks.

The French and English armies are served by huge lorries, carrying from a ton and a half to five tons net load. On the hard and level roads of France these great trucks are perfectly adapted to their purpose. But when the road ceases to be hard and level, as in Macedonia and in some parts of France, the big truck falls upon unhappy days. The Italians use a short coupled truck, with a forty-horsepower high speed motor geared very low. That truck can negotiate any turn and climb almost any hill. The top load is a ton and a half.

"We took over part of the Italian front on the Vardar," an English officer told me. "For four days our men were without food because our big trucks could not swim through the mud and crawl up the hills. So the Italians loaded their own trucks with food and came to our aid."

The whole superiority of the Italian truck is in the short coupling and the low-geared high-speed motor. The result is that the small Italian motor fleet designed to serve an army of 42,000 men often helps out of holes the motor fleet designed to serve the remainder of an army of 450,000 men. It is the old story of efficiency fitted close down to its job. The light Italian trucks carry no extra weight and have excess power. They have excellent repair stations along their routes and at Salonica—a repair car will start on signal within ten minutes—but in this they are not superior to the French and British. The Italian motors, of course, are all standardized.

And the Mississippi Mule.

It isn't only in military motors the Italians lead the world. They also beat creation with military mules. Not that the Italian mule is any better than any other mule. A great many Italian mules, in fact, own the Mississippi valley as their place of origin. But the Italian handles his mules on a theory quite unlike either the French or British. The latter regard the mule as a machine. When the machine wears out or breaks it is regrettable, but theo nly thing to do is to send in a new machine. The Italian holds that a mule is a mule. To keep a mule sunny and efficient he must be fed. Therefore the first load the mules carry to a new position is always—or almost always—fodder. The second load is shells. The Italian mules and horses are plump and stout, whereas the other allied mules in Macedonia last winter were plumb regrettable.

"I have proved it out," said an Italian mule master to me. "We have been able to get a greater weight of ammunition to the front per mule per month than either the French of British have."

All the European armies use the one-horse cart for ordinary transportation. In case of emergency more horses are attached. I have seen one-horse carts being dragged by ten horses and the ten horses stopped every fifty feet to rest, at that. If we hold to our good old six-mule wagons when—and if—and American army goes to France we will earn a lot of unpopularity on the roads. The good old army wagon is all right on the Arizona desert, but it doesn't function on a muddy European mountain road.

U. S. ARMY HAS ONE WARPLANE TO DEPEND ON

Hundreds of Them Needed With Motors Better Than Any Made Yet.

By Herbert Corey.

New York, April 21.—No single item of equipment will be more needed by an American army fighting in Europe than war planes. The reconnaissance planes are the eyes of the army. They cannot stay in the air unless protected by the fighting planes. Neither French nor British have planes enough to lend us. They need all they have.

There is but one war plane in the United States. It is on Governor's island, and was borrowed.

"We can make planes," I said to a French flier in Paris. "Plenty of them. Just as good planes as any nation can make."

"How about your motors?" he asked.

The war plane that cannot fly at 125 to 135 miles an hour is outclassed nowadays. The Sopwith and the new Nieuport and the Fokker fly at that speed. It adds to their safety. A cannon is a clumsy weapon with which to gun for birds that whiz through mile-high space at 176 feet a second. The speed depends entirely on the motor.

Europe motors are better than American motors.

That statement is made by so reliable an authority as Orville Wright. "American manufacturers," said he, "are somewhat behind Europeans in making motors simply because we have not had the opportunities for experiment. Making thousands of motors for war purposes, European manufacturers have naturally produced motors that are superior to ours."

American manufacturers have nine months in which to turn out real war planes and war plane motors. It takes nine months in the French school to make a greenhorn competent to fly and fight. While the youngsters are learning and the motors are making we might equip a few escadrilles with experienced American fliers. But they must be mounted on European machines.

Air Fighters Are Trick Fliers Nowadays.

Early in the war the fighting planes were huge affairs. There was even a triplane that flew over Paris carrying seven men and two three-inch guns. But as the men learned how to fight in the air size was reduced and speed increased. The fighting planes are tiny affairs now. The best carry only one man and one gun, but they can climb 10,000 feet in ten minutes.

The fighting fliers' job is to keep the enemy out of the air. Then the slow, easy going, reliable old reconnaissance "buggies" go up, each carrying an observer and a pilot and two machine guns in addition to a huge camera. They are exposed to a continual fire as they sail over the enemy's lines, but they are comparatively safe. It is not often that a plane is brought down by fire from the ground. A reconnaissance machine is practically helpless when attacked by the swift, high-flying, "handy" war planes. It scuttles to the ground in agitation while the fighting machines of its own side go to the rescue.

Victory in the air is preliminary to victory on the ground. Read the reports from the British front.

When a candidate is accepted at one of the French schools of flying he is first mounted on a penguin. This is a clipped-wing plane which cannot rise, but bumps along the ground in a most eccentric way. When he has learned how to handle a fast monoplane he is sent to the front for a try-out. If he promises to develop into a safe, conscientious flier—and into that sort only—he is assigned to an observing machine. If he has the dash and intrepidity and spirit which animated such men as Kiffin Rockwell and Sergeant McConnell, and "Charley" Prince, and other Americans who have died for France he is sent to the school at Pau.

He Spends Three Months in Learning Circus Stunts.

Here he gambols in an aerial madhouse. He is taught to cut off his motor and drop—not glide, but drop—to fool his enemy into thinking he has been killed. By and by he turns the engine on again and tries to "creep" up on the deceived one. He makes tail-dives and side-slips and backward loops. Two candidates will whirl their machines about each other, the wing-tips almost touching. They make one think of a pair of sparrows quarreling in the air. In this way the pupil learns how to attack and to elude attack.

"English and American fliers are as alike as though they had been rocked in the same cradle and taught in the same school," Lieutenant Guynemer once said. Guynemer is one of France's heroes of the air. He has brought down a dozen or more Boches, and has been so shot and shattered that he is bound together by steel braces and silver wire. "French fliers have a different style. They have more dash, perhaps. But there isn't a centime's worth of difference in the ability of the men of the three nations."

Other things being equal—such as the strategy of an unexpected concentration—the mastery of the air rests with the side which has brought the newest machine. The Nieuport had it, and then the German Fokker took it, and now the English Sopwith seems supreme. There is little difference in the planes themselves.

The speed is all in the motor.

BOOKS FOR POTATOES.

London, April 21.—A second-hand book store in the center of London has a counterful of books displayed in front of the shop with the sign: "These books two pence each, or will be exchanged for potatoes."

AUSTRALIAN LOYALTY.

Melbourne, Australia, April 21.—It was lately officially announced that up to January 31, Australia had dispatched 285,809 men on active service in the war. The Australian casualties up to March 8 totalled 51,131.

Everybody.

If you are interested in "The Cemetery Beautiful," drive out to Park Lawn, Fourth and Gurley streets, today and let me show you the grounds.

If you are not interested, come anyway and be convinced that you should be interested.

If you will phone me, No. 3959, I will be glad to send a car and bring you out to the grounds. A. L. STEIN.

WILSON ADDRESS ARCH'S KEYNOTE IN ALLIED WAR

So Says Baron Davenport, Food Distributor for England.

By Associated Press.

London, April 21.—"President Wilson's address to the American people forms the keynote of the arch of the allied co-operation," said Baron Davenport, the food distributor, in an interview today with the Associated Press.

The baron said plans for better co-operation among the allies as to control of foodstuffs by Herbert C. Hoover, chairman of the American commission for relief in Belgium, and recently appointed head of the American food board, had been made.

Supports U. S. Plan.

"The plan proposed by Mr. Hoover to the war cabinet," said Mr. Davenport, "had my strongest backing, and I understand also the backing of our allies. It was said that a small inter-allied committee should be appointed representing five or six of those principally interested in the overseas movement of the food supplies; that is, that committee should further develop the existing inter-allied organs in Europe for the combined purchase and combined handling of all foodstuffs for the allies, whether from America or elsewhere. In other words, all wheat and any other commodities bought in the United States or elsewhere are to be bought through the head of a bureau subjected to this general committee and thus the relative bidding by different allies and the consequent artificial forcing up of American prices would be avoided.

Locate Food Centers.

"Another important function of the board would be to determine the location of food supplies among the different allies and formulate their requirements for a considerable period ahead."

Baron Davenport said the requirements of all the countries from America should be limited to the lowest possible minimum on which public health and tranquility could be maintained and that every legitimate restraint should be placed upon food consumption and extravagance in all allied countries.

"The commodities needed by the allies from America," he said, "could be reduced to a few central staples. Our people have been trained to eat only wheat bread, although we are now mixing from 20 to 25 per cent of maize meal, rice and other cereals with flour.

England Needs Meat.

"We must import some meat for our soldiers at the front and a minor amount for our civilian population. Our people have depended for many years upon America for pork products and the consumption of bacon has gone up immensely due to our large armies in the field.

"Curious as it may seem to Americans, our people have only lately begun generally to recognize the superior value of beans for human food. There is scarcely a ton of beans to be bought in England today. We want wheat, some maize, a moderate amount of meat and pork products. Beyond this, of course, we must have fodder for our animals and our army horses for which we shall need more maize and oats."

Found Way to Health Without Using Knife

MRS. MARY E. FERREE.

Doctor Recommended Operation for Gall Stone, but Mother Objected.

In her work as an evangelist in the mountain districts of West Virginia, Mrs. Mary A. Ferree, who lives at 1964 Madison Ave., Huntington, W. Va., was frequently called on to relieve suffering among her charges and became familiar with the practical value of remedies easily available. When her daughter became ill and the doctor finally said the trouble was gall stones and that an operation was necessary, Mrs. Ferree would not consent. In a letter to the Pinus laboratories she says: "After four doctors had treated my daughter, and we had tried various remedies without avail, I heard of Fruitola and Traxo and tried it as a last resort. The first dose brought immediate relief and after using three bottles of Fruitola and two bottles of Traxo she was entirely cured. I pray that my testimony may be the means of helping others to health."

Fruitola and Traxo are compounded from the original Edsall formulas at the Pinus laboratories in Monticello, Ill., and can be purchased in Waco at W. B. Morrison's Drug Co.; a doctor's prescription is not necessary. Fruitola is a pure fruit oil that acts as an intestinal lubricant and disintegrates the hardened particles that cause so much suffernig, discharging the accumulated waste, to the sufferer's intense relief. One dose is usually sufficient to indicate its efficacy. Traxo is a tonic-alterative that is most effective to rebuild and restore the weakened rundown system.

A booklet of special interest to those who suffer from stomach trouble can be obtained by writing to the Pinus Laboratories, Monticello, Illinois.

SWEDEN'S VALUATION.

By Associated Press.

Stockholm, April 21.—The total assessed valuation of incomes and personal property in Sweden increased roundly 552,000,000 crowns in 1916 over the preceding year, rising from 1,932,000,000 to 2,484,000,000 crowns.

GIRL'S STATEMENT WILL HELP WACO

Here is the girl's own story: "For years I had dyspepsia, sour stomach and constipation. I drank hot water and olive oil by the gallon. Nothing helped until I tried buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. ONE SPOONFUL helped me INSTANTLY." Because Adler-i-ka flushes the ENTIRE alimentary tract it relieves ANY CASE constipation, sour stomach or gas and prevents appendicitis. It has QUICKEST action of anything we ever sold. VESTA DOUBLE LIFE

OLD FOLK NEED "CASCARETS" FOR LIVER, BOWELS

SALTS, CALOMEL, PILLS ACT ON BOWELS LIKE PEPPER ACTS IN NOSTRILS.

ENJOY LIFE! DON'T STAY BILIOUS, SICK, HEADACHY AND CONSTIPATED.

Most old people must give to the bowels some regular help, else they suffer from constipation. The condition is perfectly natural. It is just as natural as it is for old people to walk slowly. For age is never so active as youth. The muscles are less elastic. And the bowels are muscles.

So all old people need Cascarets. One might as well refuse to aid weak eys with glasses as to neglect this gentle aid to weak bowels. The bowels must be kept active. This is important at all ages, but never so much as at fifty.

Age is not a time for harsh physics. Youth may occasionally whip the bowels into activity. But a lash can't be used every day. What the bowels of the old need is a gentle and natural tonic. One that can be constantly used without harm. The only such tonic is Cascarets, and they cost only 10c a box at any drug store.

TO MY FRIENDS

I wish to announce that I have opened an up-to-date Optical Parlor, fully equipped with latest instruments, with which I use the latest and scientific methods for examining eyes and fitting glasses.

I will endeavor to give my best services for less money, on account of my overhead expense being small.

U. S. WOMEN HONORED.

Petrograd, April 21.—The Grand Duchess Tatiana, on the occasion of her name-day, recently, bestowed upon Mrs. George T. Marye, former president of the American Refuge for Refugee Women from the War Zone; Mrs. H. Fessenden Meserve, acting president, and Mrs. McAllister Smith, formerly of Newport, R. I., one of the founders of the institution, the insignia of the first class of the Tatiana committee, in recognition of their "devoted work in rendering aid to sufferers from effects of the war."

GETS YEARLY PENSION.

Stockholm, Sweden, April 21.—The riksdag has granted to Sven Anderson, a Swedish sculptor, a yearly pension for life of $450 "for a cultural work of enduring value." The mover of the resolution in the riksdag said:

"By his series of portraits of prominent men in public life, and particularly of members of the riksdag, he has left to coming generations an inheritance which ought to be treasured by them."

EMPLOYES DECREASE.

London, April 21.—The number of employes in the building trades in Great Britain has decreased since the war from 850,000 to 450,000. This presumably indicates a contribution of 100,000 men to the army.

VESTA DOUBLE LIFE

Safety in the Home
Part of Woman's Daily Duty

Every woman in charge of a household realizes that it is a large part of her duty to keep that household well.

In this task she must know the simple home remedies to be applied at the first symptom of illness.

Coughs and colds are two of the foes she must constantly combat, and digestive disturbances need immediate attention. Thousands of American housekeepers have found the most help to come from ever-ready-to-take

PERUNA

Because Peruna has established itself as the reliable family medicine of America, in the 45 years it has been before the public, the forehanded housekeepers keep it ready for instant ministration in the period of depression that precedes a cold, or when stomach troubles manifest themselves.

Both of these disorders are caused by inflammation of the delicate membranes lining the breathing apparatus and the digestive tract. Peruna clears away the waste, aids the membranes in recovering from inflammatory conditions and tones up the system. Its effectiveness is the reason that so many depend upon it, and its long record of merit maintains it as the dependable home tonic.

Tablet or liquid form—both good.

Our free booklet may help you. At your druggists or write us.

Nine years of continuous, consistent development, improvement, refinement!

Each year a better car and a better value!

Over three hundred thousand now in use!

That is the history of the car that built Overland because it represented integrity of value.

And as steadfastly as this car has represented *original* integrity of value, so also has The Willys-Overland Company *sustained* that integrity of value throughout its service in the hands of those who purchased it.

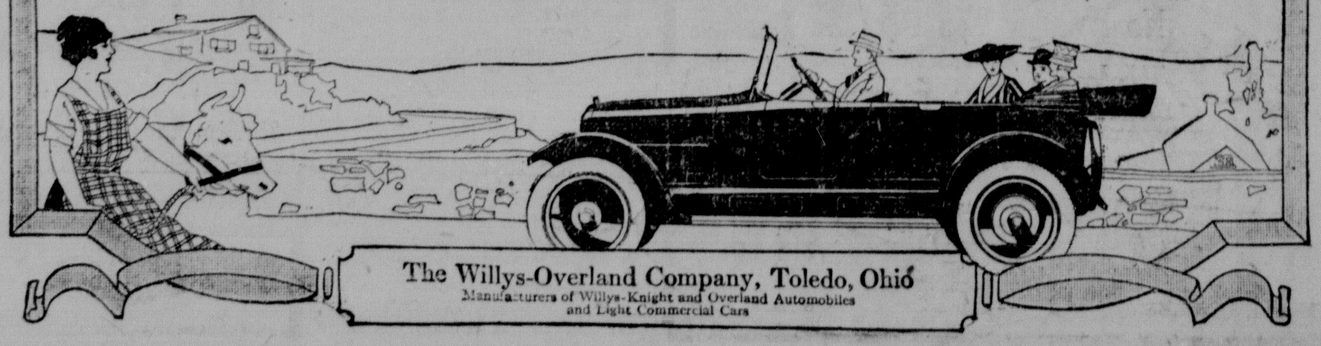

The Overland Big Four of this season and its twin—except for the motor—the Overland Light Six, are the direct outcome of all this development.

More than three hundred thousand owners and more than four thousand dealer and factory-branch organizations have assisted this development by their experience with these cars and their helpful suggestions of improvements.

In their new beauty, in their perfected easy riding qualities, in their proven sturdiness and mechanical excellence, in their admitted tire, fuel and oil economy, these cars are worthy of the confidence we have, that they will further enhance Overland prestige.

The prices are $850 for the Big Four, $985 for the Light Six, while we have them to deliver until May 1st—thereafter $895 and $1025.

DRAFT PLAN TO FORM CENTER OF LONG STRUGGLE

President Wilson Will Lead Fight for Conscription to Raise Army.

By Associated Press.

Washington, April 21.—President Wilson's fight to organize a wartime army, in accordance with the advice of the war department and the army general staff, will begin in earnest on Monday in both houses of congress. In the senate today the administration bill supported by Senator Chamberlain, chairman of the military committee, and a majority of his committee associates, was started formally on its way to vote. There was some debate but the way was cleared for uninterrupted consideration of the measure. In the house both the majority and minority reports were reported from the military committee and the bill will come up Monday with Representative Kahn leading the committee minority's fight for the administration's plan unamended, while Chairman Dent, heading the majority of the committee directs the opposition, urging trial of a volunteer system before restoring to selective draft.

Minority Report.

The minority report rests for authority on a letter from Secretary Baker to Chairmen Dent, declaring the opinion that "any compromise on the department's would be attended by unfortunate result."

The majority recommendations say in part:

"The bill authorizes, but does not direct the president to issue a call for a volunteer army of 500,000 in the first place and of an admiral force of 500,000 if necessary under the law now in existence.

"The bill further authorizes the president to proceed at once with the registration of all male citizens between the ages of twenty-one and forty as provided in the plan of the war department for a draft so that all of the machinery authorizing the draft of 500,000 for the first force and of the admiral 500,000 will be put in operation at once.

To Take Three Months.

"It will require, according to the testimony of the secretary of war, before the military committee at least three months to complete this registration. In the meantime, if the president sees fit he is authorized to call for volunteers and upon the completion of the registration he has the power to decide whether he will take an army of volunteers or organize one by draft.

"The bill provides that organization of all forces, other than the regular army, shall be composed of men who come from, and officers appointed from the same state or locality as far as practicable.

"Both the volunteer and draft features of the bill authorize the president to refuse to accept either by enlistment or draft the services of persons needed in the industrial pursuit of the country."

Secretary Baker's letter, included in the minority report, was written as a final plea for the military branch of the government in behalf of the administration bill.

Against Compromise.

"I have a deep conviction that any compromise of the principles governing the bill submitted by the department for the raising of a new army would be attended by unfavorable results," he wrote.

"The bill, as drawn, preserves as much of the volunteer spirit as can be preserved without embarking on the experiment of a mixed system of draft and volunteering.

"The drafting provision starts at the outset a process by which the forces of the country can be called as they shall be needed, according to an equal and just system and it has these merits:

"1. It spreads the burden of military preparation equally throughout the United States.

"2. It is certain in its operation, for after the registration is made, every man in the country will know whether he is to be called and when he is to be called upon, allowing those who are not to be called or whose call is postponed to continue at their natural pursuits undisturbed.

"3. It starts at the beginning of the accumulation of these new forces and has none of the character of a penalty which attaches to the draft when it is used after volunteering has been tried and failed."

Those persons who have nothing to do keep the devil busy.

INDIA'S WAR AID.

By Associated Press.

London, April 21.—An account of what India has done in the war must include mention of the fact that she has put her mhowra trees at the service of the munitions factories.

Every traveler in India has seen the mhowra trees, which are plentiful in all parts of the country. Soon after the war began it was discovered that the mhowra was the best source for acetone, which is the chief ingredient of cordite. Up to that time acetone was extracted mainly from wood, corn and starch. In England the British admiralty erected a great factory to extract acetone from corn.

Two English scientists in Hyderabad discovered that the flowers of the mhowra contained acetone in much larger quantities than any other vegetable substance, and large factories were immediately established to supply the needs of the munitions plants.

He Agreed.

PRACTICAL MISSIONARIES.

THE influence of the automobile in the development of good roads and the extension of the trade territory of Waco is worthy of more than passing comment. It is a real, positive influence which cannot be overlooked by any student of modern business development.

The progressive spirit of the automobile dealers and accessory men of Waco, as evidenced by the series of trade extension trips which they have planned for the spring and early summer, the first of which was taken April 12 and the second of which is to be made next Thursday, should be productive of excellent results. The benefit derived will not stop with the auto men, but will be felt by concerns in all lines of trade, in the feeling of closer fellowship bound to result. In going out to meet the men and women of Waco's trade territory, they are made to feel that they are wanted and made welcome by Waco, and are really as necessary to this city's development and growth as any group of citizens who reside within the city limits.

THE WORLD'S MAD DOG.

FIRST thing, let the people of Texas understand our enemy, the German autocracy.

The enemy respects no treaties. Hence, we can expect nothing from any treaty or agreement we have with it and such treaties are dead letter, whether they concern mutual undertakings or such as entered into at The Hague or elsewhere.

The enemy violates all international law and ordinary rules of warfare. He will kill or tyrannically use us and our women and children under the slightest necessity of warfare. He will sink without warning or consideration any sort a ferry, passenger ship or hospital ship. We need not resort to these things, but we are fools to expect mercy or exhibitions of humaneness in any degree.

We are dealing with madmen whose sole purpose is to kill, by all foul as well as fair means. We need not become madmen, too, but we will be first-class fools if we at all rely upon the fairness, humanity or mercy of our enemy.

Brutality in dealing with madmen is not justifiable, but when it comes to the issue of their lives or ours, we must shoot to kill, in the name of God and in behalf of all humanity.

There is no such thing as rights, no such thing as obligations, no such thing as honor or duty to civilization in this war. Our enemy has abolished all these, and made dominance by barbarism the issue. We will do our part in eliminating that barbarism while we have a man or a dollar left.

We will war as civilized men should, but we will not quit until the last fang is pulled from the bloody, frothing jaws of the world's mad dog.

SOME MORE UNREST.

MEAGER reports, thru sources more or less reliable, strongly indicate that what is called "the spirit of unrest" is hotly boiling among the people of Spain.

In these times of volcanic action by peoples, it would not be surprising should the Spanish go in for revolution. They are near neighbors of republican France and of Portugal, whose king is a refugee, and they have the recent splendid example of the Russians. Again, they're awfully hungry by reason of Germany's unrestricted submarine warfare and they know that their own autocrats side with Germany.

Spain may not yet be fully ripe for revolution, but she's another country whose masses are being reduced to starvation by the German autocracy. Germany is actually starving peoples into revolution, and if we were a Spanish autocrat, we surely would get down off the neutral fence.

It certainly is better to get down while the getting's good than to have your head pulled off in being brought down.

AMUSING 'EM.

THAT German chancellor is some humorist himself. "We shall," he says, "follow the principle that we never meddle with the internal problems of other countries."

You can almost hear old Carranza and the mikado ha-ha. But German humor always is pretty heavy, anyhow.

Much Ado About Nothing

By Roy K. Moulton.

THE NEW FOOD.

A scientist, noted, brings glad information
Concerning a food we've not heard of before.
His find is important. It may save the nation.
We never could use up its bountiful store.
If corn and spuds fail us, presaging starvation,
We'll live on the seaweed that grows by the shore.
The nourishing seaweed,
The flourishing seaweed,
The delicious seaweed, and clamor for more.

He says it's immense and a food of high station
When roasted or toasted or grilled to the core.
He may be correct, but we find no elation
In planning to follow his dieting score.
Alfalfa, dockweeds and all land vegetation
We'll eat, but not seaweed that grows by the shore.
Thumbs down for the seaweed,
The luscious young seaweed.
We'd like hollyhocks and geraniums more.

* * *

One sweet young thing writes in that there is no use in worrying if the farmers don't raise any crops. It is always possible to get just perfectly grand things to eat at the delicatessen.

* * *

Before coming over to shell New York the U-boat commanders should remember that the shell-game was invented in that town.

Who's the Wag, Irv. Cobb?

* * *

* * * America is in the world conflict "with both feet" and that the United States will wage war against Germany. * * *—N. Y. Evening Journal.

* * *

Henry the Barber says: "The young fellows who go to the marriage license bureau are going to need just as much courage as those who go to the recruiting office. Fifty-fifty.

* * *

Come to think of it, if the government did enlist a lot of fellows like Jess Willard the trenches would have to be dug a lot deeper.

* * *

OUR MOTTO FOR TODAY:
I Will Not Raise My Boy to Be a Slacker.

* * *

Lloyd's claims the war will be over in three months. Over where?

* * *

* * *

And, It's Quite Enough.

There was a time when I was able
To reel off rimes to Grace and Mable.
And not so very long ago
I used to chant of Dot and Flo.
Some other maids I've praised as well;
Phyllis, Peg and Annabelle.
Though often as I've sung unto 'em
These maids were myths—I never knew 'em.
But take Cecelia—there's a queen,
The fairest dame I've ever seen.
A maid I would exalt in rime,
Charming, vivacious, sweet, sublime.
Her lips, her hair, I long to praise
In wond'rous, column-toping lays.
In verse I'd glorify her smile,
Nor overlook her eyes, the while.

But for that really, truly, Miss,
The best that I can do is this!

—HUE.

* * *

Another thing to worry about now is the gooseberry crop. We fear it will be large.

* * *

How Did He Spend His Time?

Noblesville, Ind.—William Freeman died at ninety-seven years. He never touched liquor or tobacco and lived seventy-three years on one farm.

* * *

Every time we begin to feel good over the paper trust indictment we remember that John D. was once fined $29,000,000.

"Are the sexes to be separated in hades?" asked an exchange. And the meanest man answers, "No; if they were it wouldn't be hades." .. .. ..

Fore!

—By Ripley

New York Day By Day

By O. O. McINTYRE.

New York, April 21.—Melville Ellis has passed on, leaving an artistic void in Broadway that may never be filled. I saw him at the Palace just six days before the end came. He was then weak and struggling valiantly to throw off the ravages of disease.

His highly artistic and original work made him one of the foremost figures in the field of the stage. He had a genius for color and he was an adept in everything connected with costuming. Ellis was born in Arizona, but came to New York from San Francisco where he played a piano in a music store.

Big and strapping in stature, he was a stalwart figure on the stage and as a pianist he had few equals. He was the first to introduce new styles on Broadway. Tailors, it is said, were glad to furnish his clothes free and haberdashers heaped their new foibles upon him for he instantly made them popular.

Ellis was 40 years old. When he was 20 he tried to become a reporter on a San Francisco paper. He tells the story of his first assignment. The managing editor sent him to another city for an interview. Shortly after he arrived he sent the managing editor the following telegram: "Have forgotten the man's name."

The managing editor wired back: "The man's name is Jones. Your name is Ellis." Such brutality was too much for him and rather than go back for the "canning process" he took another job.

A lithe young lady clad in grasses and a boa, who claims to come from the slopes of Mauna Loa, but in reality is from Muncie, Ind., was dancing at one of the high-class cabarets the other evening while the dusky Molokai boys were twanging "Hawaiian Butterfly" on their ukeleles.

The tune kept everybody's feet patting and the lady herself seemed to be dancing as if inspired. Suddenly she looked at one of the tables near the dancing floor. She faltered a bit, but kept on until she neared an exit and then made a hurried exit.

One of the gentlemen at the tables smiled a bit cynically. The dancing lady was his wife. He had married her when she clerked in a ten-cent store in the middle west. All over New York she is the rage as the original Hawaiian hula-hula girl. Even her accent smacks of Waikiki beach. The husband was in New York on business and just happened to drop in at the cabaret.

Seen around the town: A subway blast guard with a red flag in one hand and an American flag in the other. A movie theatre advertising admission for one onion on the East Side. A man with a high hat and evening clothes wearing a red bat-wing tie. A peddler with German accent and Teutonic features selling American buttons on Broadway. A White Way flapper rouging her lips before entering a cafe.

Gather 'round the parlor lamps, folk. Here's scandal what is scandal. One of those crawling worms has turned. The maitre de hotel—or head waiter as we say in Gallipolis—has sued a patron because the patron accused him of taking tips.

According to the suit filed the patron declared that it was impossible to get a table upstairs or down unless the itching palm of the suave cuss who stood at the silk-roped entrance was greased with a five-spot.

The offended maitre de hotel says his reputation has been spotted. His neighbors do not speak to him and the dogs bark as he passes. All of which, he says, is worth $50,000. You who have visited New York, I ask you: Can you beat it?

A man stopped Jeff Nutt, the comedian on Broadway, the other night and asked him concerning the whereabouts of a mutual friend named Lyon.

"He's working on a newspaper," replied Jeff.

"What's he doing?"

"Lyon is a cub reporter."

The other man was so pleased with the joke that Jeff succeeded in borrowing fifteen dollars from him.

A slightly bibulous and very talkative individual sat near me in an Italian table d'hote the other night. His loneliness so worked on the sympathies of the proprietor that—it being a quiet evening—the gray-bearded French cook was called from the kitchen to come and share the bibulous individual's wine.

The cook was a good companion and kept ordering more wine and finally the two got into a violent argument and in the melee that followed the bibulous party got away without paying for his check.

Letters from the People

Waco, Texas, April 20, 1917.

To the Editor:

The writer notes that you carry on your front page this morning a report from McKinney, Texas, that in the opinion of a prominent miller, the flour mills of Texas would probably all be closed down within three weeks.

We feel quite sure this gentleman has been misquoted, and that the Texas mills will continue in operation as long as there is a demand for flour, as the price of wheat makes no difference to the miller when the price of flour is in the same proportion. Speaking for ourselves, our plant will continue in operation as long as there is a demand for flour, and our stocks of wheat and flour at this time are ample to last us well into the new crop.

Reports of the above nature are causing consumers to buy more than their actual requirements of staple food and is having the effect of advancing prices because it decreases the visible supply.

Yours very truly,
THE WACO MILL & ELEVATOR COMPANY,
T. P. DUNCAN, V. P. and Secy.

CHICKENS VS. VEGETABLES.

(By J. P. Everett.)

When the president of the United States thinks that home gardens are vitally essential to increase the food supply, and issues appeals to the whole people asking that they use every spare spot of soil to make it return fourfold in productiveness—when the bankers, commercial clubs and welfare leagues give time, thought and money and united efforts to assist as many people as possible in raising gardens—when this same vegetable planting is rubbed in as a patriotic duty and we hear about the "hoe vs. the bayonet," doesn't it seem pretty hard to have so much good effort utterly frustrated by a few selfish, unpatriotic citizens (will be call them citizens or just persons?) who allow their chickens to run at large? Now, there is a city ordinance that this shall not be allowed, but some people do not obey an ordinance except at the end of a stick. If such a person lives near you and their chickens begin their destruction of the beloved garden, just phone for the police. You need not give your name, just the name of the malefactor, simply stating that Mr. Blank is letting his chickens run at large and the police will notify him that they must be penned.

A better way in the minds of some people is to simply cut the heads off of the offending fowls. You may notify the owner that you are going to, if you care to take that trouble, but if they do not care for your garden, why should you care for their chickens? We all know the old story of Mr. Jones asking his neighbor what he was planting.

"Seeds," was the laconic reply.

"Why, it looks like one of my chickens," continued Mr. Jones.

"It is," replied Mr. Smith, "but your chicken is full of my seed, so I am planting her."

This subject is not a joke—far from it—any longer. If Texas cannot feed herself (by statistics we know she buys corn from Kansas and canned goods from everywhere) and the northern states have their hands full in feeding themselves and all of Europe without bothering about Texas, the subject of hens running at large and ruining gardens ceases to be a joke. Hens allowed to run at large may mean starvation to some families, who are doing their utmost to cultivate land loaned to them to tide over this war time.

Now the subject of cows—or, in fact, any kind of stock—catch them if possible, tie them right up where you found them, the owners cannot enter your lot if you forbid them to turn them loose, telephone for the mounted police and after Mr. Neighbor has paid $5 to get his stock out of the pound he will probably put a Yale lock on his gates.

Laugh With Us

When Joseph H. Choate was ambassador to the Court of St. James's he was standing near the door as some of the guests at a reception were leaving. An Englishman, mistaking him for one of the footmen, said:

"Call me carriage."

Mr. Choate turned to him and said: "How do you do, Carriage?"

"Why do you call me that?" demanded the astonished Englishman.

"Well," responded Mr. Choate dryly, "I couldn't very well call you Hansom."

"Mary, New York seems to be an awful town in which to buy groceries. Aren't there any stores where they sell things lower than the others do?"

"No, mum; I don't know of any. There's some stores where they sell 'em higher than the others, but they ain't none where they sell 'em lower."—Life.

A girl who had recently figured in a romantic runaway match was, after her return home, telling her dearest friend all about it.

The latter, interrupted with this question: "When you eloped with Louis did you leave a note telling your folks where you had gone?"

"Why, of course," said the wife. "If I hadn't, how on earth would papa have known where to send us any money?"

A short time ago an eminent engineering firm in Philadelphia had occasion to send one of its promising young hopefuls to Washington. As he was sent hastily and was detained longer than he expected, he found that he simply had to have a clean shirt. Buying a "classy" one, he charged it to the firm. On his return to town he said to one of his fellow workers: "See this shirt? I bought it on the firm."

"You did?" said the other. "And did you put it down as 'shirts'?"

"Ah, no, boy," said he. "I ate it."

The Optimist—Cheer up, Bert! The war will soon be over, and we'll all be back in good old Blighty!

The Pessimist—'Tis all very well for you to talk like that, Charlie—you're one of the lucky ones. But I'll never see Blighty no more. When you and the boys go home they'll put me on to empty the blinkin' sandbags!

Smith got married. The evening of his first pay day he gave his bride $14 of the $15 salary and kept only a dollar for himself.

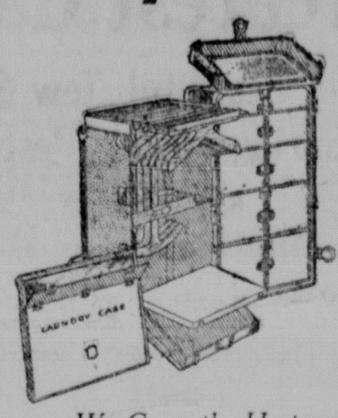

But the second pay day Smith gave his wife 11 and kept $14 himself.

"Why, John," she cried in injured tones, "how on earth do you think I can manage for a whole week on a paltry dollar?"

"Darned if I know," he answered. "I had a rotten time myself last week. It's your turn now."

Why Not Own A Wardrobe Trunk

HERE IS YOUR CHANCE.

For a short time only we will make you a LIBERAL ALLOWANCE on your old Trunk if applied towards the purchase of a NEW UP-TO-DATE WARDROBE Trunk.

In addition to our own line of

Waco Made Trunks

We Carry the Hartman Wardrobe Trunk

You have wanted one of these Trunks for a long time. Why should you delay in having one for your use when such an opportunity as this is thrust upon you. We will appreciate an opportunity to demonstrate and show you our large and complete line of Trunks.

Compare Our Trunks With Others, Both as to Quality and Price.

Come into the store and let us talk to you and make you an offer for your old Trunk.

Waco Morning News

WACO, TEXAS, SUNDAY, APRIL 22.

MISS FLANIGAN, BRIDE OF WEEK, IN WACO HOME

Married to Charles Samuel Appell Wednesday at Parents' Home.

The Flanigan home, 1803 Fort avenue, was the scene on Wednesday of the wedding of the daughter of the house, Miss Regina Flanigan, to Chas. Samuel Appell. The room in which the wedding ceremony was performed was beautiful with its decorations of Easter Lilies and white roses. A magnificent altar was formed of stately palms and lilies. The second room was lavish in its decorations of pink roses and ferns, and the dining room was entirely in American beauties and ferns.

Miss Beverly Lastinger, a niece of the groom, played Mendelssohn's Wedding March, and little Regina Prade, Ruth Lemond and Vannah Girardey, with little Morris Appell, entered the room, carrying armfuls of white roses and streamers of white maline, with which they formed an isle for the wedding party. Father Kelly then entered, followed by Mr. Appell and his best man, John Appell. Next came the matron of honor, Mrs. Chauncey Prade, carrying an arm bouquet of Easter lilies, and dressed in a beautiful blue Pussy Willow afternoon gown embroidered in gold. Her hat was a white picture hat with spring flowers. Then came little Mandy Lou Prade, dressed in white organdy, with all accessories of white, and carrying a big lily with the ring in its chalice.

Last came the bride on the arm of her father, J. T. Flanigan. She was dressed in her going away gown, a coatsuit of navy blue with tan shoes and a blue hat touched with tan. She carried a shower bouquet of bride's roses. The impressive ring service was used to unite these well beloved Waco young people.

After the ceremony the guests went into the dining room, which was a bower of American beauty roses. Misses Gailey Wilkes, Maud Brown, Margaret Yates, Aline Spencer and Camille Girardey served frozen punch and angel food. The receiving line for the reception after the ceremony was made up of Mesdames W. W. Seley, Harvey M. Richey, J. M. King, Davis Gurley, C. C. Terry, Ivan Bass, J. M. Lemond, Julian Prade, Earl Prade, Lee Dewey, Mrs. Eugene McGlasson and Misses Anna Frye Jones and Alta Harrison.

Mr. and Mrs. Appell had steadily refused to tell their destination or any point to be visited on their wedding trip, but rumor has it that they will go to San Antonio for the Battle of Flowers. The house party went with them to the train, showering them with rice and with congratulations.

Mrs. Appell remembered her matron of honor, and Miss Bolton and Miss Lastinger with sterling coin purses. The little girls in the wedding party received gold rings, and Master Morris Appell was presented with a tie clasp.

The groom's gift to his bride was a grand piano. From their many friends and acquaintances, the young couple received a very handsome assortment of gifts of cut glass, silver and linen, which will be put to good use in furnishing the new home on Twentieth and Mitchell, where Mr. and Mrs. Appell will be at home after their wedding trip.

THURSDAY AUCTION BRIDGE WITH MRS. E. F. KAVANAUGH

Mrs. E. F. Kavanaugh of North Twelfth was hostess to the Thursday Auction Bridge. Beautiful pomgranate blossoms and baskets of spring roses were effectively placed in the parlors and dining room. The conventional salad and ice were attractively served. The regular club prize, a china plate, went to Mrs. Killingsworth and the guest prize to Mrs. McFarland, a handsome handkerchief. Mrs. H. W. Jones won consolation and was awarded an embroidered table cover.

On each table was a growing pot plant, a player at each table being presented with it, as follows: Mesdames J. J. Powers, Frank Wells, T. C. Edmondson, Joe Hale, Joney Smith and B. H. Schroeder.

The guests for the afternoon outside the regular club members were: Mesdames T. C. Edmondson, McFarland, Ferrell, Joe Hale, John Roberts, B. E. Harris of Galveston, Todd, Joney Smith, C. C. Terry, Guy McKnight, James Mistrot, B. H. Schroeder, Penick, W. H. W. Jones, Mrs. John Wright is named as the club's next hostess.

WOMAN'S CLUB WITH MRS. J. D. WILLIS.

Several items of business were brought up for discussion when the Woman's club met with Mrs. J. D. Willis. It was decided that the club should not, as a whole, take an active part in the Red Cross work, but every member was urged to join the Red Cross and to do her part.

The annual picnic will be held this year at the Fish Pond, May 15 being suggested as the probable date. The program for the coming year was read and passed upon. The year will be devoted to the study of "Our Country and Its Problems."

The regular Browning program, which was given, embraced the following: "Love Letters," by Mrs. J. P. Boynton; "Sonnets from the Portuguese," Mrs. J. L. Kesler; interpretive reading of "One Word More," by Mrs. Young; "By the Fireside," Mrs. H. C. Black; music, "A Woman's Last Word" and "In a Gondola," Miss Gertrude Bush accompanying Mrs. Albert Wells.

After the program the club adjourned to the dining room for a social cup of tea. The next meeting, May 1, will be with Mrs. Llewellyn Aubrey.

D. A. R.'s WITH MRS. BART MOORE

The Daughters of the American Revolution were entertained on Thursday in the home of Mrs. Bart Moore, Sr. An unusually good attendance and an interesting program were reported.

Mrs. R. L. Henry made some very interesting and instructive remarks on the home of Thomas Jefferson, "Monticello." Plans are being made by the Daughters of the Revolution all over the country to obtain purchase money sufficient for the purchase of the historic old mansion, which is located near Charlottesville, Virginia. The place is now owned by a Mr. Levy, who is willing to sell, if congress, through the aid of the D. A. R. can secure the appropriation.

Results of the D. A. R. convention in Washington also came up for discussion.

After the program the hostess, assisted by Misses Dorothy Finley, Mrs. Harold Parmalee and Mrs. Bart Moore, Jr., served delicious punch and cake. Little Jane Dodd Moore also assisted her mother in the dining room. The gardens of Mrs. Moore and of her neighbors contributed armfuls and basketfuls of magnificent spring roses of every color and size for the decoration of the pretty home.

The Daughters of the American Revolution will not meet again in social session until October, when they will resume their regular meetings, which take place every third Thursday in each month. The unveiling of the boulder at Waco spring will write finale on the organization for this spring.

SINGERS FOR SOLDIER CAMPS TO SING HERE

When the soldiers were on the border, five ladies who were in a house party on the border, were invited by the officers to sing at a certain camp, where it was said that the soldiers saw less than three women in six months whom they could be proud to know. These ladies who are from Houston sang to the lonesome soldier boys and they were so well pleased and enjoyed the treat so immensely that the officers urged the ladies to make the lives of other soldiers happier by their singing. They have done so and without costing the government anything for traveling expenses.

These ladies will appear in Waco if it can be arranged. The Y. W. C. A. has agreed to arrange for their appearance which will probably be May 5. It was first thought that two concerts would be given for the benefit of the enterprise of furnishing the soldiers music. One to be at Baylor the other uptown but it is now thought that efforts will be combined in one concert. Details cannot be given until later and a full list of the ladies who will take part.

Proceeds will go toward benefiting the Y. M. C. A. of the soldiers on the border.

MISS HONORA SILBERT IN DUAL RECITAL.

A graduation recital of unusual interest to the general public and to Baylor circles is that of Miss Honora Silbert, which will take place in Carroll chapel Monday afternoon at 5 o'clock. The affair is a unique one, combining as it does the program of pianoforte selections and the rendition of her own abridgement of "The Music Master," by Charles Klein, for Miss Silbert is graduating not only in piano under the instruction of Prof. Rudolf Hoffmann, but also in the department of expression, Miss Silbert is unusually accomplished, and her friends are looking forward to her recital with an unusual degree of anticipation to Monday's recital. The program follows:

PIANOFORTE.

"Sonata," Op. 26 (first movement) .....Beethoven
"Marche Mignonne".....Poldini
"Du bist die Ruh".....Schubert-Liszt
"Serenade" .....Rachmaninoff
"Papillons" .....Olsen
"Valse," Op. 34, No. 1.....Chopin

EXPRESSION.

"The Music Master," by Charles Klein.
(a) "The New Pupil."
(b) "Father and Daughter."

TRAUTSCHOLD-FLOOD WEDDING WEDNESDAY

On Wednesday morning at the Church of the Assumption at 9 o'clock the Rev. E. A. Kelly officiating, Nicholas A. Flood, Jr., and Miss Marie Trautschold were married. Miss Marie Moncus, cousin of the bride, served as bridesmaid, and Mr. Flood had chosen Andrew Flood as his attendant. The wedding march was played by Mrs. J. A. Miller and Mrs. W. C. Hopkins, aunt of the bride, sang an "Ave Maria," by Gounod, during the offertory.

The nuptial mass, with Father Kelly officiating, was followed by a wedding breakfast at the home of the bride's parents, 914 North Ninth street.

Miss Marie Trautschold, now Mrs. Flood, is the daughter of Mr. and Mrs. C. M. Trautschold. She was born and reared here, receiving the best of educational advantages. Mr. Flood is cashier of the local office of the National Biscuit company.

MRS. ED LAUGHLIN'S "AT HOME" FRIDAY.

Mrs. Ed Laughlin issued about two hundred and fifty invitations for an "At Home" on Friday in honor of Misses Frances Luedde and Queenie Barnett, and Mrs. B. E. Harris of Galveston.

The house was a perfect gower of roses, many of them the compliments of Mrs. Laughlin's many friends. The dining room was all in pink roses and fern. A white basket was suspended from the electrolier, filled with pink carnations and ferns, and a mound of carnations and ferns was arranged below it on the table. The living room was also in pink roses, for the most part.

The guests were greeted by Mrs. Frank Wells at the door, and Mrs. W. P. Killingsworth greeted them as they came into the living room. In the reception line there were Mrs. Laughlin, Mrs. B. E. Harris, Miss Frances Luedde and Miss Queenie Barnett. Mrs. Dr. Ferrell and Mrs. Frances Flewellyn received the guests as they came into the dining room, and Mrs. Jessie Penix dipped the punch, which was served by Misses Chic Lewis, Maizie Turner, Ruth Hubby, Alice Brazelton, Mesdames Will Carroll and George Todd.

CITY FEDERATION ON TUESDAY.

The City Federation of Women's clubs will meet on Tuesday at 3 o'clock in the public library, where an unusually interesting program will be carried out. Plans for the observance of "Baby Week" and for "Be Kind to the Animals" week will be discussed. The women who went as delegates to the Temple convention will bring interesting reports of the trip.

Following this, there will be held a symposium touching every phase of the

"Old Glory" Ribbon

—Beautiful little Silk Flags, 1 to 2 inches wide. Can be cut into separate flags or used by the yard, for trimmings and all sorts of decoration. The yard...**50c** to **75c**

Women's $49.50 and $59.50 Khaki-Kool Suits $39.75

Khaki-kool, you know, is the very height of fashion—the demand for Suits of this wonderfully popular material continues to grow as the season advances. Hence the unusual importance of this selling event, which offers Suits of latest patterns and colorings at $10.00 to $20.00 less than the regular prices. Swell sport styles, with large collars and cuffs of contrasting colors; oyster backgrounds, with stencilings of Oriental figures or striking effects in stripes. As the number of Suits is limited and the values are extremely attractive, we advise early choosing.

Women's Summer Woolen Suits Up to $44.50, Specially Priced $24.75

A rare opportunity to get a handsome traveling Suit at a real saving. These are splendid for street wear, too. Lightweight woolens, in blue, gold, grey and black-and-white checks—beautifully tailored.

$7.50 Silk Dress Skirts for $5.98

Plain and Grosgrain Silk Taffetas are the materials, and the styles include new sport models and shirred and gathered styles. Blacks, navies, plaids and sport stripes—fifty skirts in the assortment.

Summer Dresses of Georgette Crepe —Priced $29.50, $34.50 up to $74.50

Georgette will be among the most popular of all materials for Summer Dresses; we show exquisitely simple Frocks of white and flesh color, trimmed only in demure bandings of crystal or colored beads.

DAINTY NEW PRINCESS SLIPS in corset-cover styles, are shown in the Negligee Section; trimmed with embroidery, lace and ribbon—$1.25 to $3.98

Really Removes Hair Roots, or Costs Nothing

(Phelactine, the New Wonder-Worker)

Without doubt the greatest thing yet discovered for hair-disfigured womankind is the wonderful phelactine method. It has none of the disadvantages of electrolysis or depilatories and, best of all, it removes the hairs entire, **roots and all!** It does this instantly, leaving the skin so smooth and soft that no one can tell the user was ever the possessor of a moustache or other hairy growth.

Phelactine is non-odorous, non-irritating, and so harmless a child could eat it without any ill-effect. A stick of this remarkable substance, accompanied by simple instructions, can be obtained at any drug store, and its price will be refunded upon request in case of dissatisfaction. But what woman would not be satisfied and delighted after seeing those ugly hairs come out—including the roots—with her own eyes?

relation between mistress and maid. The Domestic Science club has been invited to take part in this discussion, and different topics in the discussion will be introduced by Mesdames D. E. Hirshfield, N. F. Hill, H. B. Mistrot, J. R. Milam, R. B. Spencer, Lena B. Starr, W. E. Andrews, W. O. Wilkes, J. H. Sturgis, F. M. Compton, R. J. Alexander, George Rotan, Carl Resiner, W. M. Foster, Walter D. Lacy, J. M. Gallagher and Isaac Goldstein.

MRS. CARL REISNER HAS BRIDGE PARTY

Mrs. Carl Reisner returned many social courtesies on Thursday afternoon by inviting twelve of her friends for a game of bridge. The prevailing idea of patriotism was carried out in all possible ways. The card room showed masses of white roses, the dining room having bowls and baskets of American beauties. Mrs. J. W. Holloway dropped in after the games to help the hostess serve and entertain her guests.

Those making up the tables were Mesdames N. H. Church, C. K. Durham, J. J. Durham, A. R. Lawson, George Stubblefield, Charles L. Watson, Forest Jackson, Roy Goebel, Paul C. Murphy, Chester Fields, Ed Vance and D. H. Wiley. Mrs. A. R. Lawson made high score.

BIDE-A-WEE WITH MRS. W. N. LAZENBY.

Mrs. W. N. Lazenby was hostess on Wednesday to the Bide-a-Wees. The guests outside the club were Mrs. D. H. Wiley and Mrs. J. J. Delaney. Mrs. Lazenby regaled her guests with a salad and ice, carrying out a color scheme of pink, both in refreshments and house decorations, which were pink roses. The score cards were very pretty, with touches of pink. The next club hostess is Mrs. Paul C. Murphy, 1915 Sanger.

DAISIES WITH MRS CHARLES PEARRE

The Daisies were entertained on Thursday by Mrs. Charles Pearre of Speight street in compliment to her niece, Miss Edna Shaw. The hostess had also invited the Merry Robins for the same time, and the two clubs enjoyed a very pleasant afternoon. Three tables for eighty-four were formed. Patriotic decorations were used in both the dining room and reception room, with American beauty and white roses in quantities. Little American flags adorned the score cards, and tiny flags were the plate favors.

Miss Ella Stolte has the club for its next meeting, May 3.

THURSDAY BRIDGE WITH MRS. WILLIAM ABEEL

Mrs. William Abeel chose the mezzanine floor of the Raleigh for entertaining the Thursday Bridge. She had arranged quantities of American beauties to good advantage. In the games of bridge, Mrs. Charles Schuler made head score, and was presented with a silver flower basket. The next hostess is Mrs. Wilbur Crawford, on April 26.

Guests outside the club membership were Mesdames Harry B. Gorman, Eva Prendergast, Willard Wigley and Miss Ruby Garland.

MRS. STRIBLING FOR MISS FRANCES LUEDDE.

Mrs. O. L. Stribling is giving a luncheon on Tuesday at 1 o'clock, honoring the bride of the coming week, Miss Frances Luedde, who becomes the wife of Dr. Beville on April 26.

MISS ROSE EDMOND HIGHLY COMPLIMENTED

A letter from the firm in charge of the bronze plate for the boulder which is to be unveiled at Waco spring by the D. A. R. May 5, paid a most flattering but well deserved compliment to Miss Rose Edmond, who sketched the engraving of the spring, with Indians and their tepees, for the bronze plate. The letter said that the writer had never seen a more artistic representation for a work of the kind. Miss Edmond is an accomplished artist, and this recognition of her talent is very gratifying to her friends.

TEX "Y" CONCERT APRIL 28.

Five ladies of Houston who are touring and giving concerts for the benefit of the soldiers' Y. M. C. A. will appear in Waco April 28, next Saturday. They sang last year on the border for the soldiers and their kindness was so highly appreciated that they decided, without cost to the government, to repeat their entertainment this year. It is their object to raise funds for the Y. M. C. A. for the soldiers. They come to Waco under the auspices of the Y. W. C. A.

TUESDAY BRIDGE WITH MRS. PECK.

The Tuesday Bridge club met with Mrs. Fred Peck. The parlors were in American Beauty, pink and white roses. In the games, Mrs. C. C. Terry won head prize and Mrs. McFarland the consolation. The club meets with Mrs. E. F. Drake on next Tuesday. Those invited to take substitute hands were Mesdames H. A. Orr, Earl Massey, Charles Gooch and Walter Miller. A salad and ice were served.

BENEFIT CARD PARTY AT PROGRESS CLUB

The Temple Sisterhood were very successful in their benefit card party given on Thursday in the parlors of the Progress club. Many who were unable to attend sent in their contribution.

The receiving line was made up of Mesdames Louey Migel, Sam Davidson, L. H. Goldstein and Isaac Simmons. Several prizes were awarded for high score. Cake and brick cream were served after the games of lotto, auction and bridge.

MISS FLORRIE NEAL COOPER FOR MISSES LUEDDE AND ALLISON.

Miss Florrie Neal Cooper has as a guest in her home Miss Verhel Allison of Denton. Miss Cooper and Miss Allison have just returned from the R. V. hop at A. & M. and Miss Allison will remain for several days visit with Miss Cooper. On Monday Miss Cooper will entertain in honor of Miss Allison and of Miss Frances Luedde.

WEDNESDAY EUCHRE WITH MRS. SCOTT HILL.

The Wednesday Euchre club met at their usual time, with Mrs. Scott Hill. The head prize fell to Mrs. Frank Wheeler and the consolation to Mrs. Tuttle. The club's next hostess is Mrs. Peyton Randle.

Those playing substitute hands were Mesdames W. B. Brazelton, Lloyd Tuttle, H. A. Hoke and Henry Miller of Corsicana.

BACHELOR MAIDS WITH MISS BEUNA CLINTON

The Bachelor Maids met Thursday with Miss Benua Clinton. No guests outside the club had been invited. La France roses were used in dining room and living room. Miss Mary Carter made high score and was presented with a pretty corsage. The hostess for next week has not yet been named.

REVIEW CLUB TO HAVE GARDEN PARTY

On Wednesday the twenty-fifth of April the Review club will meet in the last session of their year, adjourning at that time until October. The session will take the form of a garden party on the spacious lawn of Mrs. W. I. McReynolds of North Fifth.

MISS COOPER FOR MISS LUEDDE

Miss Florrie Neal Cooper has announced a bridge party at her home on Monday afternoon in honor of Miss Frances Luedde, at 3 o'clock.

MISS NORMA BONNER FOR MISS THOMPSON

Miss Norma Bonner has issued invitations for a luncheon at 1 o'clock on Tuesday in honor of the bride-to-be, Miss Sallie Thompson.

PLEASURE AND PROFIT WITH MRS. MORROW.

Mrs. William Morrow will be hostess on Wednesday to the Pleasure and Profit club at 3:30.

PEOPLE YOU KNOW

Mrs. H. R. Dudgeon has as a guest in her home Mrs. S. B. Reed of Galveston. Mrs. Reed will be in Waco for several days.

Miss Vernel Allison of Denton is with Miss Florrie Neal Cooper from Monday on. Miss Cooper and Miss Allison have just returned from the R. V. hop at A. & M.

Mr. Hoeffner of North Eighth was showered by the teachers of the Pecan Grove school with flowers on Tuesday afternoon.

Miss Minnie Graves will study art in New York this summer.

Miss Clellia Peak, Lucile Peak, Ethel Thomas and Minnie Graves with Mr. Reese motored to Cleburne yesterday afternoon to spend the week-end in Miss Thomas' home.

To the Citizens of East Waco.

Won't you drive over to Park Lawn, "The Cemetery Beautiful," Fourth and Gurley streets, today?

If you will phone me, No. 3959, I will be glad to send a car to bring you over to see the grounds. A. L. STEIN.

Pretty as a Picture—Every sign of Wrinkles and Complexion Blemishes gone

HOW A MUDDY, SALLOW, AGING SKIN CAN BE MADE WONDERFULLY YOUTHFUL AND BEAUTIFUL THROUGH REMAKABLE DISCOVERY OF OSMOSIS OF THE SKIN

When you see a woman past thirty with no horrid crowsfeet or pouches around her eyes, no enlarged nose pores, no deep lines or furrows about the mouth, and possessed of a clear, velvety complexion, you can be practically certain that she knows beauty secrets not possessed by the average woman. She may have as much cause for looking old and careworn as anybody, yet she is able to go on year after year, with never a sign of wrinkles or complexion blemishes, all the while preserving a fresh, youthful appearance. And there is really no reason why any woman between thirty and sixty should not look from five to fifteen years younger than she really is, by simply knowing the secret of just what to do. It ought to be a matter of pride with you to keep your complexion clear and your face youthful as much as it is to keep your hands and nails clean. But you cannot hope to be beautiful and attractive unless you give your skin full opportunity to act freely and renew its youth. No matter what your age; no matter how coarse, harsh and unsightly your complexion, nor what you have tried unsuccessfully, the moment you produce osmosis of the skin you will look younger and far more beautiful.

Grace Valentine
Beautiful Metro Picture Star

Many a wrinkled, hollow-cheeked, faded-looking woman has regained her charm and awakened to find herself pretty as a picture with every sign of wrinkles and complexion blemishes gone through this wonderful, simple method. Watch what it does for you! Merely wash your face in warm water at night and rub in a teaspoonful or two of any good roseated cream which you can obtain from the druggist. In the morning wash the face with cold water and rub in more cream. In three weeks or less you will be astonished at the change that has taken place. See how the old, hardened, coarse, rough skin turns into new fresh, soft, youthful-looking skin almost before your very eyes, all due to simple osmosis of the skin, produced solely by warm water and roseated cream. But be sure to use only pure roseated cream, as it is an entirely different thing from ordinary face creams, and must not be confounded with them. Most women prefer Creme Tokalon Roseated. If you have wrinkles, get a box of Japanese Ice Pencils and use them in connection with the cream and you can get quick action on the deepest wrinkles, no matter of how long standing. For giving an indescribably beautiful effec to the neck and arms as well as suppressing almost immediately the appearance of all smaller wrinkles and marks of age, many women use a little Santonex in connection with this method of producing skin osmosis.

No Need for Ugly Nose Pores and Deep Wrinkles.

The above is one of a series of articles on beauty specially written by Mlle. Simone Marelx of Paris, winner of two great international beauty prizes, one in Paris, the other in England. Mlle. Marelx personally guarantees success in every case with the products recommended in her newspaper articles or will refund the amount paid for them, provided you take your dealer's receipt at the time you make your purchase. Her American address is Simone Marelx, 20 West 22nd St., New York. Creme Tokalon Roseated and the other products meltnode can be obtained absolutely fresh and guaranteed pure from Goldstein-Migel, Powers-Kelly, Sanger Bros., Morrison, Provident Drug Co., or most any good druggist or department store in this city.

The Paint Situation

Don't be surprised at the HIGH PRICES OF PAINTS. They are some HIGHER than formerly and we look for another advance in the near future, but don't let this TEMPT you to buy CHEAP paint or oils as YOU WILL REGRET IT. Cheap paint will not cover as much surface nor as well as GOOD PAINT and it will cost you as much to finish the job as the HIGHER PRICED PAINT.

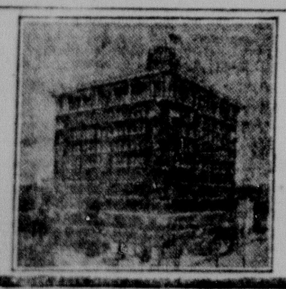

Besides your cheap paint will not wear as long, neither will it look AS WELL.

Don't be misled by LOW PRICE, but BUY the BEST PAINT you can get, if it does COME HIGH, FOR IT IS THE CHEAPEST AFTER ALL.

A Fallacy Regarding Good Music---Its Remedy

HAVE you ever seriously thought of the fact that every time you hear a Re-Creation of a popular song you will like it less, whereas every time you hear a classic you will think it sounds better? It is a fallacy to say that good music is not tuneful. It is—only the tunes are not hackneyed, so you don't find them familiar at the first hearing.

As an interesting example of what may be found in good music, take the Re-Creation, "The Stars Were Shining" from "La Tosca," sung by Ciccolini. We assume you have not heard this aria before. First read what the label says about it. Then listen to the Re-Creation of Ciccolini's voice. Your first impression will perhaps be about like this: "Well, I sould say it starts with an orchesrtal introduction—then Ciccolin sings some declamatory phrases, mostly all on one note. Then he sings the aria. Sounds like a curious sort of melody, lots of sob-stuff. Say, he does put great expression in it, doesn't he?"

That's about what you would say, isn't it?

Now hear it again, carefully. Perhaps this time you'll view it this way: "Same gloomy introduction. Now he starts all on one note, but wait a moment, the orchestra sounds familiar here. Why, all the time he holds that one note, the accompanists are playing the same thing he sings afterwards. Well, that's interesting, anyway. Now he begins the aria. Say! there's some class to that tune. Sounds as though he were about broken-hearted, doesn't it? Yes, that is what the orchestra played at the beginning."

Now you're a convert to Puccini's art. Hear the Re-Creation a third time. Doesn't the introduction prepare you for the scene to follow? The declamatory phrases with the sad little melody struggling underneath, they don't bore you now, do they? And then the aria, doesn't it call to mind the condemned man sitting alone in his cell awaiting death and thinking of his loved one, and of his meetings with her in the starlight? He touches a tender strain, but the keynote of the whole is grief—despairing, passionate grief.

Isn't it a shame that so many people miss all these beauties just because they cannot or will not take the trouble to appreciate good music?

THIS week we display a full line of the washable, new Congoleum Rugs in many pretty designs and colors. They are far superior to medium-priced grass, fibre or fabric rugs. They do not "kick up" at the edges. They need no fastening of any kind. They are waterproof and sanitary.

All sizes from 1 x 1 yard at 60c. up to 10½ x 12 feet at $8.50.

They make fine Porch Rugs because they don't gather dirt, don't fade, and are washable

Art 9x12 ..... $11.00
Utility 9x12 .... $ 8.00

LEGISLATURE IN NEW BILL NAMES HIGHWAY BOARD

Commission Consists of Three Members, to Be Appointed by Governor.

The Thirty-fifth legislature of Texas, recently adjourned, enacted a bill providing for a state highway department, and the governor has signed the bill. Its essentials are as follows:

There will be a commission of three members appointed by the governor. The members of the commission will be allowed "actual and necessary expenses incurred in the performance of the duties of their offices and shall each receive a per diem of $10 for each day actually devoted to the work of the department, the aggregate of such per diem in no case to exceed the sum of $1,000 for each member in one calendar year." They will serve for two years.

It is the duty of the state highway commission to employ a state highway engineer. He must be a "competent engineer and graduate of some first-class school of civil engineering, experienced and skilled in highway construction and maintenance, and shall receive an adequate salary in the discretion of the commission." It will be the duty of the engineer to act with the commission in an advisory capacity.

The highway commission, acting through the state highway engineer's department, will make or cause to be made a complete road map for the state of Texas and one for each county in the state, and complete and detailed surveys of road-building materials will be made and reports filed with the state highway department.

To provide funds for the department it is required that all motor vehicles owned in the state be registered and fees for registration be paid as follows: For each motorcycle $3. For each motor vehicle, other than one used for commercial purposes, and "carrying or intended to carry a total gross load of more than 1,000 pounds per wheel" the fee will be 35c per horsepower gauged according to standards of the Association of Licensed Automobile Manufacturers, with a minimum fee of $7.50. For commercial motor vehicles the fee is based upon the carrying capacity per wheel and ranges from $20 to $40, $60, $150, $300 and $500, the latter for vehicles carrying more than 10,000 pounds per wheel.

For each vehicle registered a certificate of registration will be issued and a number plate will be furnished without cost.

Any manufacturer or dealer in motor vehicles in the state, in lieu of registering each machine, may secure a general distinguishing number to be attached to any machine temporarily. For this the fee is $15 and he may secure additional numbers not to exceed five in number for a fee of $5 each.

One-half of the fees collected shall be returned to the counties where they originate to be expended in road maintenance according to plans approved by the state highway commission. The other half of the fees will be used to maintain the state highway department and to encourage and aid the construction of a state system of highways.

Growth of Business Is Cause of New Quarters

On account of the growth of the business of the New York office of the American Automobile association, new and larger quarters have been obtained in the Astor Trust building, at Fifth avenue and Forty-second street. James A. Hemstreet, manager of the New York office, said, in regard to the change: "We have found it necessary to increase our facilities in order to meet the wants of travelers for the touring season, which is now near at hand. The Metropolitan Consulate membership is now nearing the 5,000 mark. Of course the A. A. A. from its New York City headquarters provides for the touring wants of its members from all the New England and Middle Atlantic states. The Washington headquarters gives special attention to the southern and southwestern states, but transcontinental travelers are taken care of by the touring bureaus in both cities."

SOUTH AMERICA RICH

Good Territory for Motor Companies to Work.

The South America of O. Henry, with his barefoot soldier revolutions and yellow fever, and the South America of wondrously beautiful cities, rich in art and culture and splendid architecture, peopled with diplomats and genteel folk, were rediscovered and commercially classified by Fred Cardway, who has just returned from a six months' tour of business inspection through the continent.

Cardway's trip was made in behalf of the Packard Motor Car company, the purpose being to discover what methods American business men would best follow to establish a good, friendly footing of trade relations.

Cardway says the American desire to make business dealings prompt and entirely practical, from the American point of view, will not do in South America. The man who attempts to sell goods in that manner invariably fails, for the English, German and French people who have extensive trade interests in the South American countries do things more to the liking of the people.

"Your Frenchman, Englishman or German goes to Buenos Ayres or Rio and makes his home there. He becomes a citizen and takes an active interest in the welfare of the city and the nation," said Cardway. "Yet there is no doubt that goods of the American manufacture will be welcomed in South America and at present there are few cars there.

"I found many of the wealthy, educated people of Rio de Janeiro, Buenos Ayres and Montevideo, who were astonished to know that there was such a thing as a twelve-cylinder motor car, or that America produced a motor car that surpassed the cars made in Europe.

"Since the beginning of the war practically no high-grade cars have been sold because of the difficulty of getting them from Europe. It really had not occurred to the majority of South Americans to even consider American-made cars for high-class usage."

MITCHELLS MAKE EXCITING RUN

Two New Models Driven Over 500 Miles Over Hard Winter Roads.

If the several new Mitchell models which were driven for delivery at Grand Rapids the other day had plunged through snow and ice and old Lake Michigan itself, directly across the lake from Racine to Grand Rapids, they could not have looked as if they had been through more of a grueling, from outside appearances when they arrived.

However, the wild ride was taken to Grand Rapids around the lake through some of the stiffest weather of the winter and over some of the hardest roads, through deep snow and roughest going of the winter. These new models are the six-cylinder, seven-passenger touring car and new five-passenger touring car and were driven by George Cornell and M. A. Harbron of the Western Michigan Motor company, Grand Rapids, old, experienced drivers, who said that they never had seen cars come through such trying driving conditions so perfectly.

After battling with snow drifts, and mud, slush and rough roads for over 500 miles, the cars were covered with a coating of dirt several inches thick in many places. They were put right into the washstand and within a few hours were placed on exhibit among the best looking and highly polished cars and claimed by their new owners who were only too glad to get them put through this test and appear as they did as if taken right out of the factory.

W. O. W. Notice.

TEXAS TRUCKS CARRY FREIGHT

72 Miles from San Angelo to Sonora Longest Route.

"Motor truck lines for the transportation of all kinds of freight between the more remote points of western Texas, where railroads are few, are now in regular service," says Vice President W. A. Woods of the Van Cortlandt Vehicle Corporation, metropolitan distributor for Peerless cars and trucsk, and who spent six months last year on the Texas border directing motor truck transportation. "The longest is between San Angelo and Sonora, seventy-two miles. The use of motor trucks on the ranches of western Texas is becoming quite general. Many of the larger landed properties, which are twenty to twenty-five miles from the railroad, find that the transportation of cotton seed cake and other feed stuff for their cattle can be done more economically by trucks than by animal-drown wagons. Some of the more remotely located farmers also are using motor trucks for hauling their grain, hogs and other products to the shipping point and taking back supplies."

Everybody.

If you are interested in "The Cemetery Beautiful," drive out to Park Lawn, Fourth and Gurley streets, today and let me show you the grounds.

If you are not interested, come anyway and be convinced that you should be interested.

If you will phone me, No. 3959, I will be glad to send a car and bring you out to the grounds. A. L. STEIN.

DECORATION DAY DATE OF BIG RACE

Cincy to Start 1917 Racing Season May 30.

Cincinnati will have the honor of starting off the 1917 automobile racing championship with the big race set for Decoration Day, May 30, at the big Sharonville speedway. This definite information has been sent to President Harry Leyman of the Cincinnati speedway by Secretary Kennerdell of the American Automobile association, with the further declaration that this would be the only race run in this section during the year which would count in the award for the annual championship.

It was decided at a meeting of the directors of the Cincinnati speedway that the Decoration Day race, to be designated as the second annual international sweepstakes race, will be for a distance of 250 miles instead of 300 miles, which was the distance in the opening race of the track Labor Day, of last year. The contest will be for a purse of $25,000, to be divided into ten prizes, with the rather opulent sum of $10,000 to the winner. The number of starters in the race will be limited to thirty-two, and preliminary trials at the track will be held for two or three days preceding the race. Only cars that attain a speed of ninety miles or more an hour will be allowed to qualify. The race will be run under the rules governing class E events, which provide for cars of piston displacement not exceeding 300 cubic inches and a maximum weight of 2,500 pounds.

Even at this early date the track is in perfect shape for a race, and it is expected that some of the prominent drivers will arrive before the end of the present month to begin their spring training. Entry blanks will be mailed to prospective starters within a few days, immediately following the receipt of the official papers sanctioning the meet.

Costs Ninety-two Cents to Buy Gas in Paris

The man who runs an automobile in Paris must pay 92c a gallon for his gasoline. The official price fixed for the rarity is 74c a gallon, sold by the twenty-gallon lot and exclusive of the octroi tax entering into the city of Paris and the middleman's profit.

Each automobile owner is allotted a small amount per week, but there are actual instances where automobile owners have paid as high as $2 a gallon for their gasoline, by purchasing it from some one who had either not availed himself of his "gas" or was willing to sell it at a handsome profit.

CHANDLER SIX $1395

Chandler Power IS Power

Chandler power is not power on paper. It is power on the hills and mountain-sides; it is power in the mud and sand.

Four years of skilful and conscientious manufacturing effort have developed and refined the Chandler motor to a point approximating perfection. Chandler owners long ago named it The Marvelous Motor, and now, more than ever before, it is the wonder Six, powerful, flexible and enduring.

On high gear and without apparent labor it pulls the hard steep grades and winding hill roads where other motors shift to second.

In crowded traffic it responds to every demand.

On open roads it answers every call for speed.

The Chandler motor is a fact-motor.

What any Chandler will do every Chandler can do.

The Chandler Company has never built a special demonstrating car.

The Chandler Company has never furnished to any Chandler dealer a special gear ratio.

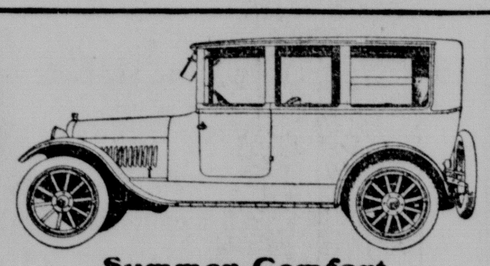

Every Chandler is a demonstrator.

Chandler motor features include:

Solid Cast Aluminum Crank Case Extending From Frame to Frame

Silent Chain Drive for Motor Shafts

Bosch High Tension Magneto Ignition

Summer Comfort Winter Luxury

THE new Chandler convertible sedan offers the most attractive seven-passenger convertible type of body yet produced. This body, Fisher-built, is exceptionally roomy and comfortable. It is deeply upholstered and mounted on springs which absorb all the stress and shock of the roadway. The left side door is immediately opposite the driver's seat so that the driver to get in or out of the car does not have to disturb its other occupants. The auxiliary seats face forward, folding down into the backs of the front seats as in the Chandler touring car, and offer the same comfortable riding qualities. The forward side windows and the door windows lower away entirely by adjustable strap. The rear side windows lower half way by adjustable strap, and are entirely removable as are the window posts. The back panel of the body is of metal, highly finished. The workmanship throughout is of pleasing refinement.

No Inflation In Chandler Price

If we asked one hundred or two hundred dollars more, the Chandler would still be *under-priced.*

Where many makers have added as much as three hundred dollars to their selling price within the year just past, the Chandler price is only one hundred dollars higher than the sensational low price established more than two years ago.

There is no inflation in the Chandler price.

And if we asked you to pay hundreds more *just because we thought we could get it,* that would not make the car better.

FIVE PLEASING BODY TYPES

Seven-Passenger Touring Car, $1395
Four-Passenger Roadster, $1395
Seven-Passenger Convertible Sedan, $2095
Four-Passenger Convertible Coupe, $1995
Luxurious Limousine, $2695

Choose The Fact-Six For Your Six

HERRICK HARDWARE COMPANY

NORTH SIDE SQUARE, WACO, TEXAS.
Distributors for Hill, Limestone, Falls, Bell, Coryell, Hamilton, Bosque and McLennan Counties.
GOOD LIVE AGENTS WANTED FOR ABOVE TERRITORY.

CHANDLER MOTOR CAR COMPANY, Cleveland, Ohio

Down Auto Row

W. E. Brown, in company with W. G. Homan, representing the Nash Motors company, have in the past week visited some of the territory controlled by the local distributors, viz., the Brown Auto company, and report business exceedingly good, and the crop prospects in practically all the territory visited look much better than usual at this time of year. The farmers seem to have realized the importance of planting larger gardens and truck patches and these were looking fine everywhere. The people are much more optimistic about the war conditions in practically every section than is generally supposed by a person who has not been over the country.

Messrs. Brown and Homan had a much better business than was even hoped for, and the best evidence of this is that they placed dealers in every county visited and in most instances found the dealers very eager to have an opportunity of securing the Nash and Harroun agencies. The following dealers have been appointed: L. H. Walter, Hill county; W. H. Lucas & Co., Falls county west of the Brazos; Cal E. Kerr, Navarro county; Brady & Black Hardware Co., Bell county; Moody Motor Car company, parts of McLennan and other territory; G. M. Carlton Bros. & Co., Hamilton and Coryell counties. In all, contracts were made for over 125 cars. Deliveries on the Nash-Jeffery are now being made promptly and the Harroun factory started production last Monday, which will enable dealers to get their demonstration cars in a very short time. These gentlemen were very much pleased with the outlook and were enthusiastic over the interest taken in these lines of cars. In some cases the dealers secured were at present handling other makes of cars and some new blood has entered into the business, but in each instance the dealers secured were good substantial business men, and men that will get results from these valuable agencies.

According to M. W. Carroll, Jr., of the Spencer-Carroll company, this concern concluded a very fortunate stroke of business when they secured the distributing rights for Texas, Oklahoma and Louisiana for the Heinze-Springfield electric starting, lighting and ignition system for Ford cars. These starters, says Mr. Carroll, are used by the managers of three of the four Ford branches in Texas and by the assistant manager of the fourth branch on their own cars. He also says that a large majority of the Ford dealers over the state use them on their Ford cars.

J. C. Kilgore Co. &are local distributors for the Heinze-Springfield. In speaking of this starter, Mr. Killgore said: "The real points about the Heinze-Springfield starter that attracted me to it are four in number. It is a built-in system, not a mere attachment, and when installed really becomes an integral part of the car itself. Then it does not lessen the engine power so that any difference can be noted outside of a laboratory. It is thoroughly dependable, and it is simple, convenient and compact."

Mr. Carroll says that letters coming in every day from dealers all over the state speak in enthusiastic terms of the Heinze-Springfield.

A pick-up in business and a general tendency of prosperity was felt toward the end of the week by the auto and accessory men of Waco. The dealers attribute this improvement to the rains which have fallen throughout the territory in the past few days. Carload shipments are being unloaded very nearly every day and the local agencies are making prompt deliveries to those who have placed orders.

Open cars and new types for summer are being shown on the floors of the sales rooms and each factory seems to be endeavoring to put out several models that will appeal to the eyes of sport car fanciers.

The tire and accessory men are loading up with heavy stocks and the slogan of the entire field is "to have anything the customer wants at any time he wants it." The last week has been a busy one with these men and every one that has not bought a new car is dressing their old one up.

McLendon Hardware company report conditions favorable even though the war is on. The following cars were sold by them in the last fifteen days: Miss Allie Gill, Mart, Cadillac touring; Judge Tom L. McCullough, Cadillac touring; Howard-Carnes company, of Moody, Chalmers touring; Shaffer & Roach, McGregor, Chalmers touring; W. B. Goolsby, Waco, Chalmers roadster; Howard-Carnes company, Moody, Chalmers touring; Central Garage, Bremond, Chalmers touring; M. E. Albrecht, Bartlett, Tex., Chalmers touring; Robert McLane company, Cameron, 1½ ton Wichita truck; Robert McLane company, Cameron, 2 ton Wichita; City of Waco Cadillac.

Walter Roach, general manager, and J. W. Hendrix, sales manager, Overland Sales company, this week made a 300-mile trip over the territory controlled by them west of Waco. Their trip included the towns of Gatesville, Lampasas, San Saba, Goldthwaite and Lometa. They report it dry around San Saba and Goldthwaite, with conditions better closer into Waco. They report a nice business in their line and did not find that the war was affecting conditions to any extent. Since their return they have been informed by their dealers that good rains have fallen in the territory covered on their trip.

Five carloads of Studebakers have been unloaded in the past week by the F. L. Shaw company, and they now have sixteen new cars on the sales room floor. The majority of these cars have already been sold and deliveries will be made at once. One of the most attractive sport models seen this season is on display in the sales room. The car is of a deep blue color and is a three-passenger roadster of the club car type. Only two cars of this model have been received in Texas and Waco is fortunate in having an advance style of automobile on display.

The Bain-Velie Automobile company are in receipt of a factory letter stating that their distributors have deluged them with business and that the increase on their shipments is far beyond their first estimates and also that their home territory has opened up a month earlier than usual. They also report visits among several delegations of prospective buyers being brought in from middle West cities by dealers. They state that they expect to make deliveries in their usual prompt manner and that the policy of first come, first served, will be used.

The Nash-Jeffery car used by the Brown Auto company to make the territory which is controlled by them created much interest in every town in which it was shown, and in every instance where it was driven by a dealer it was very highly complimented for its excellent performance, and quietness and absence of vibration of the motor. This car will doubtless be a good seller wherever it is represented.

C. A. Stone, formerly with J. C. Killgore & Co., but for past ten months in New York, connected with a big magneto and electrical equipment company, has returned to Waco and is again with Killgore company and better fitted than ever to take care of the electrical troubles of any car.

The Brown Auto company reports that they have been able thus far to get satisfactory shipments on the Nash-Jeffery line of cars and will soon have other shipments en route from the factory, and that they expect, at an early date, shipments of the Harroun car to begin.

Murray Bros. delivered the following Harley-Davidson motorcycles the past week: W. V. Browning of Waco, electric equipped motorcycle and sidecar; Charley Eulenfield, a Harley-Davidson motorcycle. They state they received another electric equipped Harley-Davidson motorcycle Friday evening.

The Republic truck sold by the Percy Willis Auto Company is gaining in popularity every week and of late has been subjected to a number of difficult tests, showing up remarkably in every instance. The use of trucks for all kinds of hauling is now becoming almost a necessity and the field for this popular truck is growing larger each day.

Herrick Hardware company report a busy week and state that the rains over the country have added to the interest of their business in a number of ways. The Buick and Chandler car is very popular and as fast as a shipment is received they are promptly turned over to waiting customers.

The National cars are making a hit in Waco and the new models are distinctive in appearance. This famous car is sold by E. S. Collier of the National Motor Sales company and he reports that the auto buyers of Waco are interested in the new Nationals.

Mr. Scow of Scow Brothers, Clifton, was a Waco visitor Friday. Mr. Scow is the Maxwell representative in that vicinity.

Prosperity continues to hang out with the Overland people and the local distributors say that the car is meeting with favor on every side. The sales throughout Waco and this vicinity are all that could be asked and the factory shipments are coming in with regularity.

V. M. Washam of the Maxwell Sales company reports a profitable week and says that the Maxwell people are making prompt shipments in almost every instance. A carload of these popular cars are now on the road and upon their arrival it will be the last shipment at the present price. A $30 raise goes into effect on the first of May.

Dr. A. P. Snodgrass, a brother-in-law of Mayor John Dollins, purchased two Maxwell cars while in the city last week. He stated that one was for his wife and the other would be used by him on his country trips. Dr. Snodgrass lives at Desdemonia.

Speaking of the growth of the auto industry, John Hendrix, sales manager of Overland Sales company, says that it is a pleasure in traveling to find so many well equipped garages.

J. J. Crouch, representative of the Maxwell company, made a trip to the China Springs section last week and reports that the farmers in that section are jubilant.

John Hendrix and Harry Smith spent Saturday in Moody and McGregor, taking with them the full line of Overland cars.

Harley Swink, parts man at Overland Sales company, spent Friday in Temple in the interest of Overland service.

A. B. Craven of West was in the city for a visit last week. Mr. Craven reports several Maxwell sales in that part of the territory.

V. M. Washam made a trip to Dallas last week to negotiate for extra shipments during the month of May.

A set of high grade band instruments at about one-half price. Instruments of all kinds repaired. Prices reasonable. Charles Parker, Waco, Texas. 508 1-2 Franklin St.

MOBILIZATION OF AUTO'S USE IN WAR TIME

Plans for the mobilization of the automobile industry and of privately owned automobiles and motor trucks so that the country's needs in war time may be served in the best manner possible are now being worked out by the motor reserve committee of the council of national defense.

What can the automobile manufacturers do?

What can the owners of motor vehicles do?

By these two questions the work of the committee is divided into two great departments. The answer to the first is already known in its main outline, for an appraisal of the resources of the automobile industry for war was started more than a year ago at the instance of the National Chamber of Commerce and the Society of Automobile Engineers. This answer is that the industry stands ready, and is able, to supply motor equipment for the army as fast as troops are raised. Trucks can be turned out at the rate of 5,000 a month if needed, which in one month would supply more than twice as many as were used by the army on the Mexican border and in Mexico. Passenger automobiles can be turned out at the rate of 12,000 a month. This production could be quickly increased, but at the present rate in less than a year one passenger automobile will be manufactured for every man in an army of 1,000,000. The total output of motor vehicles in this country last year ran to 1,500,000.

This state of complete preparedness of the automobile industry disposes of the question as to whether in the raising of a large army in this country it will be necessary to commandeer privately-owned automobiles, as was done in Europe at the beginning of the war there. It will not be necessary, unless some unexpected emergency requiring the quick movement of a large body of troops should arise. It is in preparation to be ready to meet such an emergency that the motor vehicle owners of the United States are to be given an opportunity to answer the question what can they do to serve their country in time of need?

According to the plans of the motor vehicle reserve committee all the motor vehicle owners of the country are to be asked to list their cars for use in time of an emergency, and a systematic organization of those who volunteer is to be made. There are in the United States more than 3,500,000 motor vehicles, and if not more than one-third are listed for use in this motor reserve corps the total will be greater in number than all the motor vehicles in the other countries of the world, estimated to be 800,000.

Alfred Reeves, chairman of the motor transport reserve committee and general manager of the National Automobile Chamber of Commerce, said: "From surveys already we feel assured that our manufacturers can supply motor vehicles as fast as the war department will call for them in the equipment of new armies, so that the only need for privately owned cars would be to cope with some sudden emergency—as the requirement to transport a large body of men swiftly to an unexpected point. We know that at some of the most exposed parts of the country the railroads have not the facilities for carrying the men in a hurry. To move 40,000 men would require 10,000 autos. The cars required to move such a body of men, not a large force to repel an attack, could only be obtained from private owners. It would not be practical for the war department to hold so many cars in reserve. Usual developments, the expected, the foreseen, can be met; it is readiness to meet great and sudden emergencies that is the final test of preparedness. This readiness in motor transportation for emergency war work the private motor vehicle owners can supply. Such a call for emergensy transportation is not likely to arise, but it is well, as I have said, to face all possibilities in advance.

"Our plans have not been worked out in detail and will be submitted to the authorities at Washington before they are made public, but it is expected that our organization will be expanded so there will be a representative in each state, and we purpose not only to gather information as to road conditions, what they will stand up under, especially main line routes.

"We have no doubt that there will be a great patriotic response to whatever we may ask. In fact, since the first meeting of the committee at the office of the secretary at Washington we have had many telegrams and letters offering to co-operate in any way possible. All the expense of this work, our directors have decided, will be borne by the National Automobile Chamber of Commerce."

To the Citizens of East Waco.

Metric System Adopted by Goodyear Tire Concern

The Goodyear Tire and Rubber company of Akron, Ohio, has declared for the metric system of weights and measures, with the view to adopting its use as far as possible in all its work. The company is a member of the American Metric association, a society for the promulgation of this system.

Classes in the Goodyear factory school have been organized among the foremen and inspectors of the plant, that they may become thoroughly familiar with a system, prior to its application to the activities of the factory.

The metric system is now the standard in all countries of Europe, and has the same advantage over our method of weights and measures with their units of inches, pounds, quarts, etc., that our system of coinage has over the pounds and shillings of Great Britain, or the francs and sous of France.

Our United States monetary system, with its decimal denominations, is really a division of the metric system, and since its use has been found so satisfactory in our commercial life, the wonder is that we have not long ago adopted the use of the metric method in determining all our weights and measures.

All the tires that American rubber manufacturers are now exporting to other parts of the world are stamped in millimeter sizes. In measuring liquids and solids the cubes of these units are used.

In all probability the metric system will become the standard throughout the world within a few years, and its adoption by the Goodyear Tire and Rubber company is in line with that company's policy of always keeping abreast of the times.

AKRON'S GROWTH.

In half a century the city of Akron, Ohio, has grown from a village of less than 10,000 to a city of 120,000 people, one of the most prosperous cities of the United States, and the acknowledged rubber manufacturing center of the world. The city has been successively known as the Oatmeal City, the Match City, the Mower and Reaper City, the Sewer Pipe City and the Rubber City.

It is interesting to note that J. F. Seiberling, a large manufacturer of agricultural implements, who, years ago, made Akron known far and wide as the Mower and Reaper City, was the father of President F. A. Seiberling of the Goodyear Tire and Rubber company, who has done much to make the city known the world over as the Rubber City.

WARNS OF TIRE INFLATION.

"Now that real weather is returning and the cars are getting into active service all over the country, it seems timely to give car owners a little reminder as to tire inflation," says H. G. Palmer of the Goodyear Tire and Rubber company, Akron, Ohio.

"Underinflation is always costly to the tire user. Underinflation is often indulged in as a luxury. Like all other luxuries it is usually expensive. It is our desire to enable and to help, wherever possible, every Goodyear tire user to get the most miles possible from his tires. We might make more sales and more profits if tires were used up as quickly as possible, but we are believers in the kind of business built on satisfactory service. We urge Goodyear tire users to let Goodyear Service Stations help them get more miles from their tires. Our service stations are there for that purpose just as much as they are there to sell goods. Get their advice as to inflation. Submit to their inspection. Start the summer driving season right.

"If you have underinflated your tires because you have feared that higher pressure might injure them, this may interest you:

"We have often inflated tires to a pressure of several hundred pounds per inch in our factory, for experimental purposes—'just to see what would happen.' We have never yet burst a single tire that way. In every instance either the rim or something else has given way first. So recommended pressures are safe pressures. It is also true that hot weather effect on tires—the expansion of contained air by summer heat is not at all dangerous. We have made careful tests, to determine that point exactly.

"A table giving the proper air pressure is available at every Goodyear branch or service station."

National Boundary Trail Blazer to Stop in Waco

Within a few days the trail blazer for the National Boundary Highway will be here. The trail blazer car a Saxon four roadster, left Washington the day after the inauguration and has been on the road ever since, traveling as close to the boundary as roads will permit.

The proposed highway, which is being chartered by the car, will traverse the rim of the country, and it is being laid out in response to a demand from all parts of the United States for a roadway of this kind. When completed it will be the longest motor route in the country and its way will cover practically every kind of scenery and climate to be found within the limits of the states.

The trail blazer will stop here, according to advices received from local dealers.

Car and Mechanic at the service of Studebaker owners—FREE.

"Johnny on the Spot"

¶ If your car is standing on the street unlocked and "Johnny-on-the-Spot" is passing, he will stop and make a quick inspection of your machine.

¶ He will run your motor to see if the starter is in perfect condition and the motor running alright.

¶ If you are out of oil, he will supply you.

¶ If you are out of gasoline he will give you enough to get to a service station.

¶ A dozen other things he will do without charge.

¶ A tag outlining the service rendered will be left attached to the windshield.

¶ This in addition to our Definite Service Agreement to Studebaker Owners.

¶ When a STUDEBAKER car is delivered to a purchaser he receives a card, showing a series of Seven Service Dates, running over the succeeding six months. When it comes into the shop—expert mechanics go over it from "stem to stern" and make over sixty distinct and agreed upon inspections—oiling and adjustments such as the car may need.

¶ When it comes back to you it is in "tip-top" shape, and we teach you how to keep it so. This is done once a month for six months, and by the end of that time you not only have a car that is running like a clock, but you know how to take care of it yourself. Remember—there's not a dollar's charge for this Service.

¶ It is a service that really cares for you and for your car—it is definite—not a promise or a guess—not a now and then inspection, but such that protects you and insures your getting 100 per cent pleasure and usefulness from your automobile.

ALL OF THE ABOVE CONSTITUTES THE SHAW SERVICE.

Equipped with supply of gasoline, oil, tires, tubes, air tank, jacks, ropes, tools, everything for "quick action"

We do not sell everybody that sees the Eighteen Series 40, h. p. car—a machine that looks and performs like many of the $1300 to $1500 cars, but we have the satisfaction of knowing of several who did not buy who wished they had after running for two months the car they purchased.

'NIGHTINGALES,' THE ARMY MULE, LOSE FOOTHOLD

Army "nightingales," known to the novice unschooled in the trooper vernacular as mules, are losing their foothold in Uncle Sam's field forces. The sure-footed animal that carried the machine guns of the cavalry and infantry regiments through the hills, jungles, swamps and morasses of the Philippines and toted the unlimbered pieces of infinite fire capacity across the desert places of Mexico with Major General Pershing in his record-breaking drive against Villa is doomed to give place to the little old, much ridiculed Ford car. Already hundreds of machine gun troops have had the "nightingale" taken from the picket lines and Ford cars with specially made carriages brought up.

One of the regiments to go to the Mexican border, equipped with caissons and carriages, Ford motor driven, was the Seventh Illinois, a Chicago unit. Public spirited citizens bought and presented the fighting Seventh with Fords and a new Chicago accessory company furnished tow attachments that made the Ford stand as the most efficient vehicle for the portage of machine guns, ammunition and small arm supplies. The Advance Auto Accessories Corporation, then a small organization, put Myle Maykers on every car that went to the border with the regiment. This device corrected every inefficiency in the Ford carburetor, eliminated carbon in the engine, gave the motors more power and flexibility and saved gasoline. The company had just secured the patent rights on the device. It also put cork insert transmission linings into the cars and made them start and stop with a smooth, sure and safe action. With the hard service on the border the linings proved to outwear any other make.

Until that time the company was not well known but it has now quadrupled in size and importance and has branches out in the national field and has recently inaugurated a nation-wide advertising campaign, with the ultimate object of giving Henry Ford a boost by installing Myle Maykers and cork inserts in every Ford car.

A branch office has been opened in New York at 1919 Broadway, by James Ferguson and M. C. Lawrence, for the introduction of the articles to the accessory jobbers of the east.

Herrick-McLarty Co. Report Good Sales

These are the sales reported by Herrick & McLarty Auto company for the past week: Dr. G. V. Brindley, 5-passenger Paige Linwood Six, Temple; McNeill Hardware company, Valley Mills, carload Chevrolets; Clay & Gillmore company, Moody, one 5-passenger Chevrolet; West Furniture company, West, carload 490 Chevrolets; Waco Sash and Door company, 490 Chevrolet; L. A. Bletch, Otto, Patterson Six; Fred Miller, Riesel, four 5-passenger Chevrolets; W. F. Pottinger Auto company, Hillsboro, carload Chevrolets; Mount Calm Hardware company, Mount Calm, carload Chevrolets; R. E. Powell, Gatesville, carload Chevrolets; West Furniture company, Oakland Six; Blake Bailey, Lott, carload Chevrolets; S. E. Carothers, Waco, Paige Six Stratford, 7-passenger; C. H. Phillips, Lorena, 490 Chevrolet; S. Amsler & Co., McGregor, carload Chevrolets; W. C. Griffin, Waco, 490 Chevrolet; Paul Schultz, New Baden, carload Chevrolets; H. R. Bevill, Groesbeck, carload Chevrolets.

Protect Car Owners from Defective Parts

Among the numerous machines devised for the express purpose of protecting the motor car owner against defective materials or workmanship is the transverse testing machine used in the physical laboratories of Dodge Brothers works in Detroit. It differs from the ordinary testing device in that it checks up both on the quality of work done in the foundries and on the quality of the material.

Sample bars of cast iron and aluminum are taken from every "heat" and subjected to a thorough examination under this machine, which obtains its name from the fact that it records the transverse strength of the bar under test. A delicate needle tells the laboratory man exactly what resistance the bar is capable of giving while under pressure. Although the hardness, depth of chill and amount of shrinkage on cast iron are also determined, this does not complete the tests as the bars are then analyzed in the chemical laboratories.

This method of checking up is typical of the countless quality tests that go with the making of Dodge Brothers motor car.

First Car Fights Snow Into Yosemite

After weeks of hardships and perseverance, a Studebaker crew has reached the floor of the Yosemite valley, and the Chester N. Weaver company, San Francisco distributors of Studebaker cars, is entitled to the Desmond silver trophy offered as the prize for the first car to get into the Yosemite.

The following dispatch has been received at the offices of the Studebaker corporation, South Bend, from W. B. Lewis, supervisor of the Yosemite National park:

"The Studebaker boys, driving a six-cylinder, seven-passenger 18 series model Studebaker, have arrived at the Sentinel hotel, Yosemite valley, the first car to arrive in the valley this year. Car made the trip from San Francisco via the Coulterville road, carrying 'A-1' license plate."

During a recent heavy snowstorm in the mountains, Weaver thought the boys who were driving the car were either lost or had suffered serious injury. For many days no word had been received from them, and until a lion hunter employed by the United States government to shoot wild animals on the Yosemite reservation brought the news that he had encountered them at the Merced grove of big trees checking station, Weaver had no idea of their location.

According to the report received by telephone from the crew, the battle with the muddy roads and deep snow was a severe test for the sturdy little car and the men who were piloting it.

Weaver sent out the car in order to thoroughly test the power and strength of the motor and the machine itself. He is well satisfied now that the new series 18 Studebaker is able to withstand any sort of hard driving to which it may be subjected.

Fighting its way through soft snow and over roads which were practically washed away, the Studebaker behaved beautifully, according to the statement of the boys in charge of the trip. Any one who is accustomed to mountain driving can well appreciate what the crew and the car had to go through. Under ordinary conditions, when the roads are in fine shape and the weather is perfect, the trip into the Yosemite valley via the Coulterville road is one which requires careful driving. When this narrow mountain road is banked with snow and in spots has no bottom, owing to the soft mud, it takes a staunch car and a nervy crew to reach the valley.

It has been a great fight each year to see who could master the huge snow drifts first and the honor has fallen on Studebaker for the fourth consecutive year. The trip this year was made more difficult due to the extremely heavy fall of snow, which is the heaviest on record in the Yosemite region.

Gets Out Timber Where Teams Fail

Because a Jeffery Quad proved its ability to negotiate the heavy mud roads leading into a tract of timber near Erie, Pa., after teams and rear-drive trucks had been abandoned in despair, the Conneaut Shovel company of Conneaut, Ohio, saved 40,000 feet of first quality white ash.

"We purchased this timber under a contract with a teaming concern to haul the logs into Erie at $7.50 a 1,000 loaded on the train," said G. W. Benton, secretary, treasurer and manager of the Conneaut Shovel company, in a letter to C. W. Nash, president of the Nash Motors Co.

"The teamsters went into the woods with three big teams and worked two months. At the end of that time they had made no advance and we were forced to loan them money to continue their contract, incidentally raising the price per thousand to $10.50. They finally threw up the contract.

"We then tried to sublet the job, but found that it was impossible to get any one to undertake it. I called a directors' meeting and laid the case before them. They suggested trucks. The writer went personally to several of the big motor truck factories and asked for demonstrations. But I found that none of the rear drive units could hope to cope with the problem. Then I went to Kenosha and saw a Jeffery Quad perform.

"When we tried the Quad on the timber we found that we could bring the logs from Erie, we found that we could deliver to our factory for almost the same amount that it would otherwise cost for just hauling it to Erie and loading it on the train. In other words, we effected a saving of $7 a thousand in bringing in this lumber."

AT THE HEAD OF THE TIRE PROCESSION

Firestone Tires

Have held their place at the head of the tire procession for many years, and their leadership today is greater than ever.

In Cord or Fabric construction they give a new experience of riding comfort with unequaled style.

"Most Miles Per Dollar" and most luxury per mile are indisputable selling arguments for us, and buying arguments for you.

Let us equip your car with a set of FIRESTONE Tires. You'll say it is the finest service we ever rendered you.

Studebaker

The Studebaker SIX

—An Investment

WHEN you buy your next car use the same care, the same caution as you would if you were going to spend your money for a home or an interest-bearing or profit-sharing investment.

Almost any car looks well and runs well at first. *You* want a car that looks well and runs well six months, a year, two years after you buy it.

On this basis a Studebaker SIX is a sound investment.

Its original cost is moderate. Later on, should you care to "liquidate" you will find that the price of a used Studebaker is much higher in proportion to first cost than that of most cars.

If you do not sell you will find the operation cost of your Studebaker for a year or two years to be far less than other cars.

Because of the splendid quality of the Studebaker.

Because of its remarkable accessibility in case of inspection, adjustment or repair.

Because in ratio to its power it is the most economical car on the market in gasoline consumption.

Because its perfect balance insures extraordinary tire economy—a single set of tires frequently runs 8000 to 10,000 miles on a Studebaker.

Because new parts can be obtained at lower cost than you pay for the parts of other cars of equal value and quality.

The Studebaker pays you dividends—not only in comfort and pride of ownership, but keeping down expenses year in and year out.

For these reasons thousands of prominent business men all over the country bought Studebakers on the very day the series 18 was announced.

What better guide can you have in the selection of a car than the knowledge that your car is the choice of the shrewdest judges of automobile value in America?

Come in and let us show you some of their names.

COLD SHOULDER FORD IN BRITISH MOTORDOM NOW

British motor manufacturers are opposed to the issuance of a permit to Henry Ford to establish a factory at Cork, Ireland, according to E. Manville, president of the Association of British Motor and Allied Manufacturers. The protest is based chiefly on the assertion that in the granting of the license facilities are unnecessarily given to a foreign firm to do during the war what is necessarily denied to British manufacturers.

Some months ago the Ford interests purchased a large tract of land at Cork and plans were made for the erection of a large plant there, and at the same time an application was made to the British government for the required license. Mr. Manville's protest is published in the London Times of March 23, before the United States joined with the allies in the war, and is as follows:

"As doubtless you are aware, the government has granted a license to a well known neutral motor manufacturer on terms which are substantially as follows: The license is granted to Henry Ford to erect and equip a large factory in Cork under the conditions that the materials required must be imported by Mr. Ford, that the standard rates of wages must be paid, and that nothing except agricultural motor tractors may be produced by the factory during the period of the war.

"It is believed that the ostensible reason for the grant by the government of such a license in these times is the urgent need for the supply of agricultural motor tractors. This association takes the greatest possible exception to any such license being granted at this juncture to any foreign concern, for the reasons that: (1) It is highly unlikely that any such factory as that projected can be constructed and set to work so promptly as to produce an output before the probable end of the war; and (2) agricultural motors can be obtained from existing works abroad in a finished state and ready for operation without any new factory here, or the delay involved in the construction of such a factory, being rendered necessary.

"In the opinion of the members of this association, a grave injustice will result to a large section of the motor industry of this country if the government adheres to its present position in the matter. It is true tha he license prohibits motor cars being produced at the proposed factory until after the end of the war, but having regard to the fact that it is unlikely that these new works will be in active operation before that time has arrived, this prohibition amounts to very little. On the other hand, it is certain that by the granting of this license facilities are unnecessarily given to a foreign firm to do during the war what is necessarily denied to British manufacturers. These latter will thus find themselves oppossed by a concern in full working order, able to turn out large quantities of motor cars so soon as peace arrives; whereas, after that time, a considerable interval must elapse before the British manufacturer can complete the work of reorganization. He will then find his market monopolized by a foreign concern to which special facilities have been granted. Further, it is at least likely that this projected factory will be run largely by the introduction of foreign labor, accentuating thereby the difficulties of providing employment for some portion of our demobilized army.

"Nothing could well be more opposed to the present commercial policy of this country and its allies than the encouragement of foreign undertakings here at this time. Nevertheless, this particular instance is rendered a great deal worse by the fact that so many of our motor manufacturing concerns have been taken off their usual work to manufacture other articles urgently required by the nation, and it is, indeed, a poor return to them that the state should, while they are so engaged, encourage premature foreign opposition, possibly to their complete undoing. The loyalty of this industry in view of the exigencies of the times has been so amply demonstrated that it is unnecessary to dilate upon it here. No body exists in this country which is more willing to make sacrifices for what may be fairly regarded as essential in this time of national stress. But, seeing that the agricultural motor machines in question can so readily and with such comparative advantage be imported already manufactured, it is felt that the injustice involved in the granting of this license should not be allowed to be perpetrated without the strongest possible objection being made."

Jeffery Factory Rushed With Immediate Orders

Because of the great inrush of orders for Jeffery all-purpose and quad trucks during the past thirty days, C. W. Nash has called a conference of his factory heads and ordered truck production doubled. At the same time a definite manufacturing program was decided upon for the remainder of this season, and the season to come, which includes the production of a greater number of Jeffery trucks than the factory has ever built pleasure cars in a single season.

In commenting on the situation Mr. Nash says: "Particular credit is due to our Eastern dealers, who have been active in spite of the critical conditions they have had to face because of the railroad situation. Trucks have been been driven overland as far as Pittsburg. Carload after carload of all purpose trucks have been shipped to points east of Chicago by express. In many instances combined truck and pleasure car shipments have gone forward in trainload lots to avoid the freight embargoes.

"Truck are no longer regarded as a side line by progressive dealers. Those who have established exclusive truck sales organization of their own are now reaping a rich harvest as a result of their foresight. Those who have not foreseen the possibility of this market are now working overtime to establish an organization to handle this now important phase of business."

Jeffery dealers have already sensed the great demand for Jeffery trucks and have flooded the factory with telegrams calling for immediate shipments in quantities ranging from eight to ten carloads down to single unit shipments.

Albert C. Johnston has moved his law office to 203-4 Praetorian building

STOP, LOOK AND LISTEN CROSSING RAILROAD TRACK

What do you do when you drive your automobile to a railroad crossing?

Um, huh. Oh, yes; I see; you stop; look both ways to see that there is no train approaching, and then you proceed carefully across the track.

Now, Mr. Careful Motorist, you never realized how rare you are—how different from the other drivers, did you?

Just take a look at these facts which come from the Southern Pacific railroad:

Five hundred and twenty-five drivers smashed through the gates when they were down at the crossings and the bells were ringing a warning.

Sixty-nine and one-half per cent of the 20,000 cars observed looked neither to the left nor right.

Two and seven-tenths per cent took the pains to look both ways.

Twenty-seven and eight-tenths per cent looked one way along the track.

Nineteen and three-tenths per cent, or 3,301 cars, dashed over the track at a reckless speed. And—here is where you see how wonderful you are—thirty-five drivers of the 20,000 stopped their machines before crossing the tracks, to make sure that no trains were approaching.

The Dort car took part in some train versus auto tests last week that demonstrate why the motorist must watch the railroad crossings and not leave the burden to the man in the cab or to a watchman that may or may not be on duty.

A Southern Pacific train pulled by an Atlantic type engine and made up of eight passenger coaches making a total train weight of 750,000 pounds, was used in the test with the dort. An engine was not used alone because it would serve no practical purpose and for the surprising reason to laymen offered by R. J. Clancy, assistant to the general manager of the Southern Pacific, that an engine cannot stop as quickly as the engine and train.

The first test was made at fifty miles an hour and the train came to a stand in 1,200 feet. This speed, although equalled by many on the highway, is an exception, and to make the comparison more practical, no similar test was made with the Dort. Following are the distances required to stop the train and car at speeds of forty miles an hour, twenty-five and fifteen:

Forty miles an hour—Dort, 22 feet; train, 900 feet.

Twenty-five miles an hour—Dort, 12 fee, train 500 feet.

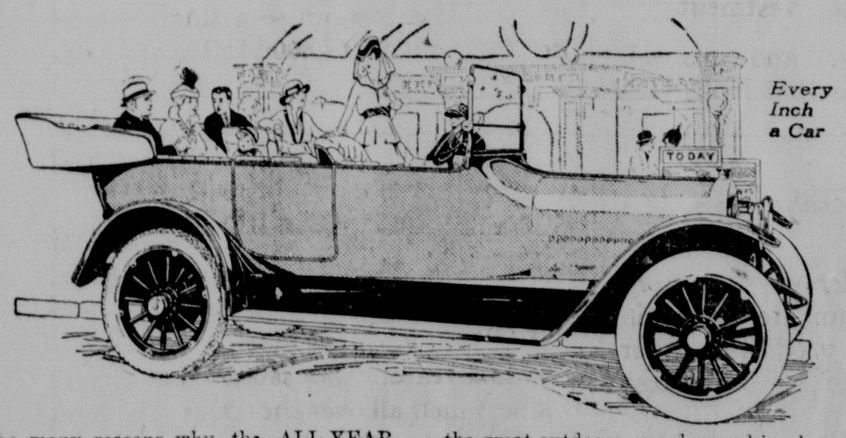

Fifteen miles an hour—Dort, 4 feet, train 300 feet.

In addition to demonstrating the worth of the Dort in braking power, the test proves as a demonstration the general proposition that the automobile driver is the one who has it in his power to avoid crossing accidents if he takes even small precautions.

Kissel's Original Idea that Changed the Motoring Habits of a Nation

Every Inch a Car

The many reasons why the ALL-YEAR Car has steadily maintained its leadership over others is obvious on examination and comparison. Its supremacy is as unquestioned in the trade as its origin.

The rock-bottom superiority of the ALL-YEAR Car lies in the fact that it is **built in—not on**.

Every Kissel Gibraltar Body is constructed jointly with an ALL-YEAR Top, the only method through which a perfect dovetailing of body and top is possible.

It is a **complete** car in summer—no permanent roof to mar the fullest enjoyment of the great outdoors—no dropped-in glass windows to rattle and annoy.

It is a **complete** car in winter—no projections inside or out—no overlapping of top or other earmark of makeshift—no draughts or leaks—a warm, comfortable, perfectly ventilated and refined closed coach.

It is mounted on two great chasses—the HUNDRED POINT SIX, which has won hearty approval since its introduction last fall, and the wonderful new DOUBLE-SIX, a revelation in twelve cylinder construction.

Mechanically these cars are as distinctive and superior in their respective classes as in the Kissel ALL-YEAR Top features in its line.

Rouse & McGhee, Distributors

A Push on the Button

Starts the Engine Without Fail Every Time

SOLD ON A POSITIVE GUARANTEE

How much more *easy* and *convenient*—how much more *safe* and *sure*---this is than the old back-breaking, hand-blistering, temper trying method of cranking your Ford by hand.

Simple, Compact, Durable, Elegant in Appearance

Each Heinze-Springfield

Starting, Lighting and Ford Ignition System

HAS THIS COMBINATION

Of Dash Switch, Ammeter and Dash Lamp, conveniently placed on the cowl, to the left of the steering post.

A two-unit, six-volt, single-wire system, with Bendix drive, designed especially for Ford cars.

Nothing is visible when hood is closed, and equipment does not interfere with the removal of the Ford cylinder head, for valve grinding.

Can be installed complete in four hours by anyone familiar with ordinary tools.

Lights steady and brilliant at all times and at all speeds.

Cannot detect the small loss in engine power except by laboratory tests.

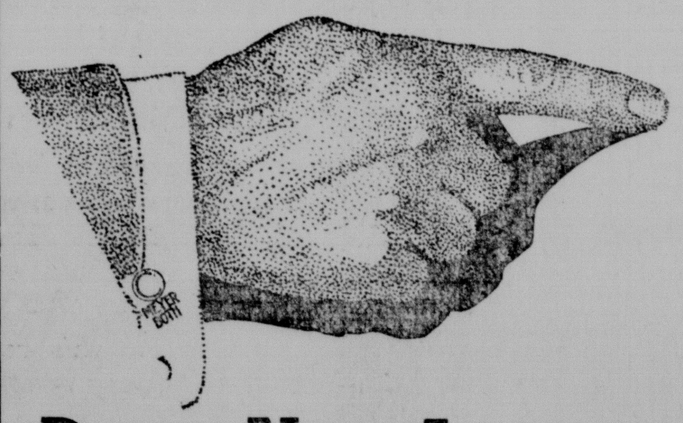

Heinze-Springfield patented mounting plate and chain adjustment insures absolute quietness and prevents broken chains.

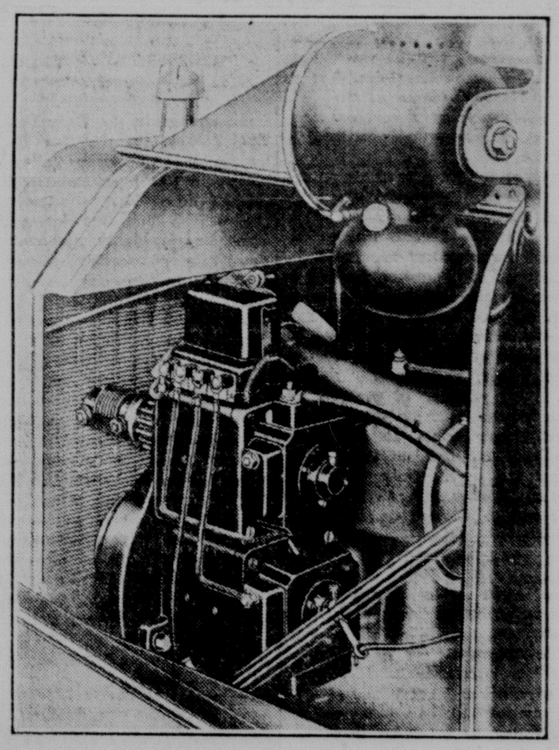

The Original Two-Unit

Ford Starter

Six-volt system, with Bendix drive, is the Heinze-Springfield. All parts furnished complete for installation—including Ammeter, Dash Light and Electric Tail Light.

The all metal choker, operated by foot, insures quick and positive starting.

Does Not Lessen Engine Power!

The two-unit principle, light weight, and low generator speed eliminates the excessive power drain on the engine—such as is occasioned by some types of starters.

The Heinze-Springfield is a "Built-in" System and becomes an integral part of the car on which it is placed. It is NOT a mere attachment.

RULES OF ROAD AGAIN POSTED

Rules for the road once more stand out in interest with the approach of the touring season. The set which follows has been prepared for distribution by the Chicago Motor club:

BE MASTER OF YOUR CAR AT ALL TIMES.

When approaching another automobile at night, coming from the opposite direction, slow down and turn down or turn out your glaring headlights.

Use caution when driving off of the main road into the grass. Bad culverts or loose sand and dirt will cause an accident.

Don't attempt to turn out of ruts while under speed.

Remember, at the bottom of each hill you will usually find a culvert, some good and some bad; don't take a chance.

Be considerate at all times. Other users of the road have equal rights with you.

Freshly oiled roads are dangerous—drive slowly.

When approaching a fractious horse, stop your car, kill your motor, get out and offer to assist in leading the horse by.

Never under any circumstances drive fast approaching or passing a school.

Upon signal from the rear, pull over to the extreme right and allow him to pass. The law compels your courtesy demands it of you.

Spasmodic spurts of speed are dangerous. Hold the speed of your car steady around twenty miles an hour and you will get there more quickly, safely, pleasantly and at less expense.

Speed means serious and fatal accidents, increased tire and repair expense, nervous prostration, loss of appetite, loss of money, time and pleasant disposition.

In case of accidents get the name of every witness and immediately draw a diagram of the position of the car with reference to all surrounding objects as well as the curb lines. This information might save you annoyance, time and money later on.

GO SLOW—Passing schools, children, vehicles, around corners, approaching crossings.

STOP—When in doubt—at railroad crossings, behind street cars taking on or discharging passengers. Better to cause a delay than an accident.

Drive moderately on strange roads—you never can tell.

Always safety first.

RACES IN WAR TIME.

Cincinnati Announces Championship Event on Decoration Day.

The Cincinnati speedway management announces that the race set for Decoration Day, May 30, at the Sharonville speedway, will be run. This definite information has been sent to President Harry Leyman of the Cincinnati speedway by Secretary Kennerdell of the American Automobile association.

It was decided at a meeting of the directors of the Cincinnati speedway that the Decoration Day race, to be designated as the second annual international sweepstakes race, will be for a distance of 250 miles, instead of 500 miles, which was the distance in the opening race of the track on Labor Day of last year. The contest will be for a purse of $25,000, to be divided into ten prizes, with $10,000 to the winner. The number of starters in the race will be limited to thirty-two, and preliminary trials at the track will be held for two or three days preceding the race. Only cars that attain a speed of ninety miles or more an hour will be allowed to qualify.

FLIES OVER "LILLIES."

By Associated Press.

London, April 21.—A British officer on duty with the air service in East Africa includes in one of his reports a graphic description of an immense valley filled with the huge "Arum lillies," over which he flew somewhere in the region of Zanzibar. As he passed over the valley, he was 8,000 feet high, but the perfume of the lillies reached his nostrils for a long distance.

By means of his glasses he observed that the lily flowers were "as large as elephants' ears," and that the whole of the valley had been monopolized by the beautiful flower. The luxuriance of the vegetation was particularly remarkable. He learned later that the scent of the flowers was so overpowering in the valley that no native had ever dared to penetrate within its borders.

This Circus Will Travel on Wheels

To become a member of a circus troupe has always been one of boyhood's ambitions. Many persons outgrow this attraction for circus life, but with some the lure always remains. No better evidence of this universal appeal of the outdoor show could be found than in the list of applicants for the position of truck drivers with the new motorized circus, which opens in May.

There are more than 1,000 of them on file in the office of the United States Circus corporation and most of them are from college men. Graduates and undergraduates from the leading universities of the country—Harvard, Yale, Pennsylvania, Columbia, Princeton, Dartmouth, Cornell—want jobs in the circus parade as pilots of the 100 Firestone-equipped Kelly-Springfield trucks and Troy trailers.

There hasn't been much to offer the young college man in circus work heretofore. But the new enterprise, with its motorized features, presents a different aspect. Almost every young man nowadays can operate a motor car. Some of the circus applicants tell of their experience with father's machines, while others tell of their own personal attractions such as the young man who described his social position and suggested that the use of his name would bring out the social elect in every town visited.

CHAEUFFEURS IN WAR.

What the automobile engineers are expected to do in army and navy preparations to carry on the war was told at a meeting of the Society of Automobile Engineers at Indianapolis a few days ago by F. E. Muscovics, a prominent member of the society. Mr. Muscovics said:

"Gentlemen, the country looks to us for a tremendous work. We are to be the ones to build engines for submarine chasers, through our affiliation with the marine engineers. We are looked to to build aeronautical engines through our affiliation with the aeronautical engineers; and of course we are to build the motor convoys and transports. In many cases we will be called upon to man them, too; so you see on land and air and water the nation will look to us to do the work. Now, we can't do this without careful pre-arrangement and planning. We can't do this if our membership will at the first call to arms enlist to fight in the trenches. Our members must be held for bigger and higher things. About the poorest thing any member of this society could do fir his country is to go out into the field and be shot. I can't see that sort of patriotism for the technically trained men. The greatest thing he can do is to conserve his life and offer his services to his country where it will do the most good—offer it through the channel which can best dispose of it—and in your case it means offer it through the S. A. E."

TOURING BEAR VALLEY.

A most remarkable recent motor truck performance was the one just accomplished in the Bear Valley, Cal., 7,000 feet up in the San Bernardino mountains. The Bear Valley country for years has been isolated from the rest of the world by the first storm of the winter, but this latest achievement has suddenly emphasized the possibility of regular winter mountain trips in the future.

Accepting the challenge of William Cline, a well known sportsman of that region, who offered a loving cup to the first motor vehicle to make the dash after a violent snow storm, a party of six men attempted the trip in a Moreland truck. Although the snow was so deep on some of the grades as to cause the truck to slide backwards with the wheels revolving forwards, the fight was finally won. When the truck was placed on exhibition at the Orange show at San Bernardino, many persons were skeptical as to the territory it had covered owing to the splendid condition of the Goodyear tires with which it was equipped.

BAVARIANS LOSE WEIGHT.

By Associated Press.

Berlin, April 21.—A Munich professor who has been collecting information regarding the effect of food rationing on the people of Bavaria, finds that in the towns there has been a general loss of weight among the people, but that in the country districts, the loss of weight has been slight, while certain classes of the population have actually gained in weight since the food ration system went into effect.

In the large towns, men under fifty have lost 9.3 per cent, and men over fifty, two per cent. Women under fifty have lost 6.7 per cent, and women over fifty, ten per cent of their weight.

STUTZ COMPANY TO EQUIP MOTORS

Motor ambulances, supplementing the mule-drawn ambulances now in service will be provided for the Indiana national guard through a patriotic offer of the Stutz Motor Car company and its president, Harry C. Stutz, to donate six chassis constructed especially for ambulance purposes. The Parry Manufacturing company, which already had requested Adjutant General Harry B. Smith to call on it for any possible service, promptly volunteered to provide the ambulance body when it learned of the Stutz donation.

The Stutz-Parry contribution will give the Indiana national guard its first motor equipment. The adjutant general already has wired the medical department of the United States army for permission to accept the motor equipment, and this will undoubtedly be granted.

Since twelve ambulances will be required to equip an ambulance company, it is possible that one of the companies already organized and equipped with the mule-drawn ambulances will receive the motor ambulances, thus giving it two kinds of motive power for its ambulances. Additional motor trucks, however, would make it possible to form a complete motor ambulance company.

Mr. Stutz not only offers the motor chassis, which, with the bodies added, will be worth between $12,000 and $15,000, but he promises to aid in recruiting thirty first-aid men to accompany the cars. Men in his factory have already volunteered to join a company to become drivers of the cars, and enough more men of the shop are willing to enlist to complete a company.

NOTICE.

If Will of Vitus Winkler has been left with any one in Waco, kindly notify J. W. Baker, county clerk, at once.—Adv.

Spring Fashion Apparel for Famous Jordan Car

Much in the same way that an exclusive Fifth avenue outfitter in women's or men's wearing apparel would announce his spring models, Ned Jordan, manufacturer of the fashionable Jordan car, of Cleveland, has inaugurated a new method in the marketing of motor cars by a formal announcement of 1917 spring styles in distinctive motor equipages.

Just as dashes of brilliant color, daring and original designs proclaim the spring vogue in fashionable women's attire, so the sport influence in Jordan motor car fashions is emphasized by a dominating trend of bright colors.

On the theory that the time has come when aristocratic motor cars must be dressed in keeping with the individual taste of the owner, Jordan offers to the public in a limited number of cars a series of color effects which mark a decidedly new stage in the production of medium priced cars.

So there will be no danger of the new models becoming common in appearance, only twenty-five orders for this particular line will be accepted. With the assistance of artists, long experienced in the study of contrasting shades and combinations of colors that are striking and yet conservative, Jordan offers to each individual who orders one or more of the twenty-five cars his selection of his favorite coloring effect.

ENGLISH FOR ART.

By Associated Press.

Manchester, England, April 21.—Manufacturers, distributors, designers and craftsmen interested in a movement to have shapely and well-colored things of every day use, from houses to cups and saucers, have just held an exhibition here under the auspices of the Design and Industries association. It was the first of its kind ever held in this industrial center and in spite of the war, it attracted great gatherings of persons interested in the production and use of things at once useful and attractive.

B. F. GOODRICH SHORT-CUT TOUR

New York motorists or those of any of the intermediate points to Chicago, shown in the latest "short-cut" tour books of the national touring bureau of the B. F. Goodrich company, may now travel all of the 897 miles between these points with that same feeling of certainty that the pilot of the Twentieth Century Limited pulls his train out of the Grand Central station.

One volume of this tour book, which is free to motorists, deals in detail with the highway going west and the other with the direction east from Chicago. They are both so complete that they can be used by motorists traveling between any of the intermediate points.

Leading from New York southwest through Jersey City, Newark, New Brunswick and Trenton, the route passes through Philadelphia and then assumes almost a straight western direction over the Allegheny mountains, through Lancaster, Gettysburg, Bedford and on into Pittsburg. From Pittsburg the direction is northwest through Akron and Toledo, Ohio, and then straight west through Goshen, South Bend and Valparaiso, Ind., into Chicago. Throughout the entire distance the best and most direct roads have been chosen.

From New York to Pittsburg the roads are of excellent macadam, and from Pittsburg to Chicago more than three-fourths of the highway is well improved.

Landaulet Growing in Favor for Summer Use

During the past winter there has developed among buyers of enclosed cars in the larger cities an unmistakable trend toward the landaulet. This is the impression gained by the Cadillac Motor Car company, which reports that the demand for its own landaulet model is continuing into the spring months.

The character and utility of the landaulet type make this a logical development, since this car is admirably adapted for use in both summer and winter, in fair weather and foul.

The landaulet type of motor car derives its name from the old-time closed carriage in which the sections of the top could be laid back. Its general design is that of a limousine.

As the Cadillac company has designed its landaulet, the rear section is covered with leather and when laid back affords a spacious opening. In this way, the passengers enjoy the freedom of an open touring car, and the landaulet becomes an ideal car for city use in summer. At other times, with the rear side windows raised and the top in its closed position, the car becomes a limousine.

In the enclosed compartment the Cadillac landaulet seats five. The passenger compartment is partitioned off from the driving compartment as in a limousine.

CHASES COYOTE IN MOTOR CAR

Coyote chasing is rapidly becoming a favorite outdoor sport with a number of Dodge Brothers owners in the northwest country. Several letters, telling of the chase and subsequent extinction of the prairie wolf, have been received by Dodge Brothers at Detroit, and the one recently received by the Motor Sales company, Dodge Brothers dealers in Letheridge, Alta., Canada, gives further indication of the growing popularity of this unique diversion.

While touring with his brother and sister-in-law eighteen miles east of his home, E. A. Grant of Barons, Alta., jumped a prairie wolf, which was the beginning of a five-mile chase that ended in the death of the wolf.

Mr. Grant's letter reads, in part:

"My brother said to me, 'Why don't you catch him?'

"I replied, 'All right, we'll give him a little work-out.'

"We turned the car after Mr. Wolf and for the first two miles everything went beautifully with him—except that his tongue was hanging out and he seemed a trifle warm.

"The next three miles I ran over him four times. The last time fixed him. All he needed was a knock on the head which my brother gave him with the engine crank."

It is significant that this car, which was driven five miles cross-country, cutting, turning and twisting after a fleeing coyote, had been driven 13,000 miles without a single replacement or repair.

Dort Car Demonstrates That Caution Must Be Used

The Dort car took part in some train versus auto tests this week that demonstrate why the motorist must watch the railroad crossings and not leave the burden to the man in the cab or to a watchman that may or may not be on duty. A Southern Pacific train pulled by an Atlantic type engine and made up of eight passenger coaches making a total train weight of 750,000 pounds was used in the test with the Dort. An engine was not used alone because it would serve no practical purpose and for the surprising reason to laymen offered by R. J. Clancy, assistant to the general manager of the Southern Pacific, that an engine cannot stop as quickly the engine and train.

The first test was made at fifty miles an hour and the train came to a stand in 1200 feet. This speed, although equalled by many on the highway, is an exception, and to make the comparison more practical, no similar test was made with the Dort.

In addition to demonstrating the worth of the Dort in braking power, the test proves as a demonstration the general proposition that the automobile driver is the one who has it in his power to avoid crossing accidents if he takes even small precautions. The engineer of a train traveling at forty miles an hour must see the danger 900 feet away even if he knows the car will not stop. The driver of the car can avoid the danger when twenty-two feet away from the crossing. At all speeds the flexibility of the car over the train places the responsibility morally with the driver of the machine.

Miss Marie Dillon and Miss Mabel Heenan, two pretty young women who aided in the demonstrations to test the utility of the Dort's combination clutch and service brake, had no difficulty in making the quick stops and discovered that the device is "excitement proof." "There is no need to change the position of the feet in stopping," said Miss Dillon, "and this makes the Dort easy to drive either in traffic or on the highway."

TO RUSH GASIFIER SALES.

Nelson Made Sales Manager of Gasifier Dept. by Savage Company.

The Savage Tire corporation are now prepared to push vigorously the sale of the Thurston motor gasifier. A department to handle this end of the business has been formed. Mr. W. C. V. Nelson will act as sales manager of the new department.

Mr. Nelson has had a broad sales experience both in the middle west and on the coast. He brings with this experience, to his new work, a world of energy and ambition. An article with all the merit of the gasifier is sure to meet with a big success, when the sales details are handled by a man as capable and as well liked as is Mr. Nelson.

The Thurston motor fuel gasifier is not a new device. It has been thoroughly tested on every type of car, and every sort of motor.

It is claimed that the gasifier will enable motorists to use distillate just as efficiently and with just as much satisfaction as gasoline. These claims are borne out by the many tests on various types of cars. In view of the high price of gasoline, there is surely a big field for a device of this sort, and the gasifier department will undoubtedly become a large and important one at the Savage plant.

A GRAVE QUESTION.

It has a human interest appeal to every family. Why not acquaint yourself with the advantages of lot ownership in beautiful Park Lawn before actual sorrow enters your life. Won't you call me up and let me send my car and bring you out and show you Park Lawn?

Chalmers Sets New 24-hour Mark in Run in Chicago

Crossing and re-crossing the congested "loop" district of Chicago, a Chalmers Six-30 touring car has just established the remarkable performance of 586.8 miles in twenty-four hours, entirely in high gear. The car used was a stock seven-passenger model taken from the salesroom of James Levy, Chicago distributor, and the record was made under A. A. A. supervision.

Starting from the Michigan avenue salesrooms of the James Levy Motor company at 12:20, Monday noon, the car piloted by an amateur driver, finished its run at the same place at 12:20 p. m. Tuesday. L. A. Hillman, Illinois representative of the American Automobile association contest board, acted as observer and accompanied the machine on the entire trip.

In preparing for this strenuous run, which was 228.1 miles better than any previous mark ever made, the first and second gears were removed completely from the car, leaving only the high gear and the reverse. The entire run was made without stopping the motor and averaged thirteen miles to the gallon of gasoline.

"Probably the most unusual feat of the trip was the 'gridironing of the loop' in the crowded hours of Tuesday morning," said Mr. Hillman in describing the trip to Chalmers officials. "In criss-crossing the loop district we traveled through the heaviest traffic to be found in America for eight miles."

Notice.

We hereby notify all parties owning or having an interest in any personal property located on our premises, Seventh and Mary streets, where fire occurred, that such property must be removed from said premises on or before April 24 next, or else same will be considered abandoned, and junked by the undersigned.

U. S. AUTOS IN EUROPE

Will Be Used by 'Nephews' of Uncle Sam.

The "ten million nephews of Uncle Sam" will have an all powerful ally in the American automobile. Not only can the motor car companies be relied upon to transport troops, ammunition and rations, but they will be a fundamental and vital factor in the development of aviation engines and the establishment of airplane corps.

It is probable that European military aviation history will be repeated in America. Across the Atlantic multiple-cylinder motors have proven most practical for driving the French and British airplanes. The companies that have been most prominent in the automobile racing world—Sunbeam of England, Peugeot and Delage of France and Fiat of Italy—are furnishing the bulk of the engines used by the air squadrons of the allied armies. Thus, in this country, the automobile makers that are the pioneers in the production of twelve-cylinder motors and that have been most successful in road race and speedway competition are regarded as the most valuable aids of the army in the development of our aviation corps.

It is believed that the builders of V-type motors such as the twelve-cylinder can adapt themselves readily and quickly to the manufacture of motors for military airplanes.

This country has developed high-speed racing motors and twelve-cylinder engines, a combination of the fundamental quality of each—high speed multiple cylinders—is ideal for aviation purposes.

Coatalen, who built the twelve-cylinder Sunbeam that crowded 107 miles within the hour at Brooklands, now is head of the experimental department of the English aviation forces and directs the development and construction of the motors used in British airplanes.

To the Citizens of East Waco.

Won't you drive over to Park Lawn, "The Cemetery Beautiful," Fourth and Gurley streets, today?

If you will phone me, No. 3959, I will be glad to send a car to bring you over to see the grounds. A. L. STEIN.

Cadillac Production Is Now Speeding Up

According to the statement of Sales Manager E. C. Howard, the production of eight-cylinder Cadillacs for the month of March reached a total of 2,032 cars, and April is expected to show a substantial increase to reach an average of one hundred cars per day.

During the winter months, numerous handicaps have been experienced, caused by delays in obtaining materials in spite of foresight in placing contracts long ago, and on account of railroad congestion both in and out of Detroit.

The railroad situation, however, is reported somewhat easier, and the material situation is now so well in hand that production so far as the Cadillac factories are concerned can be pushed to the limit.

USES CLOSED CAR FOR DICTATION

G. J. Gordon of San Francisco Cleans Up Letters on Way to Office.

Decidedly versatile in methods was the automobile salesman who recently disposed of a Chalmers touring sedan to Gordon J. Gordon, prominent real estate man of San Francisco.

Mr. Gordon, who resides in San Mateo, a suburb of San Francisco, had refused to buy a closed car, but when the salesman countered by showing him how the car would save him money, he reconsidered his decision.

Gordon lives about an hour's ride from his office and this time was formerly wasted. Since purchasing the Chalmers sedan he has had the car fitted with a small table and typewriter. Now he simply calls for his stenographer and spends the hour in dictating the day's correspondence. He arrives at his office prepared to tackle the real problems of business and has gained an hour on his competitors. As Gordon figures his time to be worth $10 per hour, he will have more than paid for the car before the year is out.

Because of San Francisco's changeable climate the touring sedan is fast becoming one of the most popular types of cars on the Pacific coast. In the chill of the evening, the removable sides and windows can be placed quickly in position and during the day the car's interior can be again opened to the breezes. Motor car dealers in the west assert that the car with a permanent top will be the big seller within the next year.

WANT TO TELL YOU ABOUT PARK LAWN

And am sure your interest will increase. Modern perpetually cared-for Park Lawn cemetery is too beautiful, too inspiring, too vitally necessary an institution to remain unappreciated by you. If you will be convinced, phone me and let me send my car and bring you out and show you Park Lawn.

"I AM DELIGHTED WITH THE RESULTS" SAYS MRS. IDA LEE

WACO WOMAN SAYS SHE KNOWS NOW THAT TANLAC IS ALL THAT IS CLAIMED FOR IT—HAD SUFFERED FIVE YEARS.

"Nothing could shake my faith in Tanlac since it relieved me of my troubles of five years' standing," said Mrs. Ida Lee of 905 South Sixteenth street a few days ago. Mrs. Lee is well known in Waco, where she has many close friends.

"I suffered with catarrh of the stomach for five years," she continued, "and I could hardly ever eat a meal without suffering tortures afterward. My stomach felt like there was a coal of fire in it and the food seemed like a lump of lead. What I ate just didn't seem to digest and I would often have to spit it up. It turned sour and formed gas that would bloat me up until I would suffer from palpitation of the heart. My stomach just seemed turned against everything and it was all I could do to force myself to eat enough to keep me alive. I was racked by pains in my back and shoulders and I got so nervous and restless that lots of times I wouldn't go to sleep until early dawn. My life was just miserable and it looked like I had no hope of getting relief because everything I had tried failed to do any good.

"That was just the fix I was in when I decided to try Tanlac. I had been reading about it in the papers and it sounded like that was the thing I needed, but I had been disappointed so often that I hardly dared to hope. Well, I am more than delighted with the results and I now know that Tanlac is all that is claimed for it because it has made me feel better than I have for many years. I can now eat anything I want and it don't hurt me, and my! it's such a pleasure to be able to relish my meals once more. Of course my relief was sort of gradual, but even at that it was quicker than I had hoped for. My pains have left me entirely and that burning in my stomach has gone and I never have those bad feelings after eating. I am still going to keep on taking Tanlac for a while because you know it takes a long time to get entirely well after being sick for five years and not able to eat hardly anything. Tanlac is really the only medicine that did me any good and I am more than glad to recommend it."

Tanlac is sold in Waco by Morrison's Old Corner Drug Store, under the personal direction of a special Tanlac representative.—Adv.

Dodge Brothers Car Ordered by Wireless

The extremities to which some men will go to obtain a motor car which has proved its worth to them is indicated by a unique delivery recently made by the E. A. Staacks Auto company, Dodge Brothers dealers in San Antonio, Texas.

Some time ago they sold a Dodge Brothers touring car to Alexander Boynton, who developed and operated the Winter Garden Irrigation company at Uvalde, Texas. After finishing his work he sold his car and left for an extended steamship tour of the South American countries.

On his way home he began to think of his need for a dependable motor car. So he made use of the Marconi on his steamship, which was then in the middle of the Carribean Sea, off the coast of Honduras, and sent the following message:

SS. Tetadores at Sea, via Tropical Radio Wireless, New Orleans 6.

Staacks,

San Antonio, Texas.

Have Dodge automobile ready deliver sixteenth. BOYNTON.

When Mr. Boynton arrived in San Antonio his Dodge Brothers touring car was waiting for him, and one of the few motor car sales made by use of wireless was completed.

Everybody.

If you are interested in "The Cemetery Beautiful," drive out to Park Lawn, Fourth and Gurley streets, today and let me show you the grounds.

If you are not interested, come anyway and be convinced that you should be interested.

If you will phone me, No. 2959, I will be glad to send a car and bring you out to the grounds. A. L. STEIN.

Diamond Tires Are an Economy Standpoint

C. H. Smith of the Diamond Rubber company said: "Diamond tires are being presented to the motorist from the standpoint of economy as well as of quality. The manufacturers recognized the fact that heretofore automobile tires have been advertised practically one tire at a time. That is, the advertisements would show a picture of but one tire, and the advertising talk would be centered on the idea of selling one tire to the reader. In the new Diamond tire newspaper campaign full advantage is taken of the thought that there are four wheels on an automobile, and that the saving involved in buying and using one Diamond tire is quadrupled by the purchase and service of four. 'Save four times as much with Diamond tires' is the keynote of the campaign which depends upon newspaper space as the direct route to the motoring public.

"Coupled with the 'money-in-your-pocket' argument of saving four times as much by making all four tires Diamonds is the comprehensive, confident promise that 'every Diamond tire must deliver all the value its owner is entitled to,' and dealers everywhere report that their customers who buy one Diamond tire eventually buy three more because of good service and mileage."

Champion Spark Plug Co. Increases Advertising Fleet

The delivery car method of distributing window displays and advertising matter from one end of the country to the other, adopted by the Champion Spark Plug company of Toledo a few months ago, has proved so advantageous to its dealers that the company is adding five more cars to its fleet of five Overlands.

By increasing the number of its traveling cars, the company will be able to cover the territory much more thoroughly than in the past and visits to the dealers will be more frequent.

The two Overland delivery cars which made a record run from Toledo to San Francisco early this year will remain on the western coast. They were among the first which the company sent out through the country and they have stood up splendidly under the trying tests to which they have been subjected.

While they are delivering advertising material to the Western dealers, other cars will be covering the territory in the Eastern states. Champion spark plug cars will, at the same time, be threading their way over the roads of the Northern states and, in the Southland, the Champion spark plug vehicles will be equally familiar on the highways and byways.

HUMBERT A BOY SCOUT.

Rome, April 21.—The young Crown Prince Humbert in his smart uniform as a Boy Scout, recently distributed a special badge to his fellow Boy Scouts entrusted with the watching of the coast and Apennine Passes against enemy's airships. Next to the prince stood an American Boy Scout, living in Italy, who has joined the corps and was given this position of honor.

Six Cylinder Standard as Ever, Says Heising

"The six cylinder is still the standard motor," said G. F. Heising, chief engineer of the Moon Motor Car company. "The four cylinder motor is of course the cheapest to make, and the eight and twelve cylinder motors will continue to be used, in greater or less quantities, as the desire for style or oddity continues, but the six cylinder car will be the standard upto which all the others will be expected to measure and compare. The six cylinder car fills the bill for the maximum of efficiency. While it is not the lowest in consumption of gasoline it is practically as economical as any four, and it has the advantage over the four in the maximum of flexibility and it has the greater advantage over the eight and twelve of greater simplicity.

"For the benefit of those who do not know what this much used term 'flexibility' means, it means the ability of the motor to throttle down to very low speed in high gear, and to pick up quickly to high speed without changing the gears, eliminating the constant shifting of gears. The other term 'simplicity' means that six cylinders much of necessity need less mechanical attention than eight or twelve."

DECLARE 70 P. C. DIVIDEND.

Copenhagen, Denmark, April 21.—One shipping company here has declared a dividend of 70 per cent. Its profits for the year were nearly 2,000,000 crowns on a capital of 1,500,000 crowns.

BOY SCOUTS FIND SKELETON.

London, April 21.—The skeleton of a woolly rhinoceros, 5,000 years old, has been dug up by Boy Scouts in the course of maneuvers in Loakes Park, High Wycombe.

TAXI TRIES INCREASE.

By Associated Press.

Stockholm, Sweden, April 21.—The steady increase in the price of benzine and tires has resulted in the second increase of taxicab fares since the war began. It runs from 25 to 33 per cent. The price of tires has increased from 185 to 800 crowns apiece.

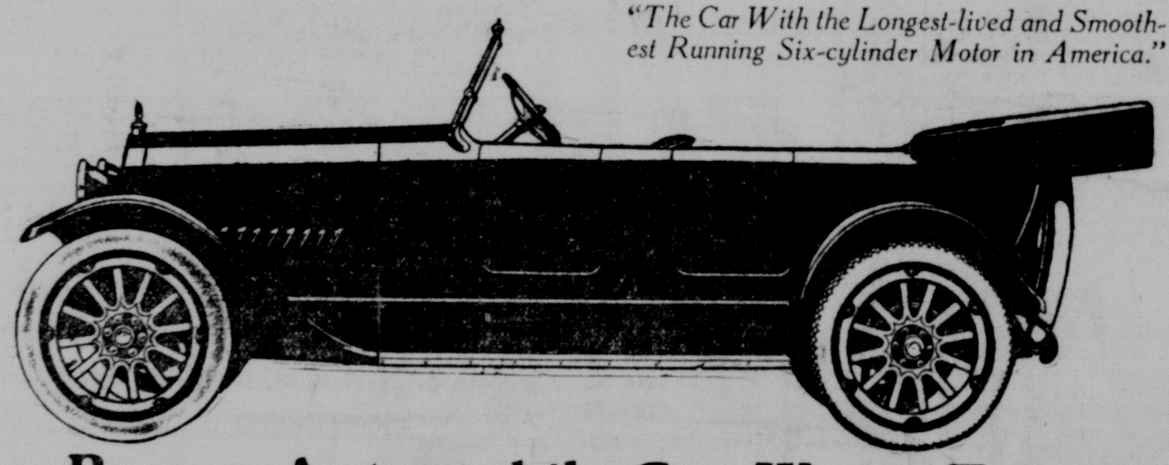

Owing to the scarcity of benzine, the operation of private automobiles is to be greatly restricted. No benzine may be sold to the owners of automobiles used for pleasure, and those persons who use their cars for going to and from their places of business may have only fifteen quarts daily for a car.

NASH Jeffery MOTORS

IF every prospective purchaser of an automobile in the price class of the Nash-Jeffery Six could know as much about this car as we do, or in other words, know in how many ways this car excels every other car priced under $2000, it would be an easy matter for you when it came to the point of making the final decision. There are absolutely more high grade features in this car than can be found in any other car of near the same price. It is made by the foremost manufacturer of high grade cars in America; it is 93 per cent built in the Nash factory, which enables the car to be produced for a great deal less money than many of the other cars that are offered today, whic hare only assembled jobs. Did you know that in the past two years there has been over one hundred factories that have attempted to build cars and failed? If you have a car made by one of these factories you can realize what it means when you need a repair part—not only does it cost you about two prices, but the delay in getting it is an important item. The Nash Motors Co. is one of the strongest in the industry. Its officers are men that have accomplished the big things, many of them having had their experience in the General Motors Co. The word "failure" is unknown to them; on the other hand they have achieved the greatest success that men could attain, and the cars they have built have always been leaders in their class. Now, with the present organization, they are better prepared to give greater values than they ever have before, and that means better values than any other factory can give. Are you satisfied to pay out your good money and get in return a car that is built by some small factory, or even some assembler, who is not in position to give you nearly as good a car as a concern like this, or had you rather get the greatest value for your investment?

If you want the highest quality and get it at a saving, we ask that you give us an opportunity to show you wherein this car offers the consumer more for his money than he can get elsewhere. We will be glad to "show you" and if we fail to convince you, then you can look elsewhere, but we will be satisfied with your judgment after you have given this car a thorough trial and have examined the important features not found on other cars of this price class. It is to your interest to investigate—you will never regret the time spent in so doing.

—And you should certainly NOT fail to see these garments on Monday—in this great sale.

—At $29.50—at Graham-Jarrell's, Second Floor.

Y M B L OFF TO HOUSTON

Special Train Will Carry Delegates to Convention.

Leaving promptly at 11 o'clock tonight, over the H. & T. C., the directors of the Y. M. B. L. and several invited guests will travel in a special car to the state convention of the Y. M. B. L. at Houston. W. T. Wheeler, chairman of the committee which has been working up interest for the trip, reports that the car will be filled and that Waco will be well represented at the convention.

An election of officers will be held at the Houston meet and many other matters relating to the good of the organization will be brought up. J. M. Carroll of Temple is president of the organization at the present time.

SELLS WACO HOME.

E. A. Sturgis has sold his home at the northeast corner of Eighteenth and Morrow streets to Mrs. W. A. Lanning, and has bought from Mrs. Lanning 309.26 acres of land near Elk. The consideration for the Sturgis home was $17,000 and for the Lanning farm $21,500. Mrs. Lanning will get possession of the newly acquired home at Eighteenth and Morrow streets in a month. Mr. Sturgis has not decided whether he will build a new home.

BITTEN BY DOG.

A little child of Louis Early has been bitten by the yard dog, but it is not known whether the dog was afflicted with rabies. Indications probably are contrary to that view, but uneasiness is felt by the parents.

The child was bitten on the ear. Waco has had some rather disturbing experiences as regards dogs, recently.

Perhaps It's Here

Rev. W. M. McIntosh of Iuka, Miss., reached Waco yesterday afternoon, and will this morning at 11 o'clock begin a protracted meeting at Austin Avenue Methodist church. Two services will be held daily, at 10 and 8 o'clock, beginning tomorrow. Music will be in charge of W. H. Matthews Jr., and L. P. Bloodworth. Plans have been laid for a successful revival.

At Fifth Street Methodist church, at 11 o'clock this morning, a protracted meeting begins, preaching to be done by the pastor, Rev. John R. Morris. Mrs. Bishop will be in charge of a chorus choir. One service daily will be held, at 8 o'clock at night.

It is announced by President G. H. Penland of the Lawyers' Lunch club that Hon. W. H. Atwell of Dallas will address the club at Waco next Saturday. Judge Atwell is one of the most prominent attorneys of the state, and it is expected that he will have a great hearing.

Waco Negroes Participate in Street Parade Saturday

The field day exercises yesterday by the negro schools of Waco was initiated by a street parade, headed by a negro band. The manual training department of the Moore high school was applauded, as were other features, including patriotic school yells regarding President Wilson. The parade wound up at Taborian park, where dinner was served on the grounds, speeches made by Dr. J. N. Jenkins, R. L. Smith, Prof. G. W. Sadler and others. J. H. Hines was master of ceremonies. The exercises were under the auspices of the Moore high school of which Prof. J. A. Kirk is principal.

Cameron Managers in Closing Session Saturday

Electing officers as one of the last acts of the meeting, the Retail Managers' association of Wm. Cameron & Co. yesterday closed one of the busiest four days' sessions in their history. Following are the officers chosen: C. G. Pedis, Wichita Falls, president; E. N. Stone, Frederick, Okla., vice president; A. E. Moore, Waco, secretary, re-elected. More than seventy were present. Many pleasant social features marked the meetings.

To the Citizens of East Waco.

Won't you drive over to Park Lawn, "The Cemetery Beautiful," Fourth and Gurley streets, today?

If you will phone me, No. 3959, I will be glad to send a car to bring you over to see the grounds. A. L. STEIN.

(Advertisement.)

Her Motive.

"Will you introduce me to Mrs. Flubdub?"

"I hardly think you would care to go with her, my dear. Then why an introduction?"

"I can't snub her, can I, unless I know her?"—Kansas City Journal.

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time in Many Instances

A Free Prescription You Can Have Filled and Use at Home

Philadelphia, Pa. Do you wear glasses? Are you a victim of eye strain or other eye weaknesses? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of his wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and allow to dissolve. With this liquid bathe the eye two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time.

Note: Another prominent Physician to whom the above article was submitted, said: "Bon-Opto is a very remarkable remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. The manufacturers guarantee it to strengthen eyesight 50 per cent in one week's time in many instances or refund the money. It can be obtained from any good druggist and is one of the very few preparations I feel should be kept on hand for regular use in almost every family." It is sold in this city by W. B. Morrison and other druggists.

A CERTAIN AUTOMOBILIST had a Breakdown way out on a Country Road. The car was full of friends. They were on a Pleasure Trip. All of the Men worked and soiled their hands considerably—not to mention the Grease that rubbed off on their Best Clothes. 32 TRACTS IN BEAUTIFUL

LAKEVIEW ANNEX

—AWAIT YOUR INSPECTION

"The Home of Your Dreams" Could Have No Better Location

High, Dry, Cool and Comfortable—only fifteen minutes by Interurban from the Public Square, with a guarantee fare of 5c—five miles out on the Dallas road—a home in Lakeview annex has all advantages of prominity to the city, combined with delights of country.

The Soil Is Sandy, Rich and Productive

Lakeview Annex Tracts are roomy enough for garden, orchard and poultry yard. You can knock a dent as big as you like in the High Cost of Living, by raising much of the food you eat. ¶ There is never any black mud in Lakeview! After the hardest rains you can drive all over your lot in an automobile.

Size of Tracts	Price	Terms
200 ft. x 165 ft.	$295 $695	10% down and $5, $10, $15 or $20 per month

Follow Wilson's Advice and Raise Food Stuffs!

Patriotic Americans

Will help President Wilson's appeal for larger production of food-stuffs! This is especially needed in Texas. The man with an acre or two of good land can always produce enough for his family to eat. And in the present National crisis it is the DUTY of every American to do this if he can.

OUR PLAN MAKES IT EASY TO REDUCE THE H. C. of L.

Because, by the payment of a nominal sum down and a small amount monthly, you can own a Lakeview Annex Tract of Rich and Sandy Soil.

Pure Water, Pure Air Sandy Soil, No Mud

What more do you want? Electric Lights? We have them in Lakeview Annex! these tracts are ideal either for country homes or all-year-round residence. Come and see for yourself

A Good Investment If You Don't Build Now

It is certain that these Real Estate Values will never be less, and Real Estate is one thing that can never be taken from you by fire, flood, war or famine, and it always increases in value

Lakeview Annex In the Line of Advancing Values

When the new Spring Lake Club is completed, all real estate values in the vicinity will be greatly enhanced. Lakeview Annex is directly across the road from Spring Lake Club. The new Lakeview station on the Interurban will also serve as the station for Spring Lake Club. Already thousands of dollars have been spent on the club, and plans for the buildings are being rushed.

Out-of-Town People, Listen!

If you are expecting to locate in or near Waco at any time soon, no better opportunity will be presented to you than is now offered in Lakeview Annex.

A BIG BRICK SCHOOL HOUSE IS LOCATED in the center of Lakeview. Instruction through the Tenth Grade.

All Cars Stop at the Entrance to Lakeview Annex.
And a 5 Cent Fare to Waco

C. C. SHUMWAY & CO.

PHONE 776 **109 SOUTH 5th ST.**

LAKEVIEW WILL BE EXTENDED BY SHUMWAY FIRM

Addition Is Located Near New Spring Lake Club; Ideally Located.

A striking evidence of the sound basis of the prosperity of Waco and the confidence of Waco business men in its continuation, is found in the opening of an extension of Lakeview addition, near the location of the new Spring Lake club.

This new addition is being promoted by C. C. Shumway & Co. and is fully described in a full-page announcement on another page. Mr. Shumway, in speaking of the reasons for placing these lots on sale at this time, said:

"In my opinion, this country was never on a sounder basis of solid prosperity than it is today. And it is sure that no matter what the fortunes of war may be, there is one investment that is always safe, and that is real estate. Neither war, flood, fire or famine can take away real estate, and the whole history of the country shows that values of well selected residence lots always advance in value."

The Lakeview annex adjoins the Lakeview addition, on which thirty-three good homes are already built. The new Lakeview station on the interurban line will be at the entrance of both Lakeview and Spring Lake club.

Mr. Shumway says that one of the attractive features of this section lies in the good, rich, sandy soil, which never gets muddy, yet will produce almost any crop of vegetables. The buyers of tracts in the new addition, Mr. Shumway thinks, will have an excellent chance to follow President Wilson's advice to help Texas feed herself this summer. The tracts are 200 feet by 165 feet in size, giving ample room for garden, orchard and poultry yard.

The tracts will be put on sale the last of this week, at which time the grading of streets will be completed.

BAGDAD SHOPS CLOSED.

Bagdad, Mesopotamia, via Basra, April 21.—Only a small proportion of the Bagdad shops have yet been opened, and these are half empty. The Jewish merchants say they lost at least $400,000 worth of goods on the morning of March 11, just before the British entry.

The cafes in the bazaar are still frequented by the old clientele, but it is a crowd in which tobacco and coffee are scarce. "The Turks have taken everything," said a Turkish rabbi, "even the pigeons on the mosques are getting thin."

Kurds and the rabble even looted the hospital, carrying off stores, bedding, medicines and drugs. The native personnel of the hospital let in their friends and shared the spoil. With this assistance even lenses were taken from the microscopes. Happily, the British troops arrived in time to save the beds, or the patients would have been tumbled out on the hard floor.

On the right scene of the river is a scene of scientific havoc. The German wireless station had just been completed at enormous cost. It was a powerful plant and was in direct communication with Berlin. It was blown up on the morning of March 11, and the engineer did his work well. The roof of the station was carried away, there was a huge crater in the center of the floor, one of the giant masts had fallen, crushing a wall, and one of the two great boilers had been blown up.

The money invested in the wireless, the railway stations, sidings, workshops, water towers, cranes and engineering plant must have been millions. The British troops reached the railway station at 6 a. m. The last train had gone at 2 a. m.

REAL ESTATE TRANSFERS.

Reported by the Dilworth Abstract Co., Offices Basement Courthouse.

M. A. Cooper to B. C. Pfeffner, part of block 2, Travis Park, $1340.

Firing Her Ambition.

"You are exquisite," he raved. "Your eyes are lustrous, your complexion divine. Do you think you could be contented as a poor man's wife?"

"No," replied the girl frankly. "I'm pretty enough for the movies if I'm as pretty as all that."—Pittsburg Post.

Girls! Use Lemons! Make a Bleaching, Beautifying Cream

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to train the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. It is simply marvelous to smoothen rough, red hands.

LOOK AT A CHILD'S TONGUE IF SICK, CROSS, FEVERISH

HURRY, MOTHER! REMOVE POISONS FROM LITTLE STOMACH, LIVER, BOWELS.

GIVE CALIFORNIA SYRUP OF FIGS AT ONCE IF BILIOUS OR CONSTIPATED.

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once.

When peevish, cross, listless, pale, doesn't sleep, doesn't eat or act naturally, or is feverish, stomach sour, breath bad; has stomach-ache, sore throat, diarrhoea, full of cold, give a teaspoonful of California Syrup of Figs, and in a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of the little bowels without griping, and you have a well, playful child again.

You needn't coax sick children to take this harmless fruit laxative; they love its delicious taste, and it always makes them feel splendid.

Ask your druggist for a 50c bottle of California Syrup of Figs, which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Beware of counterfeits sold here. To be sure you get the genuine, ask to see that it is made by California Fig Syrup Company. Refuse any other kind with contempt.

SEAY-CRANFILL CO. IS BUILDING NEW RESIDENCES

Homes Erected on Thirty-first Between Fort and Jefferson Streets.

Contracts yesterday afternoon were let for the first of a number of houses to be built on Thirty-first street between Fort and Jefferson streets and in that section by the Seay-Cranfill company, owners of Huaco Heights.

Letting of contracts was done through Fitzhugh, Skinner & Fannin, representatives of the owners. The buildings will be beautiful five-room bungalows, and two of them will be put under way this week. The owners of Huaco Heights propose quite a development plan. The addition has water, lights, sewer and the Huaco Heights car line passes within two blocks of the houses now to be erected.

WRECK OLD BUILDINGS.

A force of laborers yesterday began tearing away the sheds and old buildings on the ground at the northeast corner of Sixth and Mary streets. The wrecking of the wooden buildings is to make room for the big four-story brick building which is to be the home of the William Dry Goods company, wholesale. Plans have been accepted and the contract will be let as soon as the specifications are complete. The ground at Sixth and Mary streets, recently bought by H. L. Williams, has been transferred to the Williams Dry Goods company, the consideration being $35,000.

PEOPLE YOU KNOW

General Manager A. G. Whittington of the I. & G. N. railroad, accompanied by Mrs. Whittington and Mrs. J. P. Burrus, passed through Waco yesterday in the private car of Mr. Whittington. They were accompanying Mr. Whittington's mother to her home in Cisco.

Mrs. W. C. Robinson of El Paso is visiting her parents, Mr. and Mrs. R. N. Thompson, at Twenty-second and Ethel.

Henry Clayton, who is attending A. & M. college, is visiting his parents, Mr. and Mrs. S. H. Clayton, for a short time.

Rev. W. M. McIntosh of Iuka, Miss., is in Waco to preach for the revival meeting which has been projected by Rev. F. P. Culver and his congregation.

J. S. Waters and wife of Houston are in the city for a brief stay.

Miss Mary Phillips of Hubbard is visiting her sister, Mrs. Ella Baugh, on Jefferson street.

Joe Cavitt, prominent McGregor citizen, was here yesterday.

Rev. E. V. Cox is still in Corpus Christi, conducting a revival meeting.

Miss Susie Belle Hollon, daughter of Mr. and Mrs. Thos. S. Hollon, is rapidly recovering from a recent operation for appendicitis. She is at the Curtis sanitarium.

Notice to Contractors.

Sealed proposals addressed to J. F. Stampp, Commissioner of Streets, Waco, Texas, indorsed as "PROPOSALS FOR PAVING," will be received by the city secretary of the city of Waco, to be opened at 10 a. m., May 3, 1917, by the mayor and board of commissioners for furnishing all labor and material to pave South Fifth street from Jackson street to Speight street.

Approximately 18,150 square yards of paving and 3,025 cubic yards of excavating.

Bids on the following classes of paving will be considered:

Bitulithic,
Bituminous Concrete,
Verticle Fibre Brick, laid flat,
Creosoted Wood Block.

Certified check, payable to the Mayor of Waco, Texas, on a local bank, for five percentum of the amount of bid, shall accompany each proposal to insure the making of bonds and closing contract before any bid will be awarded.

Profiles and plans now on file in office of city engineer of Waco, Texas.

The mayor and board of commissioners reserve the right to reject any or all proposals.

JOHN C. DAVIS, City Secretary.

NEGRO SCHOOL TO CELEBRATE.

Big placards have been distributed throughout the city announcing Saturday, April 21, as field day for the colored children and citizens of Waco, under the auspices of the colored high school, of which Prof. J. A. Kirk is principal. The features of the day will be a patriotic parade at 10:30 o'clock, field exercises and basket dinner at the Taborian park.

ROTARY CLUB MONDAY.

Flower garden contest reports will be one of the Rotary luncheon features tomorrow at 12:15 at the Raleigh. A talk on "Rotary" will be delivered by Rev. E. E. Ingram, while J. E. Porter will speak on "Co-operation of Your Printer." The prize, a gold Rotary button, will be given by P. B. McPeak.

Unspoiled.

The lady who likes children was gushing over Helen, aged 3.

"How old are you, darling?" she asked.

"I isn't old," said Helen, "I'm nearly new."—Chicago Herald.

Cummins Asks Amendment to Espionage Bill Saturday

By Associated Press.

Washington, April 21.—Senator Cummins introduced today amendments to the espionage bill, prohibiting the use of grain in the manufacture of alcohol during the war and requiring food and clothing to be sold at reasonable prices. The bill probably will not come up until the army measure is disposed of.

Norway to Be Neutral, Says Christiana Cable

By Associated Press.

London, April 22.—That Norway's policy should, as heretofore, be one of strict neutrality was the agreement reached in the secret sitting of the storthing, says a Reuter dispatch to Christiania.

IRISH FOOD SITUATION.

By Associated Press.

Dublin, Ireland, April 21.—The food situation in Ireland has provoked from a certain section the demand that no food shall be allowed to leave the Irish shores, and it has been urged that unless the government prohibit export the people should forcibly hold up the food at the Irish ports. Though this demand has not been put forward from any responsible source, it has been noticed by Thomas W. Russell, vice president of the department of agriculture for Ireland, who referred to it as "John Mitchel's old cry of 'Hold the food.'"

Mr. Russell said only an overwhelming emergency could justify the risk of having their export trade destroyed. Last year Ireland had exported 46,000,000 pounds worth of food, and to destroy that export trade would destroy the import trade as well, since they could get goods into Ireland only by paying for them with exports. There was no necessity whatever for panic. There was an undoubted shortage of potatoes, but its pressure would not be felt till the end of May and they could make an effort to live on without potatoes until the new crop in June and July.

The government measures for the compulsory increase of tillage in Ireland are proving a success. They were welcomed by the class of small tenants who in most cases are tilling more than ten per cent extra required by the regulations. The large graziers and owners of grass lands held out at first, but the heads of agricultural department made it evident that they meant to insist on their compulsory powers, and that, unless the regulations were obeyed, the land would be taken over and put under tillage, whether the owners liked it or not. This has had its effect and the reluctant owners are obeying the order to till ten per cent more land than last year.

The Irish Homestead, looking forward to the end of the war and a continuance of high food prices, calls for the organization of every parish in Ireland upon co-operative lines for the purchase of its raw material and also for the sale of its products direct to the merchants and wholesalers in the towns. The increased cost of living he attributes largely to the fact that the distributive branch of agriculture had been organized in a very haphazard way. He declares that, if the work were organized, as in Denmark, Germany, Holland and Belgium, the people in the British Isles could have a food supply which would insure them against any danger of being starved out even if there were a thousand submarines lying off their harbors.

So Sensitive.

An attorney was consulted by a woman desirous of bringing action against her husband for a divorce.

She related a harrowing tale of the ill treatment she had received at his hands. So impressive was her recital that the lawyer, for a moment, was startled out of his usual professional composure.

"From what you say this man must be a brute of the worst type!" he exclaimed.

The applicant for divorce arose and, with severe dignity, announced:

"Sir, I shall consult another lawyer. I came here to get advice as to a divorce, not to hear my husband abused!"—Chicago Herald.

APPLY LA CREOLE IF HAIR IS GRAY

IT DARKENS YOUR GRAY HAIR EVENLY—STOPS DANDRUFF.

The famous La Creole Hair Dressing has been used for the last 30 years by men and women to really restore their gray, streaked with gray, prematurely gray or faded hair to that even, dark color and luster their hair used to be. Unlike other hair preparations or dirty dyes, La Creole revives the natural color glands to activity, so that after a few applications of La Creole to hair and scalp, you will be delighted to observe all your gray hair gradually turning dark and all your hair taking on that luster, freshness, fluffiness and thickness and even, dark tone your hair used to have. It is a fact that not even a trace of gray shows after treatment with La Creole Hair Dressing. Any druggist can easily supply you, or sent prepaid for $1 by Van Vleet Drug Co., Memphis, Tenn. La Creole also stops dandruff and falling hair, and causes new hair to sprout all over your head.

BELLMEAD FLAG RAISING EVENT FOR YESTERDAY

Several Hundred People Observe Exercises There Saturday Afternoon.

Listening to the singing of "America" and the "Star-Spangled Banner," several hundred people yesterday afternoon at 3:30 witnessed the flag raising ceremonies at Bellmead. A special train was provided by the M., K & T. railroad, free, for those who attended. The United States flag and Texas flag were in evidence. The following program was observed:

Marter of ceremonies, W. V. Crawford.
Prayer, S. R. Hankins.
Song, "America," audience.
Address, Mayor John W. Dollins.
Address, Will Edmond.
Solo, Mrs. D. J. Byars.
Address, J. M. Penland.
Address, John Maxwell.
Address, A. J. Garrett.
Song, "Star-Spangled Banner," audience.
Cornet, Prof. Charles Parker.
Piano, Mrs. C. H. Anderson.
Music director, C. H. Anderson.

"TIZ" GLADDENS SORE, TIRED FEET

NO PUFFED-UP, BURNING, TENDER, ACHING FEET—NO CORNS OR CALLOUSES.

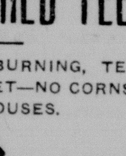

"Tiz" makes sore, burning, tired feet fairly dance with delight. Away go the aches and pains, the corns, callouses, blisters, bunions and chilblains.

"Tiz" draws out the acids and poisons that puff up your feet. No matter how hard you work, how long you dance, how far you walk, or how long you remain on your feet, "Tiz" brings restful foot comfort. "Tiz" is magical, grand, wonderful for tired, aching, swollen, smarting feet. Ah! how comfortable, how happy you feel. Your feet just tingle for joy; shoes never hurt or seem tight.

Get a 25-cent box of "Tiz" now from any druggist or department store. End foot torture forever—wear smaller shoes, keep your feet fresh, sweet and happy. Just think! a whole year's foot comfort for only 25 cents.

For Acid Stomach, Indigestion, Gas or Food Souring--Pape's Diapepsin

Instant Relief! Neutralizes excessive stomach acids, stopping dyspepsia, heartburn, belching, pain.

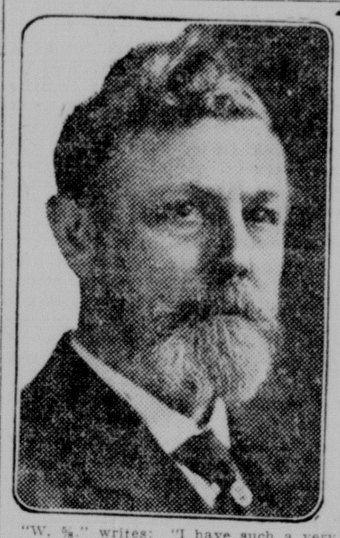

Do some foods you eat hit back—taste good, but work badly; ferment into acids and cause a sick, sour, gassy stomach? Now, Mr. or Mrs. Dyspeptic, jot this down: Pape's Diapepsin helps neutralize the excessive acids in the stomach so your food won't sour and upset you. There never was anything so safely quick, so certainly effective. No difference how badly your stomach is upset you usually get happy relief in five minutes, but what pleases you most is that it helps to regulate your stomach so you can eat your favorite foods without fear.

Most remedies give you relief sometimes—they are slow, but not sure. Pape's Diapepsin is positive in neutralizing the acidity, so the misery won't come back very quickly.

You feel different as soon as Pape's Diapepsin comes in contact with the stomach—distress just vanishes—your stomach gets sweet, no gases, no belching, no eructations of undigested food, your head clears and you feel fine.

Go now, make the best investment you ever made, by getting a large 50c case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or any stomach disorder due to acid fermentation.

The DOCTOR'S ADVICE by Dr. Lewis Baker

The questions answered below are general in character, the symptoms or diseases are given and the answers will apply in any case of similar nature.

Those wishing further advice, free, may address Dr. Lewis Baker, College Bldg., College-Elwood streets, Dayton, Ohio, enclosing self-addressed stamped envelope for reply. Full name and address must be given, but only initials or fictitious names will be used in my answers. The prescriptions can be filled at any well-stocked drug store. Any druggist can order of wholesaler.

"W. S." writes: "I have such a very severe cough and cold and have not been able to get anything to help me. It is weakening my system."

Answer: Use the following and your cold and cough will vanish and you will soon be strong again. Get a 2½ oz. bottle of concentrated essence mentho-laxene and take every hour or two. This can be taken pure or made into a full pint of home-made syrup. Full directions as to use will be found on bottle. This is a mild laxative and will drive the cold from the system.

* * *

C. L. asks: "I have tried to cure dandruff, itching scalp, falling hair and baldness with numerous tonics, etc., but in vain. What do you recommend?"

Answer: I have been recommending plain yellow minyol for the past seven years and scores of my patients are delighted with the quick, pleasant action of this remedy in stopping itching, falling hair, dandruff, etc. It gives the hair health, luster and vigor as nothing else does. Obtain in 4-oz. jars with full directions.

* * *

"Southern" writes: "I lived in the south for many years and suffer with malaria frequently. Am sallow skinned, have dyspepsia, belching, sour risings, constipation and am sluggish or sleepy half my days. I want something besides calomel for permanent benefit."

Answer: Cardiol tablets is very successful in relieving Southern malaria and dormant liver condition. It is far superior to calomel and I advise them for anyone who is afflicted as you are. Druggists supply in sealed package with full directions.

* * *

Miss M. Mc. asks: "I am writing for help. I am so very, very thin and 'scrawny' that I would give most anything to become plump, for I know it would make me more attractive. What prescription can you give me?"

Answer: Judging by my correspondence there are a great many young people who want advice as you do. I know of nothing so good to aid the nutritive processes, as three-grain hypo-nuclane tablets and very frequently advise their use in these columns. Several months' treatment is necessary to produce noticeable results.

* * *

Worried Man writes: "Let me say that my condition puzzles and worries me. In the last year I seem to have been growing old rapidly, though only 38. My food and sleep do not recuperate my strength and energy, and, lately, I have dizzy spells, trembling, headaches, loss of appetite, memory and hopelessness. Despondency and worry over my condition are ever present."

Answer: Cheer up, get well and then conserve your vitality by proper, temperate living. Obtain three-grain cadomene tablets in sealed tubes with full directions, use them and an agreeable, pleasing restoration should ensue to your entire satisfaction.

* * *

J. R. G. writes: "These are the symptoms which lead me to think I need medicine for kidneys and bladder: Severe headache, blood shot eyes, chills followed by fever. Frequent desire to urinate, but scanty results of a dark color and bad odor. Also smarting and stinging pains."

Answer: When such symptoms are present balmwort tablets are prescribed to tone up and increase the elimination, neutralize the alkalinity, and produce natural functioning. Get them in sealed tubes with full directions.

* * *

Mr. L. C. B. asks: "Do you think it is possible to reduce my weight from 240 pounds to about 190 pounds?"

Answer: It is impossible to say just how much one can reduce until after trying, but five-grain arbelone tablets should be used according to directions with each sealed tube. If the flesh is unnatural you should easily reduce as desired.

* * *

Mrs. N. B. B. asks: "I suffer from headache and constipation periodically and my blood seems too thick, causing languor and tired feeling. I will thank you to prescribe for me."

Answer: Three-grain sulpherb tablets (not sulphur) are most effective in relieving constipation, thinning the blood, and removing the symptoms of languor, etc. I advise you to begin taking as per directions with each sealed package.

* * *

Mrs. K. L. writes: "Owing to the severe winter several of my family are suffering from neuralgia, lumbago and rheumatism. None are seriously ill, but what will relieve the pain and cure them?"

Answer: To cleanse the body of the poisons which cause these troubles I recommend three-grain sulpherb tablets (not sulphur tablets). For quick local relief apply twice or more daily a penetrating, soothing ointment sold as pine-o-latum.

NOTE: For many years Dr. Baker has been giving free advice and prescriptions to millions of people through the press columns, and doubtless has helped in relieving illness and distress more than any single individual in the world's history. Thousands have written him expressions of gratitude and confidence.

Something New and Novel

Dr. R. R. White, of Drs. Scott and White, Temple, Texas, in a talk made about the following statement: "The common habit of breathing through the mouth during sleep is both extremely insanitary and unhealthful. Scientists assure us that every cubic foot of air contains millions of atoms of lint, dust and disease germs. But our nasal passages are so constructed as to filter, moisten and warm the air, which is very necessary to the best oxygenation and decarbonation of the blood.

That the cold, dry, unfiltered air entering the tender air cells through the open mouth, over tonsils is, no doubt, the primary cause of most all early decaying teeth, tonsilary, throat and lung troubles.

The above from such an eminent professional suggested the imperative need of an appliance that would insure natural breathing during sleep. The result is a patent pending on the UNIVERSAL CHIN-SUPPORTER. It is for both adults and children, is neat and cozy, adjustable to fit anyone and worn with comfort. It prevents mouth breathing, loud snoring and for ladies to prevent and remove wrinkles, keeping the features round and plump. Nothing on the market, at any price, has any comparison.

All students, adults and most children will be benefited many times the cost, and to consumptives and all who have weak lungs it will be almost a crime if indifferent to the protection offered them.

Price—Ladies $1.25; Gentlemen and Children $1.00.

Can be had at Sanger Brothers Toilet Department, or Phone 1191 or write, enclosing price, and we will mail one promptly.

Universal Chin-Supporter Co.

WACO "The Service Agency" TEXAS

SEEMS EVERYONE HEARD ABOUT IT

ALL WANT TO TRY NEW DRUG THAT DRIES UP CORNS SO THEY LIFT OUT.

Good news spreads rapidly and druggists here are kept busy dispensing freezone, the recent discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.

A quarter of an ounce costs very little at any pharmacy, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved and soon the corn is so shriveled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

Says Thick Sluggish Blood Should Be Purified

A Greasy, Pimply Skin, a Foul Odor to Perspiration, Boils and Aches and Pains All Banished by Sulpherb Tablets. Like Grandma's Remedy for Spring.

Take these tablets made of sulphur, cream of tartar, calcium sulphide and extracts of rare herbs and take regularly for a month or so, and you can drive the poisons out of your system. Sulpherb Tablets are wonderful to overcome constipation, sluggish liver and kidneys and they quickly start all the eliminative organs working. They "flush the sewers," as it were, and you will feel their fine effects all through spring and summer. Headaches, catarrh, neuralgia, rheumatic pain, constipation and kindred ailments due to poisons in the blood, all go, the skin clears, pimples and boils are absorbed and pass out through the proper waste channels. Every package is guaranteed so you can prove it easily. Good for children and adults. All druggists 50c per sealed tube. Get Sulpherb Tablets (not sulphur tablets).

How Fat Folks May Become Slim

To be overstout is humiliating. Style and fat folks are strangers. Therefore, people who are carry around a burden of unhealthy and unsightly fat will be glad to know how they may reduce their weight without starvation diet or tiresome exercises.

If you want to get rid of superfluous fat in a simple, safe and reliable way here is a test worth trying. Spend some time in the open air, practise deep breathing and get from any good druggist a box of oil of korein capsules; take one after each meal and one before retiring at night; also follow the other simple directions that come with the box.

Weigh yourself once a week so as to know just how fast you are losing weight, and don't leave off the treatment, or even skip a single dose, until you are down to normal weight, so that you feel and look wonderfully younger and healthier.

Every person who is too fat should give this treatment a trial. You will probably find it is just what you need. Amaze your friends!

CROUT

WACO HI WINS HONORS AT S M U TOURNAMENT

Waco scored third in points among high school entrants in the first annual interscholastic athletic tournament held by the Southern Methodist university, at Dallas, yesterday. Thirteen Waco high school men were represented in the field events and two in the debate. No distinction was made in the difference existing between high schools and academies and the high school contestants were placed at a disadvantage.

In the high school field the Waco debaters took first honors yielding only to Weatherford academy for the title. The team was made up of Ed Roy Miller and Erison Stafford under the leadership of Coach Davis.

San Marcos Baptist academy won the track event out of a field of thirty-five teams and 170 contestants. Ferris McGarrity of Waco won first place over all in the pole vault, his record being ten feet, eight and one-half inches. J. D. Pounds took honors in the 120-yard hurdles, making the race in fast time. Abbott of Oklahoma was the highest individual point scorer.

Eliminating the academy entries Waco took third place in the track meet over all high schools. It was announced by the management that next year at the meet a distinction would be made between the two classes of entrants.

GERMANS IN FIJI ISLES.

Sydney, Australia, April 21.—A pro-German movement in the Fiji Islands is reported. According to recent advices serious trouble may develop from a movement instituted by a native who exercises great influence over his fellow islanders and professes to be "Ulumalua" or "the mouthpiece of the gods." This cult is said to be a form of the devil-worship which antedated Christianity in Fiji, and a manifestation of sedition. The agitation is said to have caused the native's followers to consider the present "nguana vou" or a "new era" and to look for the return of a god whose dwelling place is in a range of mountains on Viti Levu, one of the larger islands in the Fiji group. According to ancient myths, this god is to enter his kingdom of Fiji, expel all the whites and lead the Fijians back to their old customs and form of life.

The authorities have learned that certain sections of the Fijians sing seditious songs, one of which deals with war. In it the singers describe a battle raging between the British and German armies. The Germans are victorious and, according to native traditions, the British give them hostages in token of surrrender. The native gods, including Dakuwaqa, the Fijian Neptune, are declared to be on the side of Germany. Submarine and airship combats are described, every one of which is won by the Germans. Moreover, it is the belief of these natives that it is through Germany that the Fijian people are to come into the rights which they allege were taken from them by the British.

The colonial government is understood to be pursuing a waiting policy. Fiji's population is: Fijians 90,000, Hindoos 50,000, whites 900.

Everybody.

Plans for Summer Camp Are Being Worked Up

Mrs. A. J. Flowers, boys' secretary of the Y. M. C. A., announced that the plans for the summer camp were being worked out and that no little effort was being made to make the camp this year the largest and best of any in the past. He also stated that the older and younger boys would camp together this year and that Mr. Charles Braun and T. S. Montgomery would assist with the camp. Garland Henson and Clyde O'Neal will be the captains of the two groups.

RECORD FOR SILENCE.

By Associated Press.

Rome, April 21.—Baron Sydney Sonnino, Italy's secretary of state, has during Italy's two years of war, established a record for silence among European cabinet members. During that period he has authorized no newspaper interviews and his public speeches, made exclusively in parliament, have been few. His reserve is based on the old-fashioned rule that the less a diplomat says the fewer embarrassing explanations he will be called on to make.

When attacked during the sittings of parliament by speakers of the opposition on his conduct of the foreign affairs of his country, he remains silent for the most part and when he does answer it is in monosyllables of admission or denial. When he is on the side of the opposition to the government his speeches are short but sharp and to the point.

In private Baron Sonnino is a charming conversationalist, witty, and even talkative; though never for publication. At that he is a newspaper publisher and author. He is part owner of Rome's prosperous afternoon paper, the Giornale D'Italia. At present in his sixty-eighth year, born of an English mother and a Jewish father of Italian origin, he early began the study of national financial and social problems, writing a work, "The Peasants in Sicily," and founding in 1878 the newspaper Rassegna. He entered parliament in 1888 and has continued there since, membership in that body being a requirement of a minister. In 1893 he was minister of finance and prime minister in 1909.

Expert Opinion.

"Do you think it a waste of time to say 'please' over the telephone?"

"Not any more a waste of time than half the other conversation that goes over the wire," replied the cynical operator.—Washington Star.

Pertinent Question.

Convict—I'm in here for having five wives.

Visitor—How are you enjoying your liberty?—Boston Transcript.

Everybody.

If you are interested in "The Cemetery Beautiful," drive out to Park Lawn, Fourth and Gurley streets, today and let me show you the grounds.

If you are not interested, come anyway and be convinced that you should be interested.

If you will phone me, No. 3959, I will be glad to send a car and bring you out to the grounds. A. L. STEIN.

TOO LATE TO CLASSIFY.

LOST—Black and white fox terrier puppy; last seen on N. 5th St.; answers to the name of Bobbie. 1917 tag No. 112. Reward if returned to 517 Indiana.

FOR SALE—New, medium-sized refrigerator; also wicker furniture and Deltox rugs; bargains. Phone 1492.

FOR SALE—Jersey calf. See 2211 Austin Avenue.

FOR RENT—Nice 4-room cottage, 626 S. 15th; strictly modern. Apply 918 S. 15th, or ring 1516.

WANTED—Good white house girl, American or German; no objections to age. Good home for right party. Apply 1820 South Second St.

Sure It Was His Wife.

Three o'clock was the very earliest the man could get up to the store, so his wife asked him to meet her then.

"I don't know in what department I shall be at that time, but just before 3 I will telephone to the clerk at the information bureau near the main entrance, and if you will just step over and ask him he will tell you where I am."

At two minutes past three the man sought information as to the whereabouts of his wife.

"I have a message," said the clerk, "from a woman who said her husband would inquire for her about 3 o'clock. Maybe it is for you. She said tell you that she has gone to Blank's store over on Sixth avenue, to finish her shopping because the clerks in this store are impudent, the place is ill-ventilated and she couldn't find anything she wanted here anyhow, and never has been able to find anything here, and this is positively the last time she will ever try to find anything here. Of course that might have been your wife——"

"Oh, yes," said the man, "that was her, all right."—New York Sun.

"Out of Bed Three Times"

If the victim of kidney disorders and bladder irritation is compelled to arise even once in the night, there is a condition which should be promptly corrected. If arising more than once immediate attention is the part of wisdom.

BALMWORT TABLETS OF URIC

are peculiarly fitted to promptly relieve soreness and aching in the kidney regions. They allay inflammation, restore normal secretion and correct the alkalinity of the waste secretions, and thus stop the source of irritation, pain and annoyance. There are thousands of benefited users of Balmwort Tablets and all good, conscientious druggists recommend and sell them. Price, $1 a tube.

CORRECT KIDNEY TROUBLE

Sold by all druggists.

Miller's Antiseptic Oil, Known as

Snake Oil

Will Positively Relieve Pain in Three Minutes.

Try it right now for Rheumatism, Neuralgia, Lumbago, sore, stiff and swollen joints, pains in the head, back and limbs, corns, bunions, etc. After one application pain disappears as if by magic.

A never-failing remedy used internally and externally for Coughs, Colds, Croup, Sore Throat, Diphtheria and Tonsilitis.

This oil is conceded to be the most penetrating remedy known. Its prompt and immediate effect in relieving pain is due to the fact that it penetrates to the affected parts at once. As an illustration, pour Ten Drops on the thickest piece of sole leather, and it will penetrate this substance through and through in three minutes.

Accept no substitute. This great Oil is golden red color only. Every bottle guaranteed: 25c and 50c a bottle, or money refunded. At Old Corner Drug Store and leading druggists.

Relieved of Labor.

First Farmer—When are ye going to start yer plowing?

Second Farmer—I don't expect to do none.

First Farmer—You don't? Why?

Second Farmer—Won't have to. I've let a lot of amateur golfers use my fields for practice.—Snap-Shots.

STOMACH SYMPTOMS

A leading physician of Chicago says: "Merely easing the pain with narcotics to give relief is a long ways from a cure for stomach trouble. Besides the danger of neglect or inadequate treatment may lead to more serious maladies. What appear to be only minor troubles are often the symptoms of gall stones, acute indigestion, gastritis, constipation, auto-intoxication, yellow jaundice, appendicitis, cancer and ulcers of the stomach and intestines, or other fatal ailments." Stomach sufferers should take warning. Do not have blind faith in treatments that are giving no results. Much suffering could be avoided, many surgical operations prevented, scores of lives saved had Mayr's Wonderful Remedy been taken in time. It is not a long-drawn-out treatment. It acts on the very source and foundation of stomach, liver and intestinal ailments, eliminating from the system the hard, poisonous catarrhal secretions and shows them to you. Try a dose tonight—tomorrow your days of torture will be over and another friend will be added to nearly a million grateful human beings, many who declare Mayr's Wonderful Remedy has saved their life. Get it from your druggist today—tomorrow may be too late. For sale by W. B. Morrison Drug Co. and druggists everywhere.

Eyeglasses No Longer Detract From Appearance.

In many cases they improve. Modern eyeglasses as we make them are rimless lenses held securely but comfortably on the nose by inconspicuous Keelock mountings.

As graduated optometrists we feel confident in our ability to competently examine and prescribe for your eyes.

That our confidence is justified is indicated by our greater number of patients.

Over 30,000 people in Waco and vicinity are wearing glasses prescribed by this firm, and over 30,000 people are constantly recommending our goods and services to their frineds. The Exclusive Optical Store at the big electric spectacle sign.

Tonight! Take Dodson's Liver Tone! Better Than Calomel For Liver

Calomel sickens! If bilious, constipated and headachy read my guarantee.

Listen to me! Take no more sickening, salivtating calomel when bilious or constipated. Don't lose a day's work!

Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile, crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just take a spoonful of harmless Dodson's Liver Tone.

Here's my guarantee—Go to any drug store and get a 50c bottle of Dodson's Liver Tone. Take a spoonful tonight, and if it doesn't straighten you right up and make you feel fine and vigorous by morning, I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it cannot salivate or make you sick.

I guarantee that one spoonful of Dodson's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and making you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

Perritt, p	2	0	0	0	2	0	Geist, p	1	0	0	0	0	0
Head, p	1	0	0	0	1	1	Tretter, p	1	0	0	1	1	0
Blunk, p	0	0	0	0	0	0	Woodall	0	1	0	0	0	0
Conwell	1	0	1	0	0	0							
Totals	31	6	9	27	14	2	Totals	33	4	8	24	11	2

Conwell batted for Perritt in 6th inning.
Woodall batted for Tretter in 9th inning.

Score by innings—
Waco .....000 402 00*—6
Fort Worth .....000 011 002—4

Innings pitched: By Perritt 6, by Head 2 1-3, Geist 3 2-3.
Runs: Off Head 2, Geist 4.
Hits: Off Perritt 6, off Head 1, off Geist 4.
Bases on balls: Off Perritt 2, off Head 4, Geist 4, Tretter 1.
Wild pitch: Blunk.
Struck out: By Perritt 2, by Head 1, by Blunk 1, by Geist 3, by Tretter 2.
Two-base hits: Williams, Crichlow, Bernsen.
Home run: Grubb.
Sacrifice hits: Miller, Bailey.
Stolenbases: Miller, James.
First on errors: Waco 2, Fort Worth 1.
Left on bases: Waco 7, Fort Worth 9.
Time of game: 2:05.
Umpire: Hayes.

The Navigators got in under Geist, the Fort Worth twirler, in the fourth yesterday and knocked him out of the box. His successor, Tretter, didn't fare much better, and when the benediction was passed on the fourth inning, Waco counted up four scores, one of them a home run by Grubb.

"Poll" Perrit started off on the mound for the Navs and was relieved by Head in the seventh. Head landed in a hole at the start of the ninth and was promptly pulled by Manager Hardy, Blunk finishing the game.

A cool breeze blowing from the direction of the Packing House City cheered the Atzmen up in the ninth and they put forth a mighty rally, but only two of the necessary four runs were obtained and the Panthers dropped another one.

SUBS TAKE FAST GAME

DALLAS—The Submarines evened the series today by winning a well-pitched game 2 to 1. Schiebner's hitting and Litschi's base running were responsible for both Dallas scores. Ens' fielding featured. The score:

Y SWIMMING CAMPAIGN

By "Y" Physical Director.

As the summer days are drawing near, it is the wish of the Y. M. C. A physical department that every boy should get his share of the joy which comes through the healthy recreation, "the art of swimming." Every boy owes to the general public as well as himself, theart of knowing how to swim.

The school will be taken up into different groups, taking in all grammar schools, and working boys. Each school will be taken separately and the boys are to come three successive days. Upon entering the building the boys will register (free), pass to the dressing room, going from there to the shower room and then to the tank.

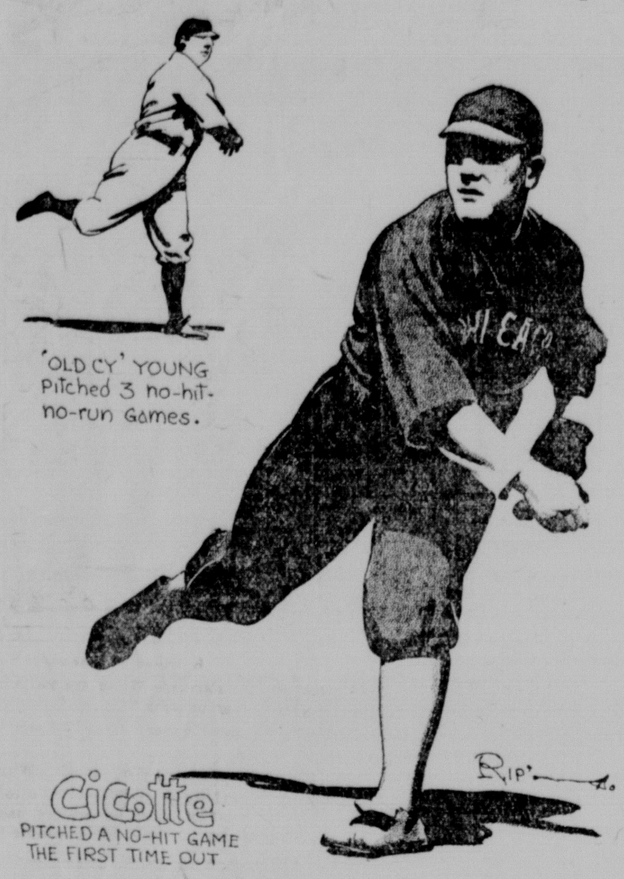

It is to be understood that Physical Director Hunter will have with him a competent corps of life savers, who will be on the job at all times while the boys are in the school. The first part of the lesson in swimming is the land drill, familiarizing the boys with the movements and also bearing out theold saying "Don't go near the water until you learn to swim." Then the boys take up the breathing exercises in the water, after which the glide is taken and so on, until finally the finishing touches are given.

Physical Director Hunter has been associated with Corsan, the most noted swimming teacher in the United States, besides having held three similar campaigns. In his last school over 2,000 boys were taken in. The school will start on the first of May.

He—You used to say there was something about me you liked.

She—So I did. But you've spent it all.—Minnehaha.

Stingy! —By Ripley

By Robert L. Ripley.

Eddie Cicotte, the knuckle ball hurler of the Chicago White Sox, pitched the first no-hit-no-run game of the season when he shut out the St. Louis Browns, 11 to 0. This rare feat was the first notable happening of the season, and also it was Cicotte's premier performance this year.

The doughty little hurler struck out five, walked three and hit one, and one reached first on an error by Gandil, making a total of five that touched first base. One man, Shotten, stole second.

No-hit games occur but a few times in a year—and some years not at all. The last game of this kind was twirled by "Dutch" Leonard of the Red Sox against the Browns last August.

"Red" Ames of the St. Louis Cardinals rivalled Cicotte's performance while pitching for New York. Ames opened the season in 1909 against Brooklyn, and did not allow the latter a hit or run in nine innings, but lost the game in the thirteenth.

Wiltse, New York; McIntyre, Brooklyn, and Kimber, Brooklyn, all hurled games of ten innings without a hit or run.

"Old Cy" Young, one of the grandest players that ever trod a diamond, pitched no less than three no-hit-no-run games during his long career of twenty-one years. One of these games was perfect. While working for the Red Sox against the Athletics, May 5, 1904, he allowed neither a hit nor a run nor a man to reach first base. Only twenty-seven men faced him, and all were retired in rotation.

Addie Joss of Cleveland, in a game against the White Sox October 2, 1908, accomplished the same feat.

'Way back in the olden days—the days of '79—J. L. Richmond of the Worcester club in the National league pitched no less than three such games.

BROWN-CUTLER MATCH WILL BE STAGED SOON

Another big treat is in store for Waco wrestling fans. Harry Swoboda has scheduled another bout between Pet Brown and Jack Cutler of Detroit, Mich., which will be staged at the Auditorium theatre Monday night, April 30. Cutler is already here and will complete his training at the Y. M. C. A. Before going into the records of the man who is to meet the Taylor grappler it can be said that Brown will meet one of the toughest men he has met in Waco.

Cutler has a record that makes him stand well up in comparison with Brown. He has a victory to his credit over John Kilonis "The Greek Demon," who has recently appeared here. In one hour and fourteen minutes Cutler pinned the Greek's shoulders to the mat twice. Kilonis is known as one of the best men in his class. He gave Cutler no end of trouble for forty-five minutes. Then Cutler went to work in earnest and secured the first fall in fifty-eight minutes. He got the second fall in sixteen minutes.

He has also met and defeated Wilfred Barrett, the Canadian light heavyweight champion. Not much is known of Barrett here but he is some "pumpkin" in the wrestling game In this match Cutler won two straight falls in sixty-six minutes and twenty-eight minutes There is one feature not to be overlooked about Cutler. Like Brown, he is a man of supreme endurance and recuperative power So it will be two of a kind when Cutler and Brown meet.

Brown is a type that can stay all night if the match demands. He works to get the fall after his opponent has spent his energy. Stamina is Pet Brown's stock in trade. The longer he goes the better he seems to get. Often after an hour or an hour and thirty minutes of wrestling physicians have taken his respiration and found it almost down to normal.

Brown and Cutler are of the same type in build. Both are tall and not overmuscled, Cutler is five feet eleven inches tall. To see him on the street he would not be taken for a wrestler. His main stock in trade is his speed and his ability to carry the pace over a long stretch. That is the case with Brown. Like Cutler, Brown is tall and not of the low wrestling type usually found in grapplers. So it will sure enough be a case of "Greek meet Greek" when the pair get together.

CUT OUT CHAMPIONSHIP

By Associated Press.

New York, April 21.—Championship tennis play is to be eliminated from all succeeding tournaments this season, according to an announcement made today by the officers of the National Lawn Tennis association. This action has been taken after consultation with Secretary of War Baker, who approved of the idea of holding the 200-odd tournaments carded under a plan to make these competitions a means of healthful exercise minus the feature of titular play of all types.

Chicago Buys Merkle; "Bonehead" Play Recalled

By Associated Press.

Chicago, April 21.—The most historic of what baseball calls "bonehead" plays was recalled today with the announcement that Fred Merkle of the Brooklyn Nationals had been purchased for cash by the Chicago team to play first base in the absence of Vic Saier, who broke a leg in a recent game.

Politics makes no stranger bed-fellows than baseball, for it was Merkle's failure to touch second base that cost the New York Nationals, with which he then played, the league championship. The game went to Chicago, which then took the world's championship from Detroit.

BREAKS WORLD RECORD

By Associated Press.

Chicago, April 21.—Johnny Griffiths of Akron, Ohio, won from Jimmy Duffy of Lockport, N. Y., in a twelve-round bout at Youngstown, Ohio.

Mike McDermott of the Illinois Athletic club, Chicago, swam the 200-yard breast stroke in the 750-foot tank in the national championship at Pittsburg in 2:39 4-5, clipping five seconds from the world's record.

Sherman H. Hall, New York, won the foils title in the national tournament of the Fencers' league of America at New York. Leon Munes, New York, won the duelling swords time, and Arthur A. Lyons, New York, was awarded the sabres championship.

ANNUAL DRAKE RELAY

By Associated Press.

Des Moines, Iowa, April 21.—Honors were fairly evenly divided in the eighth annual Drake relay meet held in the Drake stadium here today. In the university class, Notre Dame won the 27-mile event, Chicago the four-mile, Northwestern the half-mile and Illinois the one-mile.

In the college class, Wabash, a newcomer at the meet, took first in both the mile and half-mile events, breaking a meet record in each case. Morningside won the two-mile in the college class.

In the special 120-yards hurdles, Simpson of Missouri came within one-fifth of a second of equalling the world's record for the distance, held by himself when he had finished ahead of four starters in :14 4-5. Ames of Illinois was second.

Events and winners: Four-mile university class—Chicago first, Ames second; time 18:22 2-5. Half-mile college—Wabash first, Grinnell second; time 1:30 1-5. One-mile university class—Illinois first, Missouri second; time 3:21 4-5 (new meet record). Two-mile college class—Morningside first, Cornell second; time 8:16 1-5. Half-mile university class—Northwestern first, Missouri second; time 1:29 2-5.

THEATRE NEWS OF WEEK IN WACO

HIPPODROME PROGRAM.

Today and Tomorrow—"The Cheerful Giver," five-reel Triangle with Bessie Love. Also "Max Comes Across," two-reel Essanay comedy, with Max Lender.

Tuesday—"Paddy O'Hara," five-reel Triangle with William Desmond. Also "Petticoat Perils," Triangle comedy.

Wednesday—"His Father's Son," five-reel Metro with Lionel Barrymore. Also "Birthday Night," Triangle comedy.

Friday and Saturday—"The Cure," two-reel Chaplin, featuring Charlie Chaplin. Extra Friday, "The Old-Fashioned Young Man," five-reel Triangle with Robert Harron. Extra Saturday, "Passion," fourth of "Seven Deadly Sins," with Shirley Mason.

"MAX COMES ACROSS" AT HIPPODROME TODAY.

The famous French comedian, Max Linder, originator of the slapstick comedy, has returned to the screen and will be featured in a series of twelve two-reel comedies that bid fair to rival the famous fun of Charlie Chaplin, Max's only rival. The first of these, "Max Comes Across," will show at the Hippodrome today and tomorrow. Max Linder is a typical Frenchman, but is an experienced stage and screen player and such a comedian that he belongs to the world rather than any certain race. His parents were both actors, but both refused to educate him for the stage until he had without their knowledge been studying the profession for a year and won a prize in a conservatory in Paris. When the war broke out, Linder volunteered for service and became a dispatch carrier. He was shot through the lung just above the heart, and when recovered joined the airplane service. His lung was not able to stand this, however, and he was honorably discharged from army service. Immediately he accepted the offer of the Essanay company to come to America, and these twelve inimitable comedies are the result. "Max Comes Across" is built about the voyage over to America, and is filled with bubbling humor and hilarity.

"CHEERFUL GIVERS" AT HIPPODROME TODAY.

That little Bessie Love is rivaling all ingenues of the screen for first place in the affections of picture patrons is very apparent, and her new Triangle picture, "Cheerful Givers," showing at the Hippodrome theatre today and tomorrow, will do much to keep her in favor. Entirely aside from the delightful story of real comedy and interesting drama, the picture has a twofold interest. This is because Bessie Love is cast in her best role, that of a little girl who dons boy's clothes in order to get a position that will help support her family, and because the Triangle Kiddies, about fifteen of them this time, are important members of the cast. These little children, some of them unusually talented as in the case of Georgie Stone, play with a naturalness and appeal that is hard to find in most children of the "stage," and every scene in which they appear is unusually effective. The children of the little bankrupt orphanage are "farmed out," and Debby, too, goes after a "job." Her disgmise as a boy fools very few people, however, and the fun comes when the young man of the house sees her and instantly recognizes her big eyes of brown. Kenneth Harlan is the leading man, and is well cast. Pauline Stark, Winnifred Westover and Bessie Buskirk, three others of the very young set of Triangle players, are in the cast, and Josephine Crowell and Spotiswoode Aitken are excellent in the older roles.

"The Divorce Question," at the Orpheum this week.

Wm. Desmond in "Paddy O'Hara," a five-reel Triangle at the Hippodrome Tuesday.

"PADDY O'HARA" AT HIPPODROME TUESDAY.

From parson to Irish newspaper correspondent is a long way to go, but William Desmond finds it very easy to change from the one character to the other. The Irishman of wit and courage is his last portrayal, being in "Paddy O'Hara," the new Ince Triangle picture showing at the Hippodrome theatre Tuesday. Desmond's first screen appearance was as the staid young Scotch minister in "Peggy" with Billie Burke, and since that time his characterizations have been many and varied. This last story, from the pen of J. G. Hawks, flashes with humor and excitement throughout its rapid fire action. Mr. Desmond is a reporter, who because of his Irish wit and devilry is assigned to get first-hand and authentic information for his paper concerning the war in the Balkans. How he undertakes a "scoop" and bumps into a proud little princess as his chief opposition, is the theme of the stirring and enjoyable comedy-drama. Mary McIver is the princess, and Robert McKim and J. J. Dowling are well cast in the support. The settings are elaborate in many instances, the most noticeable one being the offices of the English newspaper, which are far different from those of Americk.

ORPHEUM THEATRE.

Mary Lawson's Secret is a story of a young girl held on circumstantial evidence for murder. The girl becomes the innocent victi mof intense rivalry between two doctors, the one an old practitioner of the town and the other a young man, a recent arrival.

The younger man is found murdered and the girl, through circumstantial evidence is convicted of the crime. She escapes while being taken to prison and begins life anew in a distant city. Here she falls in love with a young workman and marries him only to later find that he is wealthy and has been living incognito because of a boyish prank.

Settled happily in her fine new home the spectre of exposure and arrest haunts her through her chance discovery by the old doctor, now a drunkard and an outcast. From then on until the final smashing climax the play moves swiftly, without a false note or let down in interest.

"The Divorce Question," by William Anthony McGuire, a powerfully written sketch presented by Ed W. Rowland and Lorin J. Howard, takes the stand of the Catholic church's opposition to divorce, and proves conclusively that divorce does not obtain the conditions sought for, and particularly is emphasized the parents' duty to the children. This strikingly original sketch will be seen at the Orpheum Theatre on April 23, 24 and 25. There are delightful touches of comedy interwoven with this truth-telling story that gives the necessary contrast and makes the salient features of the play stand out all the more prominent. Special scenery and a well balanced cast help to make it a production worth while.

Bessie Love in "The Cheerful Giver," a five-reel Triangle, at the Hippodrome today and tomorrow.

REX THEATRE PROGRAM.

Today—"Bought," featuring Frederick Lewis and Ethel Gray.

Tomorrow and Tuesday — "The Dancer's Peril," featuring Alice Brady.

Wednesday and Thursday—"High Finance," featuring George Walsh.

Friday and Saturday—"Her Greatest Love," featuring Theda Bara.

AT THE REX MONDAY AND TUESDAY

Alice Brady in "The Dancer's Peril," will be at the Rex Monday and Tuesday. Miss Brady numbers her friends and admirers by the hundreds of thousands and all of these friends will want to see her in "The Dancer's Peril," her latest screen production, in which she comes to the Rex theatre on Monday and Tuesday. This is one of the greatest productions yet made by the World Film corporation. It is gorgeous from a scenic standpoint and the story is marked by high spots of romance, intrigue and intensely dramatic situations. In this drama Miss Brady appears as the big star of a Russian ballet and there makes a tremendous hit. The impresario of the ballet becomes infatuated with her, but she is in love with a young man. Love triumphs, but only after many obstacles have been overcome.

"HIGH FINANCE" WEDNESDAY AND THURSDAY AT THE REX

The King of Smiles with a story of love across the continent, fights that finish, laughs and tears, a typical Wm. Fox offering that pleases.

THEDA BARA IN "HER GREATEST LOVE" AT THE REX THEATRE

A super de luxe William Fox production with the screen's best known star, Theda Bara, in her latest photo-drama, "Her Greatest Love," will be shown at the Rex Friday and Saturday. All critics agree that this is a genuine Theda Bara triumph, showing her in all sweetness and simplicity.

"HIS FATHER'S SON" AT HIPPODROME WEDNESDAY

A stage comedy-drama that has been adapted to pictures with a splendid degree of success is "His Father's Son," starring Lionel Barrymore and Irene Howley and showing at the Hippodrome theatre Wednesday.

A better choice of stars for these characters of J. Dabney Barron and Betty Arden could not have been made and the play is all that one could wish in that it has real drama, very natural and human comedy, and action that keeps everything moving every minute. The cast is likewise excellent. Frank Currier standing out in his role of old Arden, the millionaire; Walter Horton is a typical villain, and George A. Wright is good as the faithful valet of the boy, J. Dabney. Pertty Illean Hume, Phil Stanford and others are seen to good advantage. The story concerns the adventures of J. Dabney, who is sent from home by his father without a cent and with his valet and racing car, and of "The Lady of the Sea," a beautiful emerald owned by the millionaire Arden, and what happens when the two meet. Of course Betty Arden has a big part in everything, and with happy results.

Charlie Chaplin in "The Cure," at the Hippodrome Friday and Saturday.

PERCY GRAINGER FOR EUTERPEANS

One glance at the program below will show Percy Grainger's original way of doing things. He never follows a beaten path which is one mark of his genius. It is a program to interest both the musician and the layman. Those who cannot fathom the depths of some of the deeper classics will find the keenest delight in his arrangement of folk songs. A full house should greet this great artist on Monday night. Tickets have been placed at a price to put them within the reach of everybody. Following is the program:

1. Organ prelude and Fugue in D major (arranged for piano) ..... Bach-Busoni
2. (a) Romance in F sharp..... ..... Schumann
   (b) "Ondine," the Water Sprite ..... Ravel
   (c) To the Springtime, Op. 43, No. 6 .....Grieg
   (d) In Ola Valley .....Grieg
   (e) Rotnomsknut Halling....Grieg (Peasant Dance.)
3. Variations on theme by Paganini ..... Brahms
4. (a) "Shepherds Heg," set by Percy Grainger (English Morris dance tune).
   (b) "Irish Tune From County Derry," set by Percy Grainger.
   (c) The Leprechauns Dance, (Irish dance), set by Percy Grainger.
   (d) March-jig, "Maguire's Kick" (Irish dance), set by Percy Grainger.

REX THEATRE PRESENTS "BOUGHT"

"Bought" is a Schubert film featuring Frederick Lewis and Ethel Gray Terry. It is at the Rex today only

"PASSION" AT HIPPODROME SATRUDAY

Added to the other talents of little Shirley Mason, featured with George Le Guere in "The Seven Deadly Sins," and playing with Clifford Bruce in the third sin, "Passion," at the Hippodrome theatre Saturday, is a remarkable ability as an acrobat. Miss Mason is the sister of Viola Dana and Edna Flugrath, and all three have been trained from babyhood to turn handsprings and do all sorts of similar stunts. Their father believes it has made for the beauty and agility and health of his girls, and the three are loud in praise of his methods of keeping the doctor away. This story presents Miss Mason as Eve Leslie after she has lost her fortune by a foolish act. She seeks work as a dancer at Coney Island, and finally becomes the diving partner of Leonidas, the "perfect man" physically, of the Monk attractions. She believes herself in love with this man of strength, and becomes infatuated with him. Adam Moore, her true lover, learns of her danger and seeks to save her. But she misunderstands his motives, and the task is made all the harder for Adam. The big climax is full of tense suspense and interest, making "Passion" one of the most thrilling of the series.

'AN OLD FASHIONED YOUNG MAN' AT HIPPODROME FRIDAY

With scenes actually photographed on eight of the largest cities of the United States, and aboard the train which carried the company the 8,000 mile trip, the new Triangle Fine Arts play, "The Old Fashioned Young Man," showing at the Hippodrome theatre Friday, is a distinct novelty among recent photoplays. Robert Harron is the chivalrous young man of today who has the title role, and he travels from the Pacific and back again to obtain proof that will clear a woman's name of scandal. His journey is interrupted by political gangsters who are endeavoring to culminate the woman in order to defeat her candidacy for mayor, but he is persistent. And when the boy has succeeded, after many adventures and troubles, the great surprise that awaits him is ample regard for his efforts and time. Coleen Moore is the young girl lead with Bobby Harron, and Loyola O'Connor, seen in many Triangle plays, is the woman who is running for mayor. Winifred Westover, Thomas Jefferson, Adele Clifton, Sam de Grasse, and many others are in the excellent cast.

There is nothing better than a good woman and nothing worse than a bad one.

KINDERGARTENS TO BE FREE BY NEW TEXAS LAW

Governor Ferguson Approves Bill—Includes Provision for Patrons' Petition.

A bill providing for free kindergartens in the public schools was recently passed by the Texas legislature, winning the approval of Governor Ferguson.

Upon a petition of twenty-five patrons having children between the ages of five and seven years and living within one mile of the school, which petition must be presented to the school board between June 1 and August 1 of the year during which the kindergarten is to be established, the school board must make provision for a kindergarten class in that school. There are approximately 9,000 common grade schools in Texas and 900 grade schools in independent school districts where these kindergarten classes may be formed. If the mothers are as energetic in preparing and presenting petitions to the school boards as they have been in getting the legislation enacted, there should be a big demand next fall for kindergarten teachers in Texas.

SUFFRAGE NOTES FROM FAR AND NEAR

Chattanooga Presents Suffrage as a Gift to Its Women.

Tennessee is no longer in the black list.

Majestic Lookout mountain now lifts her head and declares: "My women are voters."

Enfranchisement has come as the generous gift of the southern men who reside upon the mountain, representative lawyers, doctors and business men whose offices are in the city of Chattanooga. It has come without direct petition or supplication on the part of the women. The amendment was drawn by a member of the city council and put through the legislature by the speaker and other members from Hamilton county. Lookout Mountain is the home of Miss Margaret Ervin, president of the Tennessee Equal Suffrage association. She is also a practicing attorney of Chattanooga and has given many years of her young life to the struggle for the ballot in that state.

Governor Rye signed the bill with a gold pen used by Miss Ervin's grandfather who was a member of the Tennessee senate, 1841-1861.

Vermont Swings Into the Suffrage Ranks.

On March 30 Governor Graham signed the Moore bill giving tax paying women the right to vote in town meetings for all officers except road commissioner. Vermont thus becomes the first suffrage state in New England.

Suffrage Scores Victory in Iowa.

The constitutional amendment for full suffrage has passed both houses of the legislature by a large majority. The measure must be again passed by the next legislature before it is submitted to the voters.

Miss Lathrop Speaks at Breakfast for Miss Rankin.

A breakfast of welcome was tendered Miss Jeanette Rankin on the morning preceding her entrance into the house of representatives. Among the speakers was Miss Julia Lathrop, who said: "We, in the government service, are apt to regard each new representative in the light of what can be got out of him, how much pull we shall have. But a new and hitherto unknown thing has happened to the children's bureau. A congressman before taking his seat has written in to ask 'what can I do to help you in your work for children?' That congressman is Jeanette Rankin." Miss Rankin was elected on a platform favoring equal suffrage, prohibition and child welfare.

San Antonio as a Missionary.

Inspired by the indomnitable spirit of Miss Eleanor Brackenridge, San Antonio women have ever led the vanguard for votes for women in Texas. Their latest activity is the sending out from San Antonio every Saturday a "missionary car" to some town within a radius of fifty miles. The project is under the direction of the San Antonio Equal Franchise society. The "missionary" goes into each community twice, two weeks intervening between visits. The first trip is for the purpose of advertisement, to arrange for meetings to be held on the second trip, and to get into touch with the leading men and women of the towns and with the newspapers. As a result there have been well attended street and indoor meetings, the formation of suffrage clubs, the enrollment of many sympathizers, the development of new workers and the arousing of the country newspapers to an interest in the suffrage cause.

Women of Great Britain Assured of the Ballot.

The house of commons has declared in favor of woman suffrage by a majority of 279. It is hard to realize the utter overturn of British political thought which has now been recorded in the house of commons. Less than three years of war, a brief hour in the lifetime of a nation, have served to destroy the deep rooted prejudice of generations. The opposition to woman's suffrage has in effect collapsed. The uphill fight turns suddenly to sweeping victory.

It is a revolution, a peaceful revolution and nothing less that, we witness. And it comes, as did the Russian revolution, as a direct consequence of the greatest and most terrible of wars. The ballot will be bestowed in recognition of the earnest and efficient part taken by the women of the nation in carrying the burdens of the war. As Prebler Lloyd George expressed it, "the women have worked out their own salvation."

The Pankhursts and Mr. Asquith Now Friends.

In woman's terrible fight for suffrage in England, between the years 1910 and 1913, there was just one force that defeated them. That was the force incarnate in the will of the then prime minister, Mr Asquith. Parliament was converted, the cabinet was converted, the people were converted. Mr. Asquith was not converted. Again and again he fell back on the argument of the ballot and the bullet. Only those who could come to their country's defense in war time could hope to win the franchise under his ruling. Then the war. And now Mr. Asquith proves his claim to greatness by admitting that his argument was false—that woman is the power behind the man behind the gun.

FASHIONS FOR AMERICANS

Sport Suit of Silk Jersey.

Silk and wool jersey cloth have loomed up stronger in the dress line-up for spring and summer than last year. Wool jersey cloth is being used extensively this spring for both sport and motor coats, and some of the new military capes are also being made of it, with usually a light weight lining of gay colored silk.

The little sport suit shown in the sketch is made of plain white and chartreuse silk jersey cloth. The scarf collar is the especial feature of the suit. This collar is formed of two folds of the colored fabric, and it is attached to the neck of the coat at about its lengthwise centre. When desired it may be held together by the button and buttonhole appearing near the end. However, for summer wear the collar will usually be worn open. The coat is finished with generous pockets, overlayed with buttoned on laps of gold jersey. The skirt is simple and straight, gathered in at the waist line, and also equipped with pockets.

This little sport suit might be attractively developed with a coat of plain color and skirt of gay striped or flowered fabric, the skirt material in any case serving to trim the coat.

While a great deal has been written and said about the present season vogue for high colors, and the vogue certainly exists, there is a growing tendency at the present time to go to the other extreme. Grays, beige shades, pale soft tans, etc., are making a strong and successful bid for favor. Textile manufacturers recognize this shifting of the public fancy and a prominent manufacturer has recently stated that his fall showing of fabrics is rather sombre in tone.

Perhaps the war cloud may have something to do with this. Certainly French women are now dressing "quietly" as the result of conditions on the other side. There has been no curtailment or indication of economy in dress by American women, however. Just as many clothes are being bought but they are being chosen in subdued colorings.

The little suit shown in the sketch requires three yards of fabric for skirt and coat trimming. Three and a quarter yards will be needed for the coat.

The model would serve admirably for a suit of the novelty silks, popular this summer, or it might be developed in flannel, serge or linen.

GARDENS URGED TO FIGHT INCREASED FOOD COSTS.

The following helpful suggestions have been issued by the national chairman of the department of suffrage agriculture:

"It is to Secretary Vrooman of the department of agriculture the suffragists are indebted for the far-carrying slogan, 'A garden for every home.' It covers one of the most practical lines which can be undertaken immediately. A part of every door yard should be turned into a garden plot. Lawns that need re-making can be excellently renovated by planting peas upon them for the season. The close cultivation and fertilization will result later in a splendid foundation for a renewed green sward. We advise every woman who possibly can to undertake regular farming on a small or large scale, as seems best; and all who cannot do this, to plant and cultivate a small or large garden plot.

"Women land owners are urged not only to be responsible for all the crops their land will carry, but to contribute the excess of their own needs to a canning center, this center to be under the charge of a trained woman expert from the agricultural schools. She should teach proper canning methods for vegetables and fruits to the same women who raise the vegetables and to others who would volunteer for canning services only. The canned beans, peas, tomatoes, fruit, etc., would be stored for winter use and sold at reasonable prices when the summer produce ceases. Information about canning clubs can be had on application from Mrs. J. K. Landrum, department of agriculture, Austin.

"Every local league is to have a chairman of suffrage agriculture who will organize women into non-dues paying Farm-Garden-and-Vacant-Lot clubs, pledging each woman to farm or to plant a vegetable garden upon her own lot or upon land she can secure, or to co-operate in the movement for cultivating vacant city lots."

PARENT-TEACHERS HAVE SPLENDID PROGRAM.

The Parent-Teachers' association of Jean Sherwood school met in special session last Tuesday afternoon at 2:30, Mrs. Lane, president, presided, while a short business session was held. Definite plan were made for a general get-together meeting to be held at the school building Monday evening, May 7. Committees were appointed to look after the various phases of the work to be done at the May meeting. These committees are already making their plans and the biggest and most enthusiastic meeting in the history of the association is confidently expected.

By a unanimous vote, a motion was passed thanking B. B. Cobb and the entire membership of the school board for lighting the school building.

At the conclusion of the business session a social hour was enjoyed. The faculty of the school were guests of the parents present. An abundance of cream and genuine home-cooked cake was served. This was the largest and most enthusiastic meeting of the year.

Y. W. C. A. NOTES FOR THE WEEK.

The K. Y. C. club had a good meeting on Tuesday evening. A splendid program is arranged for the coming Tuesday, which will be open house day. The club has taken on new life with the entrance into it of Mesdames Boynton, who are directing the activities of the club. Business girls are urged to join and share the good times.

The Minnehaha club took their supper out at Cameron park Wednesday evening. They had a glorious time. Misses Lottie Lees, Lil Lipscomb and Wood chaperoned the girls. There were about twenty-five that enjoyed their first outing.

Plans for a summer camp are materializing very fast under the direction of Mrs. J. D. Willis. The camp will be the first two weeks in July.

The different teams are getting ready for the field day which is to be Friday, April 27, at 5:30 o'clock.

Mrs. R. B. Dupree's team has accepted the challenge for a game of volleyball from the C. O. Dy. team, to be played next Friday night, April 27, at 7 o'clock.

WOMEN.

I went to ask my government if they
would set me free,
They gave a pardoned crook a vote,
but hadn't one for me.
Then men about me laughed and
frowned and said, "Go home, be
cause
We really can't be bothered when
we're busy making laws."
Oh, it's "Women this," and "Women
that," and "Women have no sense,"
But it's "Pay your taxes promptly"
when it comes to the expense.
It comes to the expense, my dears, it
comes to the expense,
It's "Pay your taxes promptly" when
it comes to the expense.
I went into a factory to earn my daily
bread,
Men said: "The home is woman's
sphere." "I had no home," I said.
But when the men all marched to war,
they cried to wife and maid,
"Oh, never mind about your homes,
but save the export trade."
For it's "women this," and "women
that" and "Home's the place for
you,"
But it's "patriotic angels when there's
outside work to do;
There's outside work to do, my dear,
there's outside work to do;
"It's patriotic angels" when there's
outside work to do.
We are not really senseless, and we
are not angels, too,
But very human beings, human just
as much as you.
And it's hard upon occasions to be
forceful and sublime
When we're treated as incompetents
three-quarters of the time.
But it's "women this," and "women
that," and "woman's like a hen,"
But it's "Do the country's work alone,"
when war takes off the men.
And its "women this," and "women
that," and everything you please;
But woman is observant and be sure
the woman sees.

—From New York Tribune.

The Psychological Moment.

"How do you feel today, old man?"

"I don't feel like myself."

"In that case perhaps you will lend me a five-spot."—Chicago Herald.

There are subtle, delicate sound-tints unvoiced till now in your Records

"THE PHONOGRAPH THAT CALLS FORTH HIDDEN BEAUTIES FROM YOUR RECORDS"

The Aeolian-Vocalion

WHAT are these dumb voices — never before sounded? They are rich, vibrant tone-depths that give the noblest character to music.

They are subtle, delicate sound-tints that mirror the very timbred character of each orchestral instrument.

No phonograph ever wakened these "Sleeping Beauties" in records —"till the Vocalion came."

The Vocalion publishes them to the ears as they *are*—delicately soft or deeply vibrant. It *develops* them through its wonderful new tone-producing Sound Box. It *preserves* them through its remarkable Symphonetic Horn—by which tone-leaks or tone-clouding is rendered impossible.

And it enables you to vary on a record—through its epoch-making Graduola device — any phrase or passage you wish. Just, in fact, as the artist himself varies his performance — though without interfering with his technique.

Yes, it is truly a miracle of Science and of sound, this Vocalion. We invite you to try one of your own records on it. You will be welcome any day. We will be amply repaid by what we believe will be your friends' impression of it when they hear you discuss it.

In spite of its finer musical quality and many advantages, the Aeolian-Vocalion costs practically the same as other phonographs. It is sold on very moderate monthly payments, and liberal allowances are made on other phonographs which are taken in exchange.

Prices from $—— upwards

AN INVITATION

We are anxious that all music lovers shall know by personal experience what the Aeolian-Vocalion can do. We invite you and your friends, therefore, to visit the warerooms of our representatives and have any records you desire played for you on this wonderful new phonograph.

We suggest that you bring with you one or more of your own records. Hear for yourself the remarkable results produced upon them by the Aeolian-Vocalion. Perhaps play the Aeolian-Vocalion yourself. Experience the fascination of controlling the music. You need not feel the slightest obligation in accepting this invitation. Consider it rather a favor granted by yourself. You will be most welcome any day.

THE AEOLIAN COMPANY

The Aeolian-Vocalion is handled in this city exclusively by

"It's Easy To Remove Blackheads!"

"Almost in a Twinkling, They Come Right Out," Suggests Valeska Suratt, the Stage Beauty "That Never Fades."

BY VALESKA SURATT.

I COULD hardly believe it myself, when I first saw with what remarkable ease blackheads could be entirely eliminated. I believed as thousands of others do to this day that pinching and face steaming were the only methods which force out these beauty-destroying pests. You all know, or should know that pinching the skin in places, to remove blackheads, produces red spots, and after a time the whole face is full of irregular patches. Get some neroxin at any drug store and sprinkle a liberal amount on a sponge wet with hot water. Then rub it on the places where the blackheads are for a few moments. After washing the face, you will find that every blackhead, big and little, has disappeared from sight completely. This should be done every little while to prevent them from re-appearing.

* * *

MLLE. X.—It's the scalp that needs cleansing even more than the hair. But soap cannot remove the fatty films and scales. Then, too, the alkali in soap dries up the scalp oil. The way to thoroughly clean the scalp is by dissolving away the fatty substances. Eggol is the only thing that will do this. A teaspoonful of Eggol in a half cup of water makes an extraordinarily rich shampoo and hair cleanser. You will have a cleaner scalp than ever before, and this will help to let the hair grow.

* * *

MISS HOW—There are very few drug stores that can't supply you with the beta-quinol for making up my "hair forcer," but if you cannot secure it send the price, fifty cents, to "Secretary to Valeska Suratt, Thompson Bldg., Chicago," and my secretary will forward it to you immediately.

* * *

MRS. S. S.—You can make your hair grow about an inch a month, and in a short time instead of your hair being only to your shoulders, it will be down to your waist, silky and luxuriant, and those thin spots will be all filled with new growing hair. You can rely on this result. Hundreds of my friends are having this experience You can make up over a full pint of this remarkable hair grower, by mixing one ounce of beta-quinol with either a half pint each of water and alcohol, or else with a pint of bay rum. This costs less than any prepared hair-treatment you can buy, and it never fails as others do. Don't fail to try it.

MISS G. H.—Well, you are the girl that will be surprised, if you will use my formula for beautifying the skin. I can promise you really and surely an exquisite complexion in a mighty short time, with a tint like the rose, and spotless as a lily, if you will make this cream at home yourself and use it. You will positively never find anything else in the world to equal it. Now get from your druggist one ounce of zintone and mix it with two tablespoonfuls of glycerine in a pint of water. This makes a rich satiny cream. Use it freely every day—and you will have your dream come true.

* * *

UNCOMFORTABLE — Every morning and during the day if possible apply freely some hydrolized talc to the arm pits and the terrible perspiration will be entirely controlled; the odor will cease at once, and you'll ruin no more gowns or suffer embarrassment. It is really magic in its work.

* * *

MRS. J. K. M.—This formula brings the skin back to its original plumpness and vigor. An astonishing result is the quick disappearance of wrinkles, little and big, crows' feet, and lines of age. It is simple and can be prepared in a few moments, by adding to half a pint of water, one teaspoonful of glycerine and two ounces of eptol, obtained from your druggist. This takes years from your appearance, and is always sure and positive in its work.

* * *

MRS. W. P.—Avoid mechanical instruments for bust development. Use a safe formula, by mixing two ounces of ruetone, half a cup of sugar and half a pint of water. Two tablespoonfuls of this after each meal, and one at bedtime will in most instances do wonderful work. Of course, no one can promise sure results in any one case.

* * *

SUPER—Well, I warned you before not to use any of the hair "burners" commonly sold. Remember? Moisten the hairs with sulfo solution, which you can get at the drug store. This will make the hairs literally wither away in a few minutes. It can't hurt the tenderest skin, and it always does the work. It leaves the skin soft and fair, without spots or redness.

* * *

MISS J. L. S.—It is very true, nearly all face powders are much too chalky, and do not lie evenly on the skin. This is why I had my face powder made after my own formula. It is wonderful in its fineness and is invisible when applied, giving a bloom to the skin which is perfect. It is now sold in drug stores as "Valeska Suratt Face Powder," for fifty cents, in white, flesh and brunette tints.

THE GIRL'S JOB

THE TYRANNY OF THE SMALL

BY JESSIE ROBERTS

It is the small, not the large, things that conquer us and bear us down. This is an old truth, but to realize it once in a while, for the purpose of tackling and getting rid of the small torments, as being really dangerous, is necessary.

I knew a girl who had a nervous breakdown and was obliged to give up her work for over a year, simply because she had to change three times on the route she took daily to and from her work. She was obliged to hurry from car to car, to crowd in with many others. Often she missed her connections and was obliged to wait in all sorts of weather for the next car. It wasn't the weather, however, that brought on her breakdown, but the constant nervous strain of the trip.

When she went back to work she moved close enough to her job to walk to and fro each day. Now she is in perfect health.

"It was something of a problem to change my residence," she told me, "but when I found that a little thing like catching or not catching a car every day was going to smash my ability to earn I decided that moving was not too big a price to pay for health and earning power."

When a big trouble comes you summon all your power to make the best of it. You should regard in the same way the many small things that may be crushing you. Cure them or bring your philosophy to bear and conquer their power to harm by understanding and facing them.

It may be high heels that are making you nervous and fretful. It may be the color of your wall paper. It may easily be some part of your job that bores or annoys you. The little things are as the sands of the sea. Don't allow yourself to be smothered by them; don't let yourself undervalue their power. After all, you are bigger than they, and if it comes to a showdown you will win—unless you fool yourself by saying, "Oh, a little thing like that can't be what's knocking me out."

Who He Was.

Stage Doorkeeper (to super who has been waiting in the rain for over an hour)—Hallo, who are you?

Super—The millionaire in Act 3, Scene 4.—London Opinion.

FERD. T. HOPKINS & SON, New York

STRENGTH SHOWN IN COTTON MKT. LITTLE DECLINE

Fairly Wide Advance Is Established Through Efforts of Short Sellers.

(Associated Press Report.)

New Orleans, April 21.—Pronounced strength was shown by cotton in today's market and a fairly wide advance was established on the efforts of short sellers of the week to realize profits. Opening at a decline of 7 to 8 points, the loss was quickly wiped out and replaced by a net advance which late in the session amounted to 27 to 30 points. The close was at a net gain of 25 to 28 points.

A bullish influence was the report of serious internal troubles in Hungary. Cablegrams from England telling of an increase in British government insurance rates on cotton, while regarded as bearish, had no effect on values. The new rate was said to be five guineas per cent as against the former rate of three guineas.

NEW YORK COTTON.

NEW YORK—There was a sharp rally in the cotton market today. Weather and crop news continued very favorable, but it seemed that a considerable short interest had accumulated on the recent sharp decline and prices advanced on covering for over the week-end. July contracts sold up to 19.48, comparing with the general list, closing very steady at a net advance of 26 to 29 points.

The market opened steady at a decline of 1 point on May, but generally 5 to 18 points higher. There was some scattered selling on the outlook for continued good weather in the south for over Sunday and the favorable character of week-end crop reviews. This caused some irregularity right after the call, but it looked as though weak long accounts had been pretty well liquidated earlier in the week and the market soon turned firmer on continued covering. Reports that southern spot holders were unwilling to follow any further decline seemed to stimulate the demand late in the morning when May sold up to 19.85 and October to 18.35, with active months showing net gains of 32 to 37 points. The close was a shade off from the best under realizing.

Weekly reviews of the goods trade favorable on the average Fall River sales for the week being estimated at 180,000 pieces, while the market was reported lower. —g.;oo

DRY GOODS.

NEW YORK—Cotton goods and yarns were firm and quiet today. Government demands were more urgent. Linens were very firm and burlaps advanced. An auction sale of 105,000 bales of carpets and rugs will begin Monday morning.

COTTON SEED OIL.

NEW YORK—The cotton seed oil markets was easier at the start in sympathy with grain and lard, but a more active demand developed on the decline and prices rallied, closing 5 points net lower to 3 higher. July sold from 15.45 to 15.53 and closed at 15.51. Total sales were 16,300 barrels. Prime crude 13.60.

GERMAN TREACHERY TO MEXICO.

Arthur Bullard Sees Analogy with Irish Insurrection.

Herr Zimmerman is not so naive as to expect much to come of his German-Mexican-Japanese alliance. But he doubtless thinks that we are naive enough to be scared into inaction by it. If we are sufficiently frightened, we certainly will not send soldiers to Europe. The Germans believe that by the bogey man of invasion they have kept the best part of the British army at home. Perhaps we will swallow this bait of a Mexican-Japanese menace. Anyhow, it doesn't cost him much to make the try.

Herr Zimmerman did not think we would be afraid of Mexico; he did hope and still hopes to frighten us with Japan.

It is not so much Germany's attempt to scare us which angers me, as her perfidy toward the Mexicans. Just so the German statesmen incited and betrayed the disaffected Boers of the South African Union. Just so they incited and betrayed the "republican" movement in Ireland. I happened to be in Dublin when that disturbance arose. I've had a little contact with the sufferings of the Belgians. I've been under Zeppelin raids. A ship I was on passed through the pathetic wreckage of the steamship Vesuvius, torpedoed without warning. It was the most mournful sight I ever saw; floating steamer chairs, the wooden peg that children, old and young, throw the rope rings at, and a half sunk lifeboat with dead bodies in it.

But none of these manifestations of German frightfulness stirred my wrath so much as the Dublin insurrection. What did the kaiser care for an Irish republic? Nothing. All he wanted was an Irish insurrection. And so his tools cajoled Casement with lying promises of help, just as they had cajoled De Wet. And so Irish blood was poured out for the greater glory of the Hohenzollerns. That was the maddening thing! The Germans got away with their dirty plot! At least two divisions of English troops just ready to sail for France were diverted to Ireland. Of course the kaiser was pleased. Two divisions shooting Irish peasants instead of Germans!

And, having succeeded so well in Ireland, the Germans now pick the Mexicans for their next victims. They have been at work down there for many months with flattery and lying promises. Don't think they are fools in this matter. They've tried the method before and found it what they call "good." They laugh in their sleeves when they talk to the Mexicans of the reconquest of the "lost provinces." Obviously unable to send real military help at this moment, they hint at help from Japan. They don't expect the Mexicans to conquer us. All they want is to get the Mexicans to die for them.

From the point of view of Realpolitik, the Mexicans are just as valuable to the German general staff as the disaffected Boers and the disaffected Irish—just as valuable and no more. The Germans are quite ready to spend no end of Mexican blood to cause us a little inconvenience.

Treachery to any Mexicans who may trust the Germans' promise is half—the tragic half—of Herr Zimmerman's plot. The other half—the comic half—is to scare us out of our skins with the threat of a Japanese attack.

After the Ball.

First Co-ed—Why, Doris, how tired your eyes look.

Tired One—Yes, my dear, I rolled them so much this evening.—Orange Peel.

Boys Combining Farm Labor and Science in Helping to Feed the World

Upper—Older boys operating a tractor, which does the work of twelve horses and eight men. Lower—Some of the smallest youngsters measuring seeds, plotting gardens and laying out beds with mathematical precision.

Upper—Boys at work weeding the garden they have dug, plotted and planted. Lower—A pioneer surveying the "wilderness," which is to be turned into a garden.

Gardening and Our National Food Problem

How One School Answered the Question.

BY A. E. HAMILTON.

European school children have learned that war is service, war is work. They have learned that this work and service is not alone for the men behind the guns, but for women and girls in the shops, for men and boys on the farm and even for children in the home garden patch.

The school children of Europe are learning a new history. From keen experience and observation they are discovering that the destiny of nations may be determined not so much in the storm of battle as in the silent miracle of a field of potatoes.

It is a hard lesson, this of the dignity of hard, manual labor done in the quietude of farm life. Boys and young men thrill at the thought of battle line and aeroplane, and face cheerfully the long dreary marchings through slush and snow, helping drag cannon if need be.

But pulling weeds! Only in Europe has the war against weeds assumed vital proportions and only there the tragic importance of gardening has been driven home hard and sure.

America faces a food problem. It may never become a tragedy, as it has in some sections of Europe, but its gravity is bound to increase steadily from now until some time after the great war ends.

A mobilization of our available agricultural resources will at best mitigate and render actual danger less acute. Hunger always stalks in the wake of war; and while America may not starve, a large share of America will have to pull in its belt.

CHICAGO BUTTER LOWER

Creamery 39a44—Egg Receipts Are 35,557.

Chicago, April 21—Butter lower, creamery 39@44c.

Potatoes steady, $3@3.10.

ELECTIONS IN AUSTRALIA.

Melbourne, Australia, April 8.—Federal elections will take place in Australia early in May owing to the insuperable difficulties of the coalition war ministry formed by the prime minister, William M. Hughes, a few weeks ago. The government made this announcement last week. Half the senate seats, namely 18—and all the house of representatives seats will be contested. The enmity of the caucus of official labor party to Mr. Hughes for having proposed conscription last year is the prime cause of the appeal to the country.

This hostility manifested itself in obstructive tactics in the senate, where, until very lately, the Hughes or coalition forces were slightly outnumbered by the caucus forces. In the house, however, the coalition had a considerable numerical advantage. The caucus members in the senate would not countenance the coalition ministry's choice of Mr. Hughes, Sir John Forrest, the federal treasurer, and Sir William Irvine as Australia's delegates to the imperial war council in London; nor would they agree to a prolongation for war reasons of the life of parliament until after the war. In other ways they also showed their opposition to legislation proposed by Mr. Hughes and his following.

The hottest fighting of the campaign is expected to be over the senate seats. The next house, it is thought, will again be pro-Hughes. Each of the six states will elect three senators. Australian soldiery at the front will have a voice in the election, as was the case over conscription last year.

In general terms, the issues will be Mr. Hughes' war administration, including his advocacy of conscription last year, the attitude of the official labor party toward the war and Britain, and Australia's expected part and representation in the war council.

TOURING POTATO GARDENS.

Tours, France, April 21.—The rare American tourists who visit the chateaus of Touraine this summer may find the velvety parks of the most interesting show places transformed into potato patches.

Aristocracy has taken up the "tuber campaign," and, beginning with the Countess of Noailles and the Duchess d' Uzes, chatelaines all over the country have promised to dig up their lawns and plant vegetables. Flower gardens, also, will be consecrated to the solution of the domestic crisis.

The rose, the vine and the orchard are not to be touched, but all annual flowers and all green swards must give way to the democratic potato in the interest of the national defence. A committee of leading society women is recording many pledges to this end.

Since there is not enough labor for the farm lands already under cultivation, the temporary release from the army of a greater number of farmers and the importations of more Indo-Chinese and North African labor is expected to count more effectively in solving the agricultural problem than the efforts to transform the chateau parks into vegetable gardens.

FORT WORTH LIVESTOCK

Cattle Receipts 1800 and Market Reported Steady.

FORT WORTH.

(Associated Press Report.)

Cattle receipts 1800; steady; steers $7@11.00, stockers $6@8.40, heifers $6.50@10.50, cows $5@8.25, bulls $6@8.50, calves $5@10.50.

The Lure of the City.

Hi Fli—What are you going to the city overnight for? There isn't anything spicy at the theatres.

Whi Lie—No, but the house is out of stationery, I need towels, we just broke two electric bulbs, the silverware is depleted and I haven't got a table cover.—Chaparral.

Tart Witness.

Dr. Oliver Hobson was defending certain appropriations.

"Don't call these appropriations pork barrel appropriations," he exclaimed. "Though Pocatella numbers only 517 souls, she can appreciate a $90,000 postoffice as well as any bloated metropolis could.

"Cut appropriations of this kind, gentlemen, and you wound your electors as cruelly as the drummer was wounded at the Pocatella House.

"This drummer, being very fond of corn on the cob, ate ear after ear. Finally the pretty waitress, after she'd brought him his fourteenth or fifteenth ear, said, tartly:

"Don't you think you would save half a dollar or so a day if you boarded at a livery stable?"—Washington Star.

Pauline at School.

After her third day's attendance at school, Pauline was relating at home stories of her classmates' naughtiness.

"That's bad," commented mamma. "Didn't the teacher have to correct you?"

"No," Pauline assured her. "She had to speak to all the class but me this afternoon."

"That's queer," remarked papa, a bit suspicious. "What did she say?"

"She said," reported Pauline: 'Now children, we will all wait till Pauline is in order!'"—Everybody's Magazine.

GRAIN RECEIVES SETBACK CAUSED BY GERMAN NEWS

Other Rumors from Abroad Make Fluctuations Over Wide Range.

(Associated Press Report.)

Chicago, April 21.—Wheat prices underwent sharp setbacks today, influenced by news of serious disturbances in Germany and by unconfirmed rumors of revolutionary outbreaks in Hungary and Bulgary. After fluctuations which covered a range of 10½c, the market closed unsettled 1⅞ to 2¼c net lower, with May at $2.31 and July at $1.98¼ to $1.98⅝. Corn lost 2¼@2⅝c and oats ½c@1½c. Provisions finished unchanged to 7½c down.

Indications of great unrest in Germany gave evident emphasis to bearish sentiment.

Decreased buying interest and a disposition of numerous holders to sell out was ascribed also to federal diligence toward gaining control of the food situation.

Corn was governed chiefly by the bearish action of wheat.

Oats showed relative steadiness, one million bushels said to have been taken by the British commission.

Provisions weakened with corn.

CHICAGO TABLE.

Futures ranged as follows today:

Article.	Open.	High.	Low.	Close.
Wheat—				
May	2.33	2.38½	2.28	2.31
July	2.01	2.02¾	1.96½	1.98¼
Sept.	1.78¾	1.80	1.72½	1.76

Corn—No. 2 yellow $1.48@1.51.

Oats—Standard 68½@69½c.

Barley—$1.20@1.52.

LONDON WOMEN PREACH.

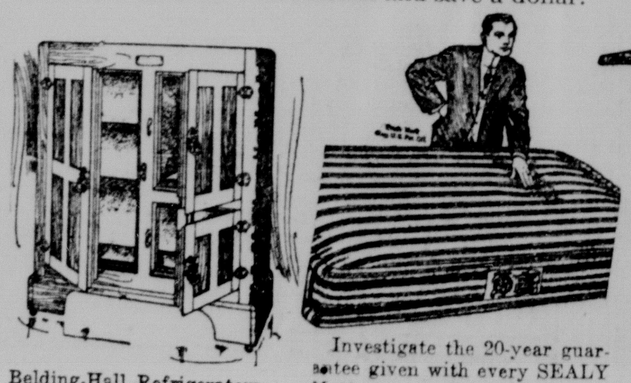

London, April 21.—A successful experiment with women in the pulpit was made here the other day when Miss Maude Royden, daughter of Sir Thomas Royden, bart, preached the regular Sunday sermon in the City Temple. So large was the crowd that came to hear the first woman to occupy that pulpit that police were required to regulate the throng. Several other churches, deprived of their pastors by the war, are expected to follow the example of the City Temple.

Mary—What's the matter with John; is he in love?

James—Why, no; he's only engaged.—Record.

Rowell's Easy Payment Store

—Thousands of homes have been furnished by this pioneer Easy Payment Furniture Store. Every day some saddened heart is relieved of its burden by receiving from Ray Rowell's big store some useful piece of FURNITURE, bought by father, mother, son or daughter to sweeten up the home. Drop in some day and allow us to show you an immense stock of GOOD FURNITURE. For many years I have sold the famous Belding-Hall Refrigerators, and I know by test and experience that they are the equal of any in the world. NEW METHOD Gas Ranges are the WOMAN'S FRIEND, because they save gas and won't smoke. This store is the home of the Sealy Mattress and Leggett and Platt Springs, both guaranteed for TWENTY YEARS. Remember that I occupy my own building, just out of the high rent district, and I invite you to walk a block and save a dollar.

Belding-Hall Refrigerators.

Investigate the 20-year guarantee given with every SEALY Mattress.

New Method Gas Ranges.

EXCHANGE YOUR OLD FURNITURE FOR NEW. Rowell's Exchange Department manager will gladly call at your home and quote highest price possible on your furniture, and sell you new furniture on EASY TERMS to take its place. INVESTIGATE. Now is your opportunity to get rid of the many old pieces you have wanted to discard and replace them with new, clean, up-to-date Furniture. This is not a swapping proposition. We simply accommodate our patrons by accepting obsolete pieces of furniture as payment on new purchases, allowing them more than they could possibly sell it for. Our lowest cash prices are always given on exchange bills.

DICKY DIPPY'S DIARY. —By Sinnott

"WEST IS FIRST IN A SCRAP."

So Admiral Fletcher Doesn't Worry About Our Being Ready.

Rear Admiral Frank F. Fletcher, while in St. Louis inspecting proposed sites for the $11,000,000 navy armor plant to be established in the middle West, said to a reporter:

"The East is fully awake to the need of universal military training, but it has always been my experience that the West is first in a fight, and I think our people here are keenly alive to the nation's necessities in this direction. I have observed that the West is always the first on hand when a scrap comes up, so I think you are all right out here."

Any one looking to find in Admiral Fletcher, as he stood in the lobby of a hotel, any of the distinguishing features with which a romantic imagination might invest the hero of the Vera Cruz expedition in 1914, would have met a surprise. Indeed, one might have taken him for a prosperous country merchant this sea fighter who, for the capture of the Mexican coast city, was nominated commander of the Atlantic fleet, the most powerful and brilliant station in the navy.

Soft-spoken and cordial in demeanor, he added something retiring and gentle to the impression by wearing the spectacles of a bookish man. His 5 feet 8 inches were swathed in a long raincoat, and he carried an umbrella with the folds hanging loose.

"In Europe," he went on, in accents that were mild, but whose import was by no means pacific, "all the nations have their frontiers, and passports are required to travel from one country to another. Therefore, constant association and constant friction arise between the peoples of two countries. The people over there consequently realize fully the need of universal military training.

"In America it is vastly different. We are so isolated from other peoples, so far removed from other nations, that only recently have our people awakened to the need of universal training. When this will come I do not know; the president can answer that better than I.

"But the American people want universal military training. Besides arguments in its favor from the military standpoint, there are many who believe it would make a greater United States, a nation of more virile men, trained to cope with problems in peace as well as in war."—St. Louis Post-Dispatch.

K. OF P. LODGE TO BRING 2000 WACO VISITORS

A convention which will bring almost 2,000 visitors to Waco is that of the grand lodge, Knights of Pythias, and grand temple of Pythian Sisters, convening here May 7. The Raleigh will be headquarters for the grand lodge and grand temple; State House, for the Dramatic Order Knights of Khorasson; Hotel Waco, for the K. R. S. association.

The following program is announced by Grand Keeper of Records and Seal Henry Miller:

Monday, May 7.

All Day—Registration of visitors with credentials committees at various headquarters.

7 p. m., conferring grand lodge rank at Castle hall.

7:30 p. m., reception in honor of supreme officers and ladies in gold room, Raleigh hotel.

8:30 p. m., open meeting in convention hall, Raleigh hotel, with interesting program, addresses, etc., by the supreme chancellor, supreme chief, Pythian Sisters and others. Music furnished by boys' band from Pythian home at Weatherford.

Tuesday, May 8.

9 to 10 a. m., public opening ceremonies, convention hall.

10 a. m., convening of business meetings of the various grand bodies in the respective convention halls.

4:30 p. m., grand parade of subordinate lodges and grand bodies, led by the Pythian Home band, with all visitors in autos. After parade every guest will be given auto ride over city.

6 p. m., old-fashioned barbecue at Cotton Palace park, followed by a grand rally and rousation meeting of "old-time Pythianism" in Cotton Palace coliseum. Speeches by prominent Pythians and musical concert by the Pythian Home band, local talent and other special features.

8 p. m., ceremonial of Dramatic Order Knights of Khorasson at Cotton Palace.

Wednesday and Thursday, May 9-10, business conventions.

Clay Street Baptist.

Sunday school at 10 a. m., preaching service at 11 a. m. This being the closing day of the revival, the morning subject will be "Onward, Christian Soldier." Evening service at 8 o'clock, text, "He that being often reproved and hardeneth his neck shall be suddenly destroyed, and that without remedy." Baptismal services tonight.

It is wonderful what a lot of kissing a little mouth can do.

Theodore Flies Today if Weather Will Permit

Capt. Charles Theodore will fly from the aviation field at Highland Place this afternoon between 3:30 and 4 o'clock, weather permitting. He may have company on his trip. Captain Theodore is receiving offers from towns all over this section, who want him to fly on various occasions.

To the Citizens of East Waco.

Won't you drive over to Park Lawn, "The Cemetery Beautiful," Fourth and Gurley streets, today?

If you will phone me, No. 3959, I will be glad to send a car to bring you over to see the grounds. A. L. STEIN.

(Advertisement.)

Rev. Groner in Interesting Sermon Subject Today

In a sermon to be preached at 11 o'clock this morning, Rev. F. S. Groner, pastor of the Columbus Street Baptist church, will take as his theme, "Christian Patriotism and the Present World War." Rev. Mr. Groner ranks as a forceful pulpit orator and profound thinker, and the sermon is expected to attract an even larger congregation than usual.

Elm Street Methodist.

At Elm Street Methodist church this morning, Rev. Horace Williams will preach at 11 o'clock. At night at 8 o'clock Presiding Elder J. A. Whitehurst will preach.

Special Y. M. B. L. Car Goes to Houston Today

Leaving Waco tonight in a special car, many officers and directors of the Y. M. B. L. will go to Houston to attend the state convention of the organization. The special car will be handled by the H. & T. C. railroad. Sessions of the Associated Young Men's Business Leagues of Texas begin Monday, and continue three days.

VESTA DOUBLE A
